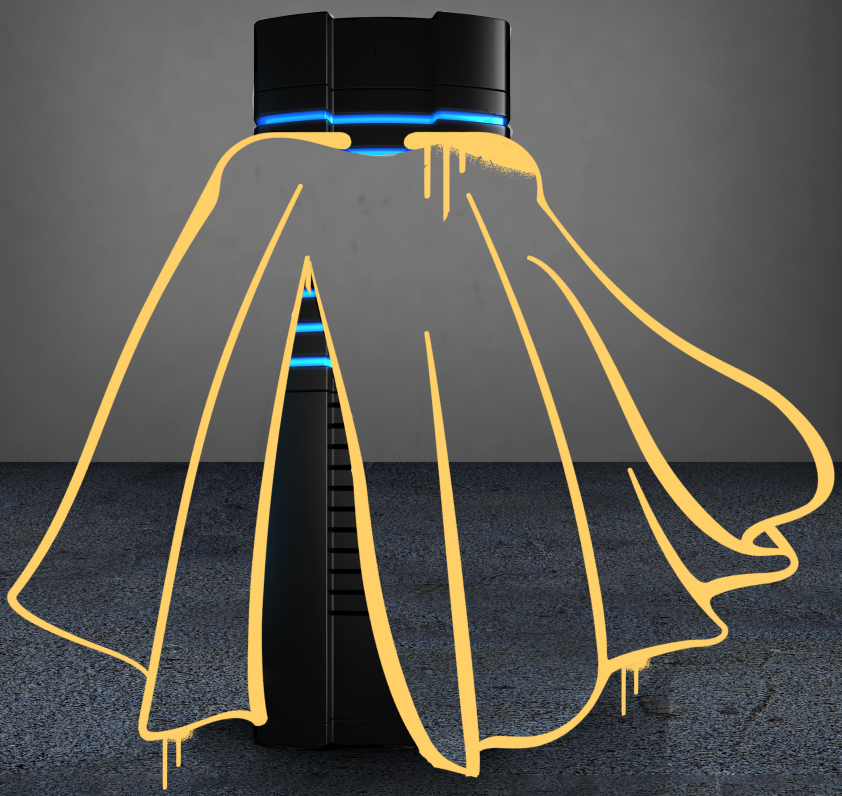
INVISIBLE INFOSTRUCTURE



/Prompt What does the IT infrastructure of the future look like?

TECHNO VISION 2024 /Prompt the future

INVISIBLE INFOSTRUCTURE:

- LORD OF THE CLOUDS
- MY INDUSTRY, MY CLOUD
- OPS, AI DID IT AGAIN
- SIMPLY THE EDGE
- OK QOMPUTE

Capgemini

LORD OF THE CLOUDS

Cloud adoption moves far beyond the middle-earth realm of cloud migration, now also driven by sustainability, distribution, sovereignty, ‘FinOps’, multi-cloud options, and autonomy.

Capgemini

MY INDUSTRY, MY CLOUD

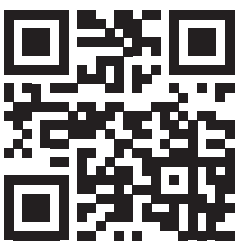
Industry-specific clouds — focusing on data and solutions for a particular industry, domain, or even region — realize the value of cloud faster and focus on business outcomes rather than technology.

Capgemini

OPS, AI DID IT AGAIN

AI renders IT operations fluid, proactive, and resilient, improving efficiency, sustainability, and reliability while it learns — on its way to a handsfree, 'NoOps' autonomy.

Capgemini



SIMPLY THE EDGE

Intelligent devices, at the ‘edge’ of central IT and close to operations and OT, add a powerful dimension to the existing IT infrastructure — merging virtual and ‘real’ worlds.

Capgemini

OK QOMPUTE

New horizons of more organic computing are emerging, driven by Quantum and neuromorphic chips — breaking the spell of bits and bytes, opening up entirely unexplored opportunities.
