Capgemini wins Teradata Epic award for Collaborative Revenue Contribution

Paris, 25 October 2011 – Capgemini, one of the world's foremost providers of consulting, technology and outsourcing services, has announced that it has won the Teradata Epic award for Collaborative Revenue Contribution at the Teradata Partner Conference in San Diego. The award is given to Systems Integrators and Consulting partners who have consistently generated the largest year-over-year incremental revenue growth with Teradata on a global basis.

Paul Nannetti, head of Global Service Lines at Capgemini said: *“We are delighted to be recognized for the close collaboration with Teradata and our Business Information Management Global Service Line. We have traditionally partnered well in the Financial Services and Telecommunications sectors, and in the past year have been very pleased with the strong progress we are making together in Consumer Products and Life Sciences. We look forward to continuing to strengthen our relationship with Teradata in the years to come.”*

This is the third consecutive year that Capgemini has won a Teradata Partner award. In 2009 Capgemini won the Teradata EMEA Systems Integrator Partner of the Year Award for leadership and collaboration in Telecommunications and Financial Services, in addition to the Teradata Innovation Award, in recognition of collaboration with Teradata in France. In 2010, Capgemini received the Teradata Partner Impact Award for Innovation for their role in the joint “Smart Analytics for Utilities” initiative.

“Teradata congratulates Capgemini for its outstanding performance as winner of the Epic Award for Collaborative Revenue Contribution. Our shared customers recognize the unique contribution of our partnership, which has delivered strong business value such as the recently announced success at Levi Strauss,” said Bob Fair, executive vice president, global field operations, Teradata.

“Analytics are clearly a priority for companies and are getting more complicated. Increasing data volumes, new types of data, real time and mission critical needs are all driving the need for more advanced analytics. Teradata can help companies address all of these requirements with our comprehensive platform family and we are pleased to work with Capgemini to help our clients improve their business results based on better analytics.”

Capgemini’s Global Business Information Management (BIM) Service Line has over 7,000 BIM consultants, with a dedicated Center of Excellence in Mumbai, India which was enhanced by a Customer BIM Experience (CUBE), launched in September 2010. The BIM services provided by Capgemini include strategic information management blueprinting; data architecture, warehousing and management; business analytics and performance reporting; electronic file management and retrieval, and collaboration portals.

About Capgemini

With around 115,000 people in 40 countries, Capgemini is one of the world's foremost providers of consulting, technology and outsourcing services.
