

Cybersecurity Transformation Solutions

Evolving Security Operations with Intelligence

Keeping pace with rapidly growing cybersecurity threats takes knowledge, understanding, strategic planning and teamwork. Capgemini leads the way in building new—or transforming existing—Security Operations Centers (SOCs) to meet that challenge.

Traditional security operations models are driven by vulnerability and focus on reactive remediation without taking into account the vast amount of data involved that could enrich and expand defenses. An organization with a mature cybersecurity defense posture is built on a threat-focused security program that strives to achieve a proactive defense culture, whose force multiplies throughout the organization.

These innovative concepts are driven by an intelligence based, proactive mindset and a focus on each phase of the threat life cycle. A clear strategic vision evolves, cultural norms shift, new processes and policies are adopted, and new and existing technologies are integrated. The SOC evolves with the resiliency to uphold and defend, and continuously improve your security posture.

Key Components of the SOC Transformation Roadmap include:

People: Define the human components of SOC excellence

Process: Create the workflows to enhance SOC efficiency

Technology: Employ tools to enable success

The Capgemini SOC Strategic Road Map revolutionizes traditional network defense while remaining aligned with industry best practices. Technology, teamwork, partnerships, and best practices are leveraged to detect, deny, defend, and mitigate malicious threats to assets, stakeholders and intellectual property.

Engagement models for SOC transformation range from consulting to managing the evolution of the organization.

Services include:

- SOC transformation assessment, strategic vision roadmap, and operational processes and procedures
- Knowledge transfer to client analysts on process adoption
- Transitions SOC operations to client analysts for self-sustainment
- Assessment and strategic planning

Capgemini Provides Execution of all SOC Transformation Phases

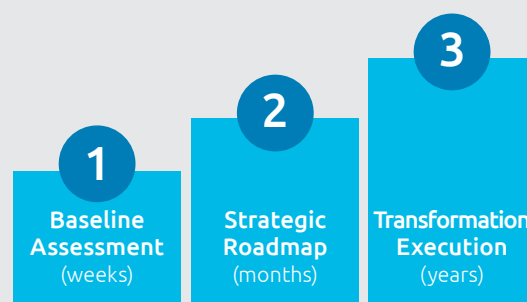

- Physical and Logical Design
- Team Roles and Responsibilities
- Staffing, Training, and Process Development
- Technology Deployment and Integration
- Operations and Sustainment
