

Capgemini Cloud Assessment

A Pathway to Enterprise Cloud-Migration

 **SWIFT AND AGILE**
response to market demand for
CLOUD COMPUTING

People matter, results count.

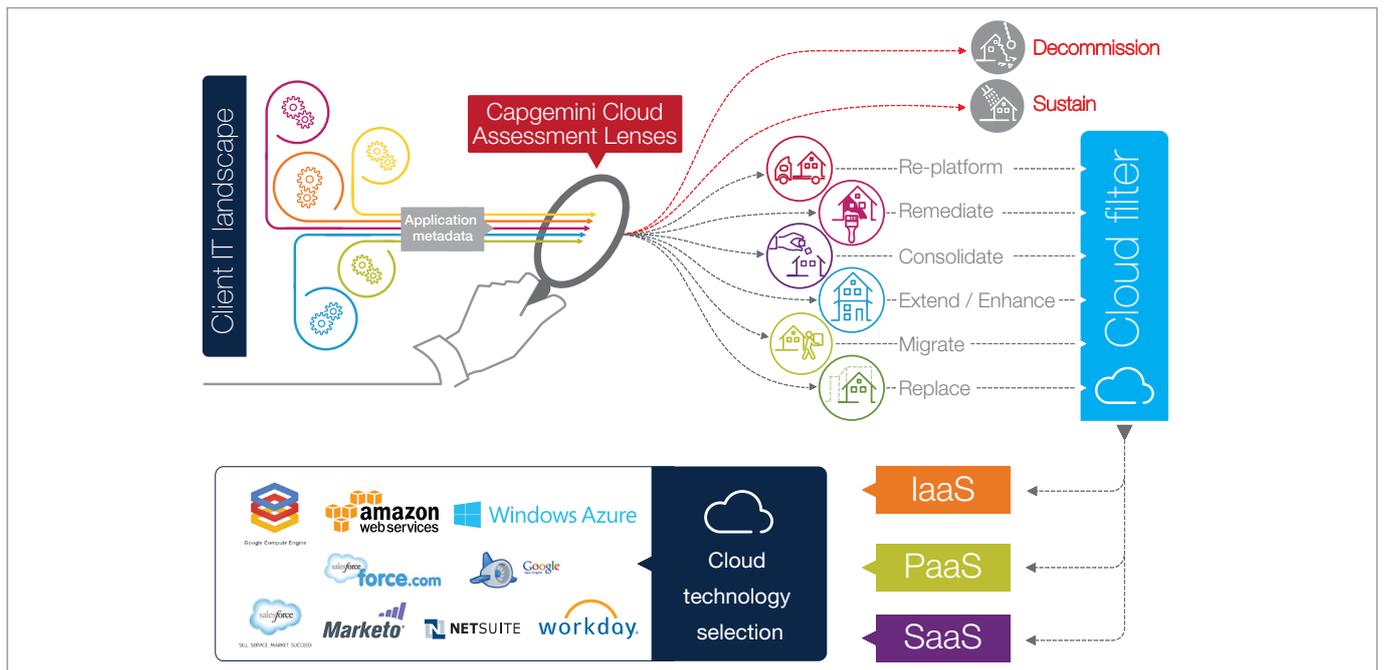

On premises applications are costly, difficult to enhance, expensive to maintain and inhibit business agility. Enterprises are increasingly moving to Cloud solutions that overcome these challenges. They seek a sound methodology and roadmap to migrate to the Cloud without putting the enterprise at risk. Capgemini research shows that over 75% of enterprises have a Cloud migration strategy. Is your organization prepared?

Capgemini Cloud Assessment offers a methodology and a roadmap for Cloud migration to reduce decision risks, promote rapid user adoption and lower TCO of IT investments

A comprehensive and consistent approach aiming at quick results, reduced TCO and user adoption

Capgemini Cloud Assessment is a Cloud agnostic, vendor aware methodology that focuses on low risk, high return business transformation. Additionally, it reduces TCO and provides an early view of ROI.

This closed loop assessment leverages pre-built accelerators such as ROI calculators, risk models and portfolio analyzers utilizing our deep partner ecosystem.

Three powerful deliverables in just six to eight weeks:

End State Architecture
Including application destiny and a set of initiatives to improve technical and functional quality, reduce support costs, eliminate redundancies and mitigate potential risks.

Business Case
Demonstrates business and financial value of portfolio transformation. It justifies the value of the rationalization design motivating stakeholders to progress to next steps.

Deployment Roadmap
Charts the journey from the 'as-is' to the 'to-be' state. It includes design results, schedules and execution priority details.

Capgemini Cloud Assessment Methodology Overview

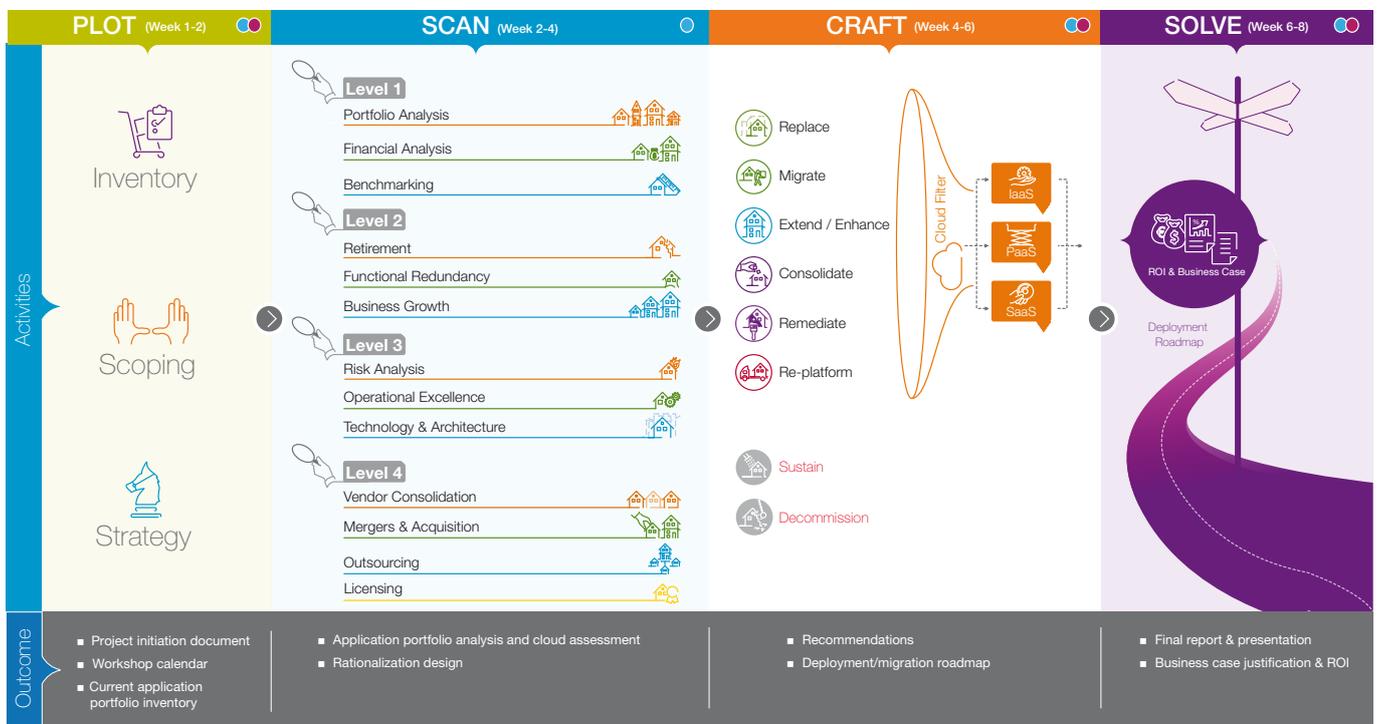

- Plot** Multiple work streams set up to collect application meta data, decide scope and work out execution strategy for the Cloud migration.

- Scan** Dimensional analysis is performed on the portfolio meta data grouping applications into eight destinies.

- Craft** A filter to identify appropriate deployment for each application in the Cloud

- Solve** Road map recommending practical steps for the Cloud migration supported by a comprehensive business case and ROI.

Capgemini Cloud Assessment is a highly collaborative, four phase assessment

Why Capgemini Cloud Assessment

- Cloud agnostic, vendor aware competency
- Knowledge and expertise gained from numerous projects across industry sectors
- Scalable across geographies, BUs and portfolios, accommodates enterprise complexity
- Rationalizes infrastructure, platform and software in the Cloud
- Consistent, proven methodology recognized by the industry
- Fast time-to-value through early visibility of quick wins and ROI
- Proprietary ranking and scoring model refined over hundreds of engagements provides objective analysis
