

Outpace the competition with accelerated Oracle Cloud migration

Automated solution reduces time,
cost, and risk of moving from
Oracle EBS to Oracle Cloud ERP

Cloud is now

Just a few short years ago, our Oracle customers were inquiring about cloud SaaS applications and if they should make the move. Today, it's not a question of if, but when. The shift to cloud is happening faster than expected and businesses are eager to modernize their processes and experience the many benefits.

Comprehensive cloud-migration solution

Capgemini quickly realized the need to accelerate our Oracle customers to the cloud as part of their digital transformation initiatives. In order to transition swiftly and efficiently, Capgemini built a comprehensive migration accelerator called **RapidUpgrade2Cloud (RU2C)**. When using this solution, our customers can produce a like-for-like prototype on Oracle Cloud in as little as four months. This enables them to outpace the competition, accelerate time-to-market, and innovate faster in today's dynamic technology landscape.

RU2C benefits

Capgemini's RU2C solution will help your organization:

- **Reduce IT costs and time to value** - We can deploy configurations and integrations that have been proven effective, which reduces both implementation costs and deployment time.
- **Improve business performance** - Preconfigured and trusted components deliver no-surprise performance and provide:
 - **Agility:** With a modular design, the accelerator can be used as one complete framework to configure, migrate, reconcile, integrate, and report, or it can be used a la carte, tailored to the customer's needs.
 - **Reliability:** 100% accuracy is ensured and validated through use of our Rapid Reconciliation on Cloud accelerator.
 - **Security:** RU2C provides user-level security so the right access to individual accelerators and to specific cloud environments is assigned. RU2C also utilizes built-in SaaS security elements for configurations, metadata, and data migration, so they are securely moved to the cloud.
- **CAPEX/OPEX savings** - RU2C is bundled with our services so there is no additional fee for its use in cloud implementation projects.

RU2C vs. competitor solutions

RU2C is one of the most complete Oracle Cloud migration solutions available today. The table below provides a comparison to other automated toolsets:

Component	Others	RU2C
Assessment - Analyzes on-premises EBS configurations, setups, custom objects, database information, modules implemented, applied patches	Yes	Yes
Configuration migration - Extraction from on-premises EBS, converts into FSM templates and imports to cloud instance	Yes	Yes
Data migration - Master and transactional data extraction from on-premises EBS, converts into FBDI/HDL templates and imports to cloud instance	Yes	Yes
Reconciliation of migrated master and transactional data in tabular and graphical format; generated output can be shared with business users in Excel format		Yes
Integrations repository - Performs integration without any middleware tool, second solution uses prebuilt point-to-point OICS integrations		Yes
Reports repository - Pre-configured 100+ one-click plug-in reports available as per industry standard and best practices across all named cloud offerings		Yes
Extensions - Converts OAF screens to ADF pages (in progress)		Yes
Testing - Automated regression testing suite (in progress) which spans across all named cloud offerings		Yes
