Syensqo selects Syniti, part of Capgemini, for multi-year data transformation to unify global operations

New unified digital foundation to enable faster decision-making, accelerate time to market, and boost global execution

Brussels, June 3, 2026 – [Syniti](#), part of Capgemini, today announced a major data transformation engagement with global specialty chemicals leader [Syensqo](#), following its strategic separation from Solvay. The multi-year program will support Syensqo's SAP S/4HANA Greenfield migration, consolidating multiple SAP and non-SAP systems. Syniti's Data First Approach prioritizes early data preparation and governance, helping deliver clean, business-ready data as the foundation for this transformation, which is critical for a highly regulated industry where accuracy and compliance are paramount.

In addition to migrating data from multiple legacy systems into a standardized SAP S/4HANA environment, the complex global program includes data assessment, cleansing, transformation, and harmonization. The scale of this initiative reflects Syniti's successful track record in executing enterprise-grade solutions that streamline operations and establish high-quality, governed data to power emerging capabilities like agentic AI, positioning organizations like Syensqo for long-term growth.

In the chemicals sector, compliance and precision are non-negotiable. Syniti's proven methodology ensures that data quality and governance are prioritized from the start, reducing risk and enabling Syensqo to meet stringent regulatory requirements while accelerating time-to-value. This multi-year, multi-system migration represents one of Syniti's most significant enterprise engagements in EMEA.

"Syniti was chosen due to their proven experience in delivering major transformations over the years and their understanding of what it takes to deliver migrations at this scale," said Gabriela Azzali, Program lead at Syensqo. "Syniti has earned our trust by consistently offering the expertise and discipline required to build a new digital core that will help make our data a strategic advantage. We'll continue to rely on Syniti's experience to help us create a foundation that supports faster innovation and stronger execution across our business."

"We're thrilled to partner with Syensqo at such a pivotal time in their transformation journey," said Chris Gorton, Managing Director, Syniti EMEA, Asia Pacific & Japan, part of Capgemini. "This partnership is a major milestone for Syniti in EMEA and is a continued validation of our ability to deliver successful business benefits for enterprises undergoing massive business transformation efforts. Our Data First Approach will help ensure that Syensqo has an innovation-ready environment that will enable growth and operational excellence for years to come."

About Syniti, part of Capgemini

Syniti, part of Capgemini, is a global leader in enterprise data management. Through its AI-powered Data First approach, Syniti helps enterprises solve the world's most complex data challenges by aligning data initiatives with broader business strategy to drive smarter, more successful transformation outcomes. Syniti has been a trusted partner to Fortune 2000 companies for over 15 years, helping enterprises unlock valuable insights that drive growth, reduce risk, and strengthen competitive advantage.

With a team of more than 1,600 employees across 18 countries, Syniti delivers expertise and scale to support sustained business results globally. Its unified enterprise data management platform, the Syniti Knowledge Platform (SKP),

combines data migration, data quality, data replication, master data management, analytics, data governance, and data strategy into one end-to-end solution. Learn more at www.syniti.com.
