# Transform to a Data-driven Enterprise with Capgemini's Big Data Solution for Oracle Engineered Systems

Enterprises everywhere now know the importance of gaining valuable insight from data from various sources and using it to gain a competitive advantage, in real-time. However, many leaders and IT departments lack the technology that allows them to effectively leverage their data to increase revenue and performance. In the meantime, the volume of data and the pace of its growth are only increasing, and enterprises need to act fast if they don't want to fall behind.

Capgemini's Big Data Solution for Oracle Engineered Systems

Capgemini helps you substantially improve your response to large volumes of structured and unstructured data by integrating the Oracle Big Data Appliance, a high-performance platform part of the Oracle engineered systems portfolio that helps you run diverse workloads to optimize your infrastructure footprint. The outcome? Extreme performance and improved data security at reduced total costs through a simplified, single-vendor landscape. Capgemini's offering is comprehensive in its approach, helping you across all phases of your transformation to a data-driven enterprise. This includes advisory, execution, and support services across the planning, designing, implementation and maintenance phases.
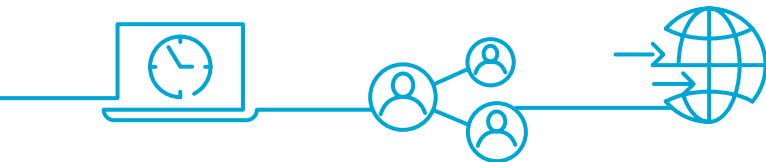

Maximize Value with Big Data

A robust big data solution can help improve the performance of your data assets while ensuring security. It can also change the way you leverage data to improve margins, retain or acquire customers, and enhance KPIs across business processes. More specifically, you'll see the following benefits from our offering:

- **Convenience and simplicity**, thanks to a single-vendor approach to big data software and hardware
- **Improved speed-to-market** with a production-ready big data solution in days rather than months
- **End-to-end support** with Capgemini's proven, comprehensive expertise

Partners in Business Transformation

In addition to our experience, Capgemini has the expertise and capabilities to make every Oracle Engineered Systems project a success. We operate an Oracle Engineered Systems Center of Excellence that supports our global Oracle Engineered Systems team of solution architects and over 200 trained delivery resources. Our Center of Excellence helps us capture and apply industry best practices and share learning from our numerous engagements.

These capabilities, supported by our global team of over 13,500 consultants and our status as an Oracle Diamond-level partner, ensure that we can help any enterprise, no matter the industry, adopt Oracle Engineered Systems to realize the value of a simplified IT landscape.

About Capgemini

Now with 180,000 people in over 40 countries, Capgemini is one of the world's foremost providers of consulting, technology and outsourcing services. The Group reported 2014 global revenues of EUR 10.573 billion.

Together with its clients, Capgemini creates and delivers business, technology and digital solutions that fit their needs, enabling them to achieve innovation and competitiveness. A deeply multicultural organization, Capgemini has developed its own way of working, the Collaborative Business Experience™, and draws on Rightshore®, its worldwide delivery model.
