

Accelerate, Automate and Simplify - SAP S/4HANA Migrations

Jumpstart digital transformation with agile migrations

Choose Capgemini. Choose our Accelerated HANA Migration Offering.”

The System, the Application and Custom Development Impact Assessments for your enterprise

As you accelerate your journey to become a true digital enterprise, the choice of your IT platform is one of the most crucial decisions you make. In order for a platform to truly enable digitization, it has to fully facilitate the business agility and flexibility that is mandatory today while laying a foundation for future innovations to be realized more quickly and intelligently.

SAP’s newest and next-generation SAP® Business Suite 4 SAP HANA® (S/4HANA) forms the digital core customers have been looking for to fulfill their digital transformation ambitions. Built on SAP HANA, it aims at digitalization of products and services.

Therefore, for companies running SAP, migration to SAP S/4HANA is no longer an option—it’s a requirement, and the question isn’t if you should move to SAP S/4HANA, but rather when you should do it and how you can do it in the most optimal manner.

Capgemini offers our “SAP HANA Accelerated Migration Factory” to support all the phases of a SAP S/4HANA migration project from assessment to go-live and support with an industrialized migration approach that provides the structured methodology and tools for an accelerated migration to SAP S/4HANA. Our Accelerated Migration Factory leverages a wide-variety of tools to automate as many activities as possible and focuses on optimizing custom code transformation with minimal impact to timelines.

The Accelerated Migration Factory

Your Challenges? Our Answers!

- Support all the phases of a SAP S/4HANA migration project from assessment to go-live with structured methodology and tools
- Optimizing through automated custom code transformation
- Realize savings on time and cost with proven migration methodologies

Why YOU need this!

- **Controlled Risk:** Use of proven methodologies combined with Capgemini’s strong SAP HANA migration experience reduces risk
- **Greater Speed:** An industrialized approach and considerable automation reduce overall migration time to significantly increase time-to-value
- **More Agility:** An approach based on flexible principles and the awareness that unexpected changes allow on-the-fly reworking of the migration plan
- **Increased Cost Efficiency:** A high degree of automation coupled with Capgemini’s Rightshore® approach reduces the costs of the migration

*Perform **4** weeks Rapid Assessment to find out impact on system landscape, application and custom development*

*Auto-correction capability for about **40%** of recommended HANA checks by SAP*

***10** reporting dimensions to help prioritize and finalize the scope of work*
