

# Information Security Benchmarking Study 2017

**Cyber Security threats increase and an adequate level of Information Security is more important than ever. Is your company ready to encounter today's and future challenges?**

Several topics are covered by the **Information Security Benchmark 2017:**

- Information Security risks and drivers
- Strategy and governance
- Organization structures and investment areas
- Processes and technological aspects like EU GDPR, DevOps and Cloud security
- ...

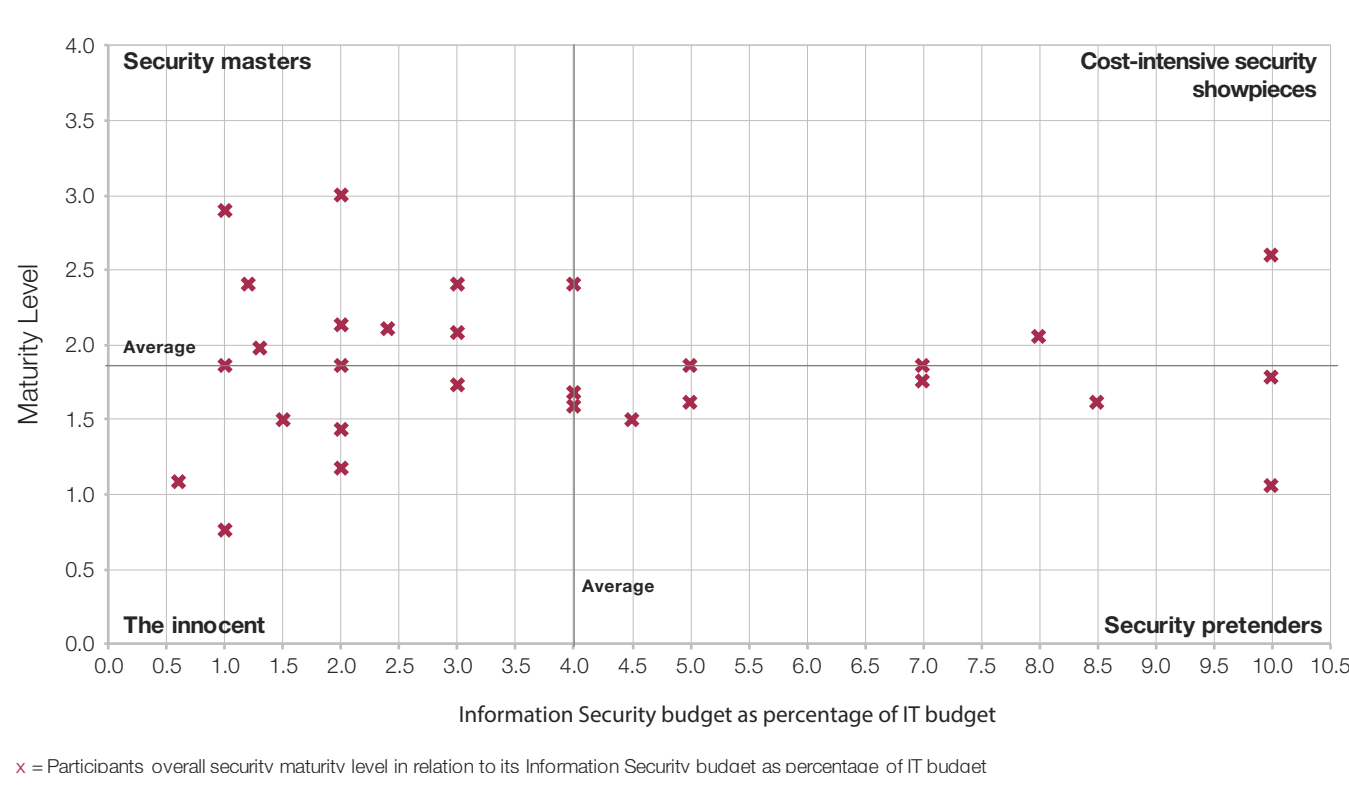

The Information Security Benchmark 2016 has shown that the correct allocation of Information Security budgets plays **an important role in achieving high security maturity**

## Distribution of Information Security budget

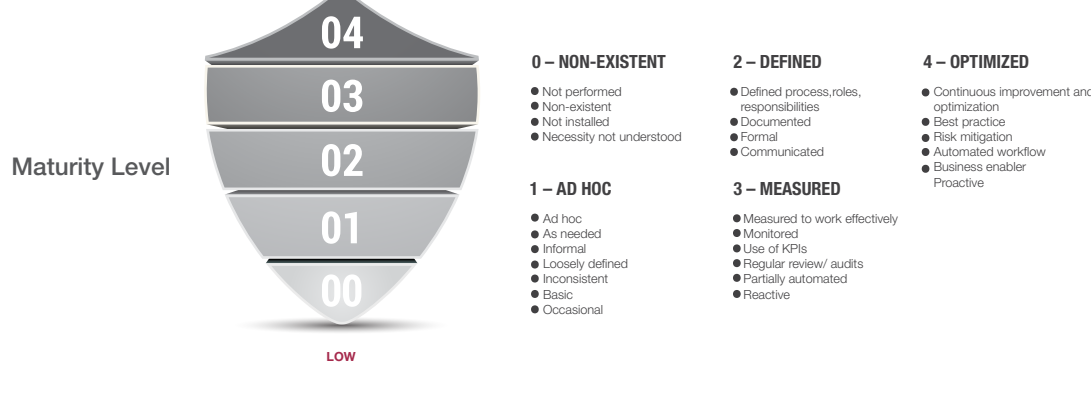

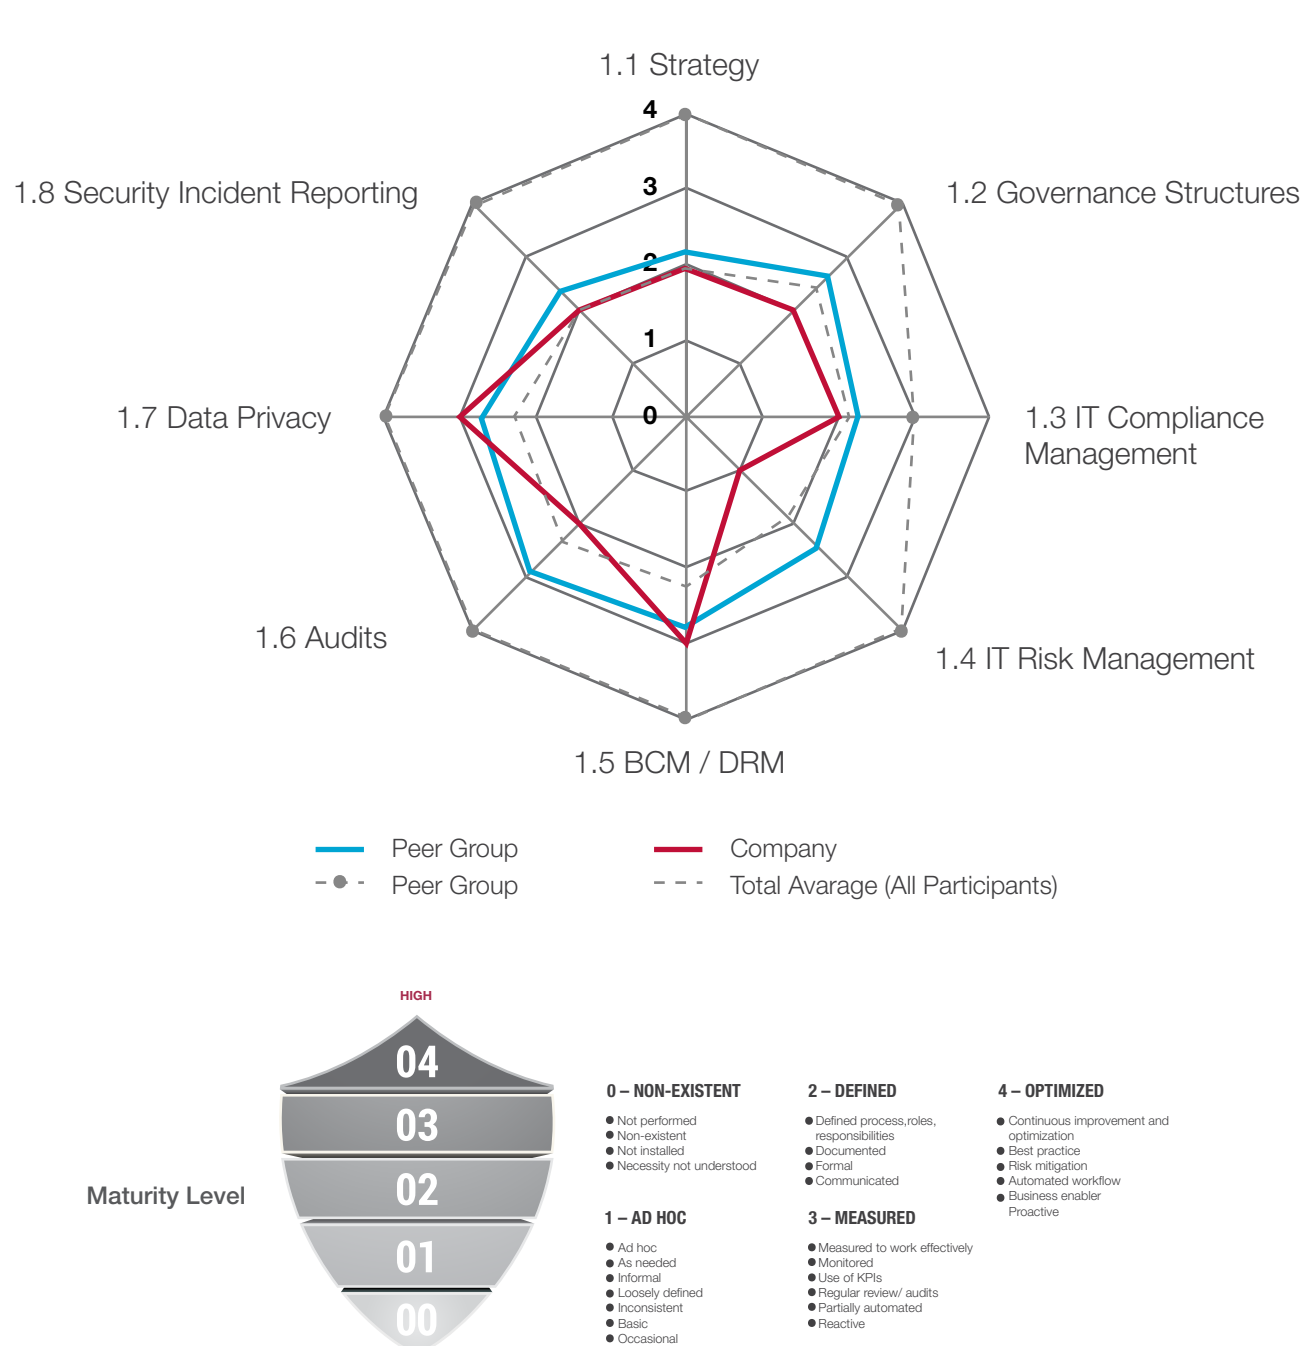

## Correlation between budget and security maturity

**No direct correlation between budgets and security maturity – Strategic investment into the right areas, as demonstrated by the security masters, is key.**

To develop an effective Information Security strategy **it is important to know your status quo. A benchmark based on our proven Information Security Framework helps to identify improvement areas**

## Example dimension and maturity level

**Where are you now? Where do you want to go? How is your position compared to your peer group? ... are just some of the questions answered by the Information Security Benchmark 2017**

Capgemini's free of charge international Benchmarking Study **analyses your current state based on a maturity level approach**

## Results are differentiated by industry:
