Top Trends 2025

# The Capgemini FS Top Trends 2025 span three broad themes

Transforming customer experience focusing on omnichannel interactions and the value of products and services

# Enterprise Management

Revamping processes, teams, solutions, and operations to run enterprises with greater agility and operational efficiency to optimize the cost of doing business

# Intelligent Industry

Leveraging the most modern solutions to deliver an end-to-end digital experience that transforms the value chain – from design to delivery of intelligent products and services

# The Capgemini FS Top Trends in the Banking sector by sub-domain (1/2)

#### Wealth Management Retail Banking Payments

Seamless digital experience: Wealth firms power up digital platforms to consolidate services and create seamless CX

**Omnichannel experience**: Omnichannel customer journeys boost experiences across digital platforms, contact centers, and branches

**Open finance:** Open-finance-based use cases will grow as regulators improve financial data access

**Hyper-personalized advisory**: Artificial intelligence can enable made-to-order investment advice strategies

**Financial literacy**: Financial literacy and personal budget apps boost customer confidence and promote financial inclusion

**Instant payment adoption**: Instant payment rails are cannibalizing checks and debit cards, while mobile wallets maintain their dominance

**Bridging generation gaps**: With younger entrepreneurs on the rise, wealth firms shape advice to resonate with HNWIs of all ages

**Next-gen banking**: Retail banks set their sights on youth, the prime target of new age players, to secure long-term customer lifecycle growth

**POS innovations**: POS payment innovations can help banks enhance merchant acquisition capabilities and increase consumers' credit options

**Inorganic growth strategies**: Wealth firms seek external expansion to broaden services and boost revenues

**Operational resilience**: Digital operational resilience will remain crucial for regulatory compliance

**Cross-border payments**: Multi-territory instant payment corridors are revolutionizing cross-border payments, empowering businesses with speed and efficiency

**Regulations drive ESG traceability**: Wealth firms implement ESG asset transparency metrics as regulators standardize sustainability reporting

**RegTech for compliance**: Intelligent RegTech solutions will reduce compliance costs and timelines, as retail banks face escalating risks

**Cloud-based payment hubs**: Cloud-based payment hubs offers unified and consolidated multi-rail payment processing capabilities at scale

**Digital onboarding**: Digital onboarding boosts revenue for wealth firms through white-labeling, while accelerating client acquisition and improving compliance

**Deposit growth**: Deposit growth continues to be a retail bank priority along with lowering funding costs

**Multi-rail payment strategy**: Multi-rail strategy will enhance payment flexibility and offer different payment methods in a single interface

**Unified operating models**: Wealth firms unify operating models to deliver a consistent experience for HNWIs across geographies

**Onboarding efficiency**: Onboarding efficiency remains critical as retail banks embrace digital identity management for seamless onboarding

**Operational resilience**: Regulators are prioritizing operational resilience to foster trust in the cashless future of markets and economies

**Gen AI for relationship manager efficiency**: Gen AI-powered copilots can boost relationship manager productivity

Al for efficiency gains: Artificial intelligence will drive productivity by reimagining customer and employee journeys

**Decentralized identity**: Decentralized digital identity management combats fraud and grants customers greater control over their personal data

**Real-world asset tokenization**: Real-world asset tokens powered by robust blockchain networks improve liquidity and access

**ESG product strategy**: Banks will implement intelligent ESG product strategies and solutions

**Remittance transformation**: Remittance transformation is reshaping the global financial landscape, characterized by plummeting costs and lightning-fast transfer times

**Cloud-native wealth management platforms:** Cloud-native platforms scale workflows and enable cost-efficient wealth management processes

**Leveraging open finance**: Open finance regulations clear a path for retail banks to develop a 360-degree customer footprint

**Data monetization**: Payments data is driving innovation and leading to the creation of new revenue streams

# The Capgemini FS Top Trends in the Banking sector by sub-domain (2/2)

#### **Capital Markets**

#### Lending & Leasing

#### Sustainability

Perpetual KYC revolution: Organizations are digitizing and automating KYC processes to reduce the cost of compliance and enhance customer experience

**Frictionless Enterprise:** Providing a one stop shop for equipment delivered through a seamless omnichannel digital experience

**Sustainable product opportunities:** Growth in innovative and ecofriendly debt instruments and insurance products

**Accelerating sustainable lending**: Banks are augmenting to accelerate green lending and leverage sustainable finance as a growth engine

**Moving towards Equipment-as-a-Service:** Redefining equipment financing with growth of an as-a-service model

Sustainability service opportunities: Financial institutions support their end-clients beyond financing to accelerate their net zero transition and resiliency

**Changing investment landscape:** The market landscape is shifting as organizations adapt to passive investing, retail investor growth and geopolitical forces

**Embedded finance**: Transforming equipment leasing with seamless integration of financing solutions

**ESG risk criteria:** Financial institutions increasingly incorporate ESG risk factors into their investment strategies and risk management processes

**Efficiencies through collaboration:** The industry is moving towards mutualization and strategic outsourcing to reduce the cost of post-trade processing

**Expanding B2C channels**: Leveraging digital platforms for scalable growth and enhanced customer engagement

Increased regulation: Enhanced regulatory frameworks and reporting reshapes corporate accountability through rigorous ESG standards by 2025

**Capital efficiency:** Global uncertainty and regulatory shifts are driving organizations to focus on mastering their capital strategy

**Bespoke Solutions:** Offering customized solutions in an efficient and cost-effective manner

Industrialized climate risk modeling: Financial institutions are intensifying efforts to assess, manage, and disclose climate related risks to stakeholders

**Modernized resilient platforms:** Limitations in legacy systems are driving capital markets organizations to modernize their core systems

**Green asset financing**: Need for sustainability reshaping the investment landscape

**Greenwashing and greenhushing:** Financial Institutions face scrutiny from customers and activists and possible penalties from regulators, consumers and activists

**DLT & tokenization:** The increased integration of DLT and tokenization into mainstream finance is digitally transforming the financial services industry

**Navigating the regulatory landscape**: Shift towards sustainable and transparent lending

**Decarbonization of portfolios:** Stakeholders increasingly prioritize low-carbon investments to reduce carbon footprints and align with climate goals

**Leveraging Generative AI:** Capital Markets organisations are seeking competitive advantages using Gen AI to create actionable insights, efficiencies and differentiation

**Ushering digital transformation:** Leveraging data driven management and decision making

**Sustainability as corporate DNA:** Enterprise-wide sustainability with integration into operations, products and services and supply chain

**Global accelerated settlement:** The drive for a global T+1 settlement cycle continues, with the UK and EU pushing forward with plans

**Simplifying and standardizing process:** Essential steps for leveraging Artificial Intelligence and Machine Learning technologies across geographies and business lines

**Gen AI aiding sustainability:** The advent of Gen AI has made financial services look at more innovative ways of implementing Sustainability

**Transaction reporting optimisation:** Following the recent regulatory rewrites, firms are shifting focus to efficiency and control

**Balancing automation with human expertise:** Integration of Artificial Intelligence and Machine Learning for efficiency while preserving human judgment and creativity

**Going beyond carbon emissions:** Financial services broaden focus beyond carbon emissions to include social and biodiversity factors in ESG strategies

# Wealth Management Top Trends 2025 – Priority Matrix

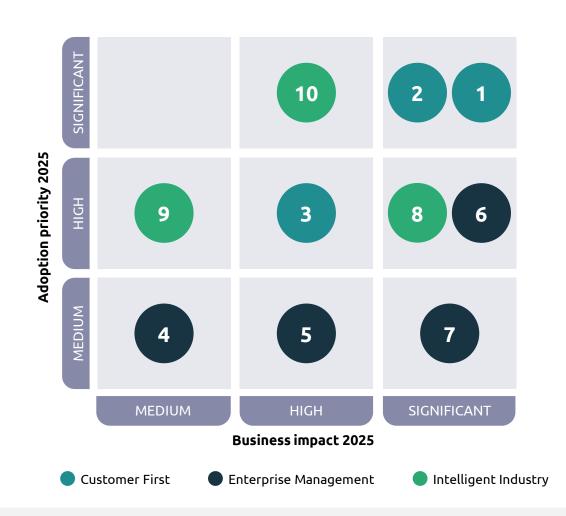

- Seamless digital experience: Wealth firms power up digital platforms to consolidate services and create seamless CX
- Hyper-personalized advisory: Artificial intelligence can enable made-to-order investment advice strategies
- **Bridging generation gaps:** With younger entrepreneurs on the rise, wealth firms shape advice to resonate with HNWIs of all ages
- Inorganic growth strategies: Wealth firms seek external expansion to broaden services and boost revenues
- **Regulations drive ESG traceability**: Wealth firms implement ESG asset transparency metrics as regulators standardize sustainability reporting
- **Digital onboarding**: Digital onboarding boosts revenue for wealth firms through white-labeling, while accelerating client acquisition and improving compliance
- **Unified operating models**: Wealth firms unify operating models to deliver a consistent experience for HNWIs across geographies
- **Gen AI for relationship manager efficiency**: Gen AI-powered copilots can boost relationship manager productivity
- **Real-world asset tokenization**: Real-world asset tokens powered by robust blockchain networks improve liquidity and access
- Cloud-native wealth management platforms: Cloud-native platforms scale workflows and enable cost-efficient wealth management processes

Capgemini's **Priority Matrix** outlines our assessment of the impact of 2025 trends on operating environments facing:

- Softening inflation and high interest rates, coupled with stagflation trends
- Geopolitical instability
- Dynamic regulatory activity

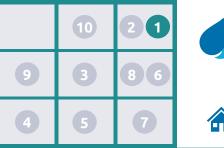

- Intense competition and increased focus on customer centricity due to the impact of new-age players
- Operational cost overruns and high capital lock-in

- Adoption priority: The criticality of a 2025 trend to value creation because of its sector importance.
- **Business impact**: Each trend's effect on 2025 sector business as it relates to customer experience (CX), operational excellence, regulatory compliance, or profitability. Circumstances will vary for each firm depending on business priorities, geographic location, and other factors. For more information, contact us at wealth@capgemini.com.

# Seamless digital experience

Wealth firms power up digital platforms to consolidate services, create seamless CX

#### **Background**

- Digital transformation is now essential to meet investor expectations, but siloed systems prevent wealth firms from creating a unified, customer-centric platform.
- Capgemini's World Wealth Report 2024 found that one-third of high-net-worth individuals (HNWIs) are dissatisfied with their primary wealth firm's digital services.1
- According to a J.D. Power survey, 86% of US investors with advisors logged into their firm's site in the past year, and 60% used the mobile app. Advisors who engage clients with digital tools drive higher satisfaction and referrals, while those who do not generate half as many referrals.<sup>2</sup>

#### **Impact**

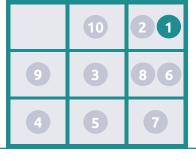

- Enhancing offerings from digital platforms, such as a wider selection of curated portfolio options, allow clients to align investments more closely with their risk preferences. Digital platforms also empower advisors to guide client decisions effectively and speed up interactions.
- Integrating services like market insights, personalized alerts for new launches, and an aggregated portfolio view, all accessible on digital platforms, enhance **visibility** and **convenience** for clients, resulting in higher overall satisfaction.
- Faster and seamless interactions and **innovative portfolio building options** help wealth firms **retain clients** and increase wallet share, driving growth and profitability.

Sources: 1. Capgemini World Wealth Report 2024; 2. J.D.Power – 2024 US Investor Satisfaction Study; Capgemini Research Institute for Financial Services analysis, 2024

# Seamless digital experience

Wealth firms power up digital platforms to consolidate services, create seamless CX

#### Figure 1: Enhanced digital platforms can help wealth firms serve investors

Client retention and acquisition

Better customer satisfaction and engagement boost business. A superior digital experience attracts **new clients** and helps to **retain existing investors**.

Innovation and agile deployment

Relationship managers can analyze customer preferences among multiple investment offerings to predict the future needs of clients and **deploy on-demand products faster**.

**Personalization** and simplification

Platform enhancements such as centralized tools and services enable a tailored financial view – simplifying money management and helping make it intuitive.

Consolidating services through digital platforms supports an omnichannel strategy, allowing firms to scale quickly and efficiently compared to traditional methods.

#### Bank of America

Bank of America revamped its mobile app in March 2024 to merge five separate applications into one unified platform for 57 million clients. The update offers a comprehensive financial view that integrates banking, investing, and retirement services.1

#### **UBS**

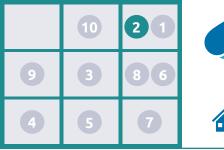

After deploying its "MyWay" portfolio management platform in several countries, UBS made it available to Credit Suisse clients in Switzerland in July 2024, with plans for international expansion. The platform lets investors set goals and manage portfolios with expert help, using over 80 building blocks.<sup>2</sup>

Sources: 1. Bank of America; 2. Wealth Briefing; Capgemini Research Institute for Financial Services analysis, 2024

# Hyper-personalized advisory

Artificial intelligence can enable made-to-order investment advice strategies

#### Background

- **WealthTech platforms** make personalized services more accessible and affordable and now investors want more personalization.
- Our World Wealth Report 2024 revealed that +64% of HNWIs are concerned by the lack of personalized advice tailored to their financial situation. Artificial intelligence (AI) offers solutions and wealth management executives rank intelligent insights for portfolio optimization as the second-most significant impact of AI, after manual process automation.<sup>1</sup>
- Citigroup predicts that AI may potentially add USD 170 billion to the banking industry by 2028.<sup>2</sup>

#### **Impact**

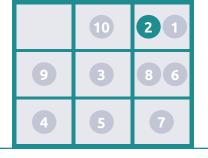

- Al can create personalized messages, offers, and experiences that resonate with each client – encouraging engagement.
- Al can tailor product recommendations to individual preferences to spark engagement and boost client loyalty.
- Al can help optimize tax planning strategies and offer ways to amplify returns, improving clients' overall financial well-being.

Sources: 1. Capgemini World Wealth Report 2024; 2. Nasdaq; Capgemini Research Institute for Financial Services analysis, 2024

# Hyper-personalized advisory

Artificial intelligence can enable made-to-order investment advice strategies

#### Figure 2: Al powers hyper-personalized use cases throughout the investor journey

# Onboarding and customer profiling

Wealth managers can leverage AI to prioritize client leads for onboarding success.

AI-powered tools can analyze client risk factors and appetite to help relationship managers build relevant investment portfolios.

# Investment recommendations and triggers

Al assists in personalizing client welcome screens with relevant educational content and next-best actions. Clients receive messages triggered by their transactions, which can introduce cross-selling opportunities.

# Rebalancing with key life events

Al helps portfolio rebalancing through additional investment recommendations aligned with major life events, including marriage, home purchase, birth or adoption, etc.

# Tax optimization

With data on customer holdings and local taxation rules, AI can support relationship managers in providing tax-efficient portfolio management that optimizes returns while leveraging tax-loss harvesting regulations.

#### J.P. Morgan Chase

J.P. Morgan launched "Quest IndexGPT", a set of stock indices using OpenAl's GPT-4 to generate keywords for thematic indices. The tool improves index construction accuracy and efficiency. Available since May 2024 on Bloomberg and Vida platforms, the index has garnered positive feedback from institutional clients.<sup>1</sup>

#### **Openbank** (Grupo Santander)

In February 2024, Spanish Grupo Santander's digital Openbank introduced AI-powered analytical models for price prediction of over 1,000 shares in Europe and the United States. The AI models help clients make more data-driven investment decisions.<sup>2</sup>

Sources: 1. Bloomberg; 2. Open Bank; Capgemini Research Institute for Financial Services analysis, 2024

# Bridging generation gaps

With younger entrepreneurs on the rise, wealth firms shape advice to resonate with HNWIs of all ages

#### **Background**

- The saving and investing style of millennials (born 1981 –1996) includes long-term horizons and interest in alternative assets.<sup>1</sup>
- A Cerulli Associates report found that +70% of next-generation family members are likely to switch advisors following wealth inheritance.<sup>2</sup> Yet, succession planning lags.
- HSBC estimates 64% of ultra-wealthy clients have not consulted family members about wealth succession.<sup>3</sup>
- Comprehensive succession planning and financial education for the next generation is crucial. A 20-year research project on 3,200 families by US-based wealth consultancy Williams Group revealed 70% of wealthy families lose their wealth by the second generation, and 90% by the third.<sup>4</sup>

#### **Impact**

- More wealth firms will engage with families in addition to individual HNW clients. Young and diverse advisor teams can strengthen personal connections with the next generation to align with their perspectives.
- Wealth firms can target emerging talent in fine arts, sports, and entertainment, offering financial advice as young professionals navigate non-traditional career paths. As their careers progress, these individuals may become high-value clients.
- By understanding the unique financial needs and preferences of young entrepreneurs, wealth firms position themselves as trusted advisors and partners, driving long-term growth.

Sources: 1. Nasdaq; 2. Investopedia; 3. Professional Wealth Management; 4. Professional Wealth Management; Cappemini Research Institute for Financial Services analysis, 2024

# Bridging generation gaps

With younger entrepreneurs on the rise, wealth firms shape advice to resonate with HNWIs of all ages

#### Figure 3: Firms that bridge the generational gap maximize HNWI value

Offer innovative financial education to help transform the next generation into business leaders and enhance total client mindshare.

**Discuss investments and mitigate potential conflicts** to help the next
generation pursue their preferences
while aligning with family values.

Cater to emerging talent across industries and tailor offerings to the unique needs of young professionals.

### **Morgan Stanley**

Morgan Stanley launched "Money in the Making" in 2023 to educate emerging sports and entertainment talent about wealth management. The program offers financial education, tools and resources to build and manage wealth as clients embark on personal and professional journeys.<sup>1</sup>

#### **Standard Chartered**

Standard Chartered partnered with international business school INSEAD to engage with next-gen HNWI clients from Singapore and other Asian markets. The **Young Entrepreneur Program** supports young investors with guidance from industry practitioners and academicians.<sup>2</sup>

Sources: 1. Morgan Stanley; 2. Standard Chartered; Capgemini Research Institute for Financial Services analysis, 2024

# Inorganic growth strategies

Wealth firms seek external expansion to broaden services and boost revenues

#### Background

- Client demand for sophisticated investment options has driven wealth management firms to make deals that expand their offerings including alternative investments like private market products.
- Inorganic growth includes external factors such as mergers, acquisitions, and partnerships.
- Interest rates peaked globally in 2023, making M&A deals cost prohibitive. Now, as **interest rates retract** worldwide, mergers and acquisitions are expected to regain momentum.
- In H1 2024, US-based Fidelity reported 105 registered investment advisor (RIA) mergers & acquisitions in the United States, totaling USD 399.3 billion in purchased assets.<sup>1</sup> Research firm Echelon Partners projected that the number of annual RIA M&As will reach 332 in 2024, up from 321 in 2023.<sup>2</sup>

#### **Impact**

- Conditions such as bankruptcy and the **desire to expand into alternative investments** is creating a persistent push for inorganic growth in the wealth management industry.
- Large wealth firms are focusing on new wealth hubs and international markets driven by demographic shifts and regulatory changes.
- We expect wealth management M&A activity to continue, with smaller firms consolidating and larger firms
  re-trading with private equity firms or merging to form mega-firms.

Sources: 1. Fidelity; 2. Echelon Partners; Capgemini Research Institute for Financial Services analysis, 2024

# Inorganic growth strategies

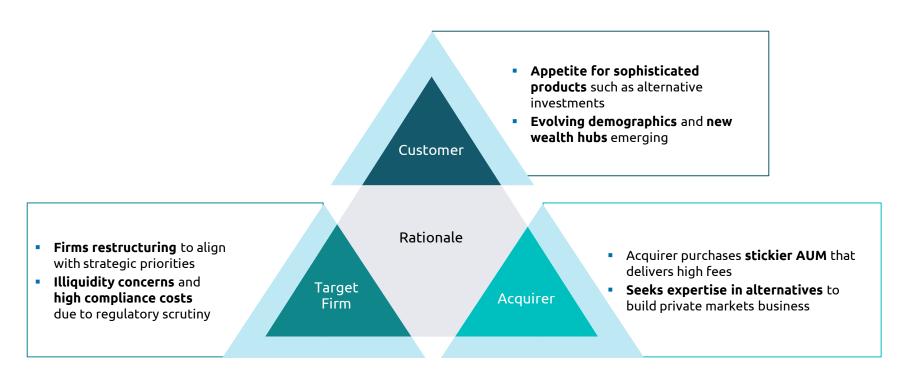

Wealth firms seek external expansion to broaden services and boost revenues

Figure 4: Reasons for the surge in inorganic growth

#### **BlackRock**

BlackRock announced the acquisition of Global Infrastructure Partners for USD 12.5 billion in January 2024, increasing its infrastructure assets to USD 150 billion amid high institutional demand for logistics and digital infrastructure.<sup>1</sup>

#### Indosuez Wealth Management

Indosuez Wealth Management, a subsidiary of French bank Crédit Agricole, has finalized its **acquisition of Belgian firm Degroof Petercam**. This merger creates a European leader

in wealth management, with around EUR 200 billion (~USD 216 billion) in assets and 4,500 employees.<sup>2</sup>

Sources: 1. Reuters; 2. CA Indosuez; Capqemini Research Institute for Financial Services analysis, 2024

# Regulations drive ESG traceability

Wealth firms implement ESG asset transparency metrics as regulators standardize sustainability reporting

#### **Background**

- Cappemini's Embrace data to accelerate sustainability report says financial services firms rank among the top 10 most fined industries for greenwashing. 1 Meanwhile, 58% of FS executives worry that environmental, social, and governance (ESG) initiatives may be publicly perceived as greenwashing.<sup>2</sup>
- The lack of transparency and comparability among multiple ESG-rating providers (MSCI, ISS, Sustainalytics, etc.) hinders investors' ability to accurately measure ESG outcomes.
- To eliminate data inconsistencies, regulators are pushing wealth firms to standardize ESG reporting, progressing toward asset traceability.

#### **Impact**

- Transparent data on sustainable investments will make portfolio performance monitoring and evaluation easier, boosting investor confidence.
- Consistent raw data (carbon emissions and temperature rise) classification methodology can simplify sustainability performance measurement – making it easier for investors to select suitable ESG assets and helping advisors explain how these investments are environmentally friendly.
- ESG metrics and standardized reporting empower financial services firms to transparently disclose their sustainability practices, which combats greenwashing and builds stakeholder trust.

Note: Traceability is the ability to track the origin, movement, and transformation of products, materials, and services throughout their entire lifecycle to ensure compliance with ESG standards.

Sources: 1. ESG Clarity; 2. Embrace data to accelerate sustainability; Cappemini Research Institute for Financial Services analysis, 2024

# Regulations drive ESG traceability

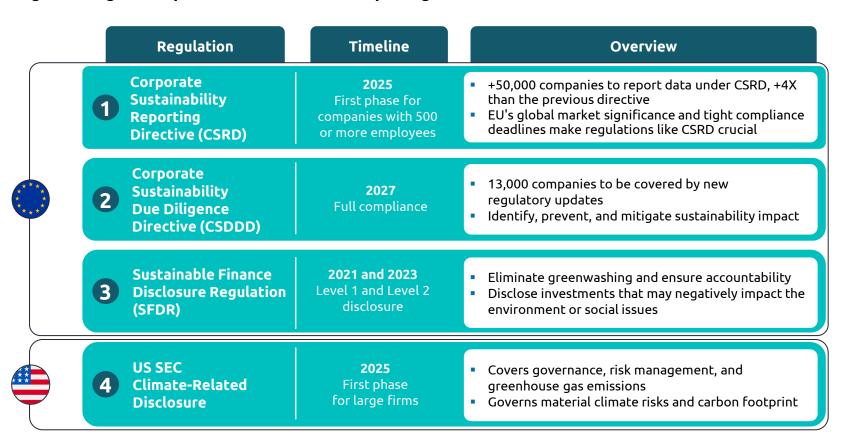

Wealth firms implement ESG asset transparency metrics as regulators standardize sustainability reporting

#### Figure 5: Regulators push to standardize ESG reporting

#### **State Street**

In addition to allocating nearly USD 366 billion for sustainability projects aligned with the UN's Sustainable Development Goals, US asset manager State Street complies with Global Reporting Initiatives through standardized ESG scoring and plans compliance with EU's CSRD. 1

#### **UBS**

In November 2023, UBS became the first major wealth firm to publish Swiss Climate Scores (SCS) reports, meeting Switzerland's transparency criteria for sustainable investments. Initially covering 60 equity and bond funds, the reports expanded to 136 funds by the end of 2023.<sup>2,3</sup>

Sources: 1. State Street; 2. Euromoney; 3. UBS Climate and Nature Report 2023; Capgemini Research Institute for Financial Services analysis, 2024

# Digital onboarding

Digital onboarding boosts revenue for wealth firms through white-labeling, while accelerating client acquisition and improving compliance

#### Background

- Increasing regulatory and compliance pressures are slowing down client onboarding. A 2024 Avalog survey found that 29% of wealth executives take three months or more to onboard ultra-wealthy clients.
- Non-compliance significantly impacts firms' profits. A Fenergo survey revealed a 31% increase in penalties on global financial institutions for anti-money laundering (AML) and know your customer (KYC) violations, rising from USD 201 million in H1 2023 to USD 263 million in H1 2024.<sup>2</sup>
- FinTechs with seamless client onboarding offer collaboration opportunities for incumbent wealth firms,
   enhancing the onboarding process and improving overall client experience.

#### **Impact**

- Intelligent automation in areas like risk profiling, document signing, and asset transfer enhances client
  acquisition efficiency. White-labeling digital onboarding solutions can increase revenue for wealth firms.
- Incorporating perpetual KYC solutions will automate periodic reviews by detecting changes in entity data, transactions, and AML screening, helping wealth firms reduce penalty risks and ease margin pressures.
- Streamline the end-to-end journey from prospecting to account opening through early data capture
  to drive personalized value propositions, fostering stronger client relationships from the beginning.
- Leveraging compliance and transaction data through adaptive models like Client Lifecycle Management solutions gives wealth firms a comprehensive view of client needs and expectations across life stages.

Sources: 1. <u>Private Banker International</u>; 2. <u>Fenergo;</u> Capgemini Research Institute for Financial Services analysis, 2024

# Digital onboarding

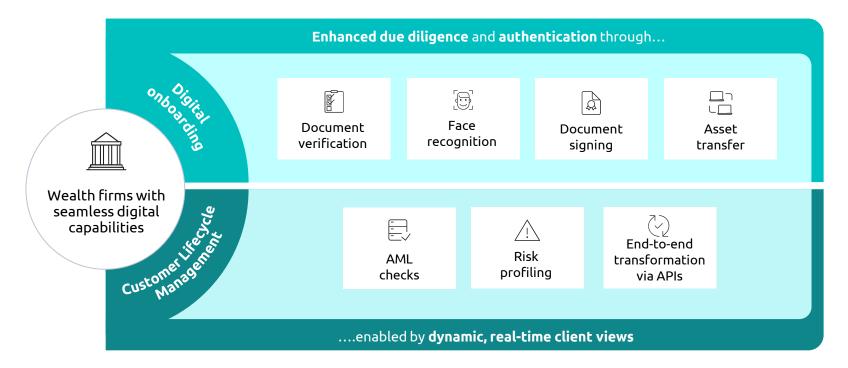

Digital onboarding boosts revenue for wealth firms through white-labeling, while accelerating client acquisition and improving compliance

Figure 6: Wealth firms with seamless digital capabilities ease onboarding and compliance

#### **Charles Schwab**

Charles Schwab introduced a **digital client onboarding solution** to advisory firms working with Schwab Advisor services in early 2024. The solution allows advisors to open and fund up to 10 new accounts in one *digital envelope*, streamlined within a **single digital workflow**.<sup>1</sup>

#### **Rathbones Group**

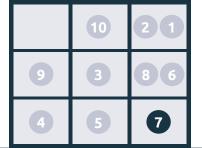

UK-based Rathbones Group implemented InvestCloud's Client Lifecycle Management platform, a scalable solution that **centralizes lead management and enhances onboarding and servicing capabilities**, giving Rathbones' teams more time to focus on client-facing activities.<sup>2</sup>

Sources: 1. AdvisorEngine; 2. FinTechFutures; Capgemini Research Institute for Financial Services analysis, 2024

# Unified operating models

Wealth firms unify operating models to deliver a consistent experience for HNWIs across geographies

#### Background

- Economic uncertainty and geopolitical tension are slowing asset growth, pressurizing wealth management firm margins and forcing re-evaluation of operating models.
- Our 2024 World Wealth Report indicates a significant fragmentation of wealth management relationships among HNWIs, with the average number of providers rising from three in 2020 to seven in 2023.<sup>1</sup>
- By streamlining operating models, wealth firms can enhance operational efficiency, unlock synergies
  across business units, and improve scalability to accommodate future growth. Increased agility enables
  faster response to evolving market dynamics and client needs. Additionally, investing in advanced
  technologies can strengthen client relationships and maximize assets under management (AUM).

#### **Impact**

- Unified operating models and streamlined processes enable wealth firms to focus on core competencies and explore innovative digital solutions, such as robo-advisory models, to provide personalized and efficient services.
- By streamlining operations, wealth firms can tailor services according to regional trends which paves the
  way to bridge the gap between clients across wealth bands and geographies.
- With a customer-centric global operating model, interactions can be simplified so clients can access the suite
  of services internationally through a single, unified touchpoint.

Sources: 1. Capgemini World Wealth Report 2024; Capgemini Research Institute for Financial Services analysis, 2024

# Unified operating models

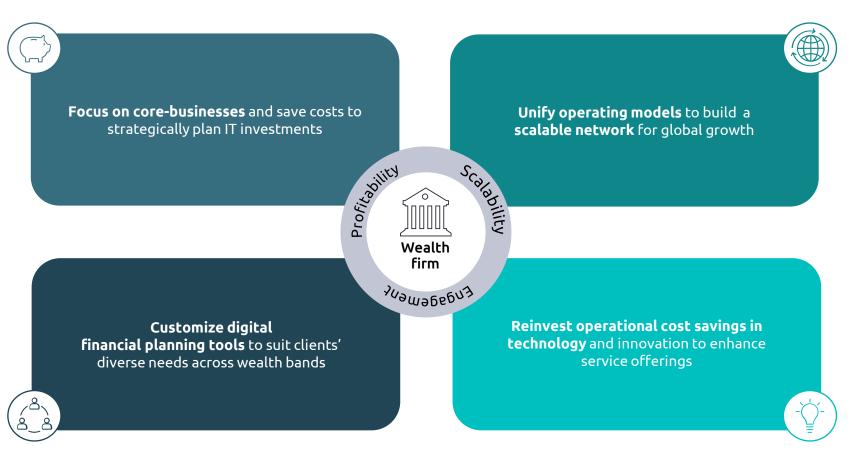

Wealth firms unify operating models to deliver a consistent experience for HNWIs across geographies

Figure 7: How can unifying operating models help wealth firms?

#### Citi

In September 2023, Citi restructured to simplify its organization. The new, flatter model eliminates regional layers and consolidates global management. The wealth management head now reports directly to the CEO, enhancing focus and accountability.<sup>1</sup>

#### Santander

Santander reorganized operations into five global businesses, including wealth management. **Operational efficiencies** achieved through **tech upgrades** saved the bank USD 83.6 million in Q2 2024. Santander initiated a global investments platform project to **digitalize investment distribution capabilities**.<sup>234</sup>

Sources: 1. Bank Automation News; 2. Bank Automation News; 3. Santander; 4. Santander; Cappemini Research Institute for Financial Services analysis, 2024

# Gen AI for relationship manager efficiency

Gen AI-powered copilots can boost relationship manager productivity

#### **Background**

- An IDC report said the banking industry would invest USD 31.3 billion in AI in 2024. Investment priorities include enhancing efficiency and productivity with virtual assistants, automating routine tasks, and providing advanced fraud detection and risk management tools.<sup>1</sup>
- Capgemini's World Wealth Report 2024 found that wealth management executives ranked manual process automation to boost employee efficiency as how AI will make the largest impact.<sup>2</sup>
- Generative AI (Gen AI) copilots assist relationship managers (RMs) but requires careful output review, underscoring the need to train and educate staff to effectively leverage artificial intelligence tools.

#### **Impact**

- Gen AI copilots will automate repetitive, time-consuming tasks like drafting emails, conducting regulatory and market research, and summarizing reports or transcripts.
- As repetitive tasks are automated, relationship managers can use the time saved for more meaningful client interactions. This enables focus on networking, building personal relationships, and fostering deeper connections.
- With AI copilots taking care of manual processes such as transcription, scanning policy documents, and even suggesting potential offers or solutions, client conversations with advisors will be more efficient.

Sources: 1. IDC; 2. Capgemini World Wealth Report 2024; Capgemini Research Institute for Financial Services analysis, 2024

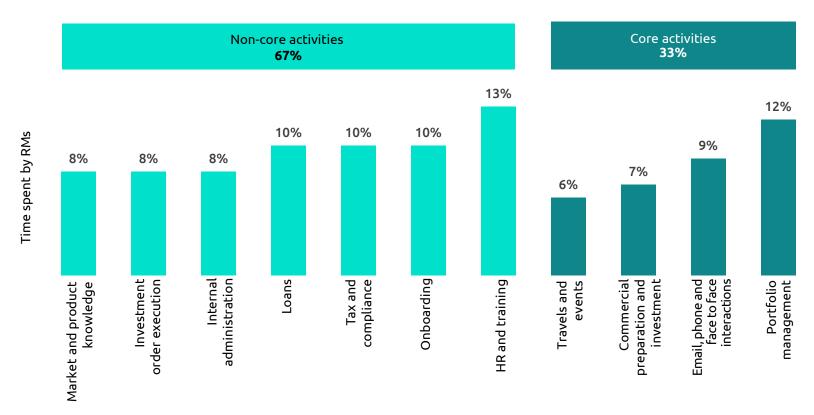

# Gen AI for relationship manager efficiency

Gen AI-powered copilots can boost relationship manager productivity

Figure 8: GenAI-powered copilots can free relationship managers from non-core activities

#### Morgan Stanley

In mid 2024, Morgan Stanley launched *Debrief*, a GenAI tool designed to **summarize meetings and draft emails**, to potentially save advisors 500,000 hours annually.<sup>1, 2</sup>

#### **HSBC**

HSBC automated decision-making for front-line agents in 2024 with Quantexa's Q Assist—a GenAI suite for contextual analysis. The bank also initiated AI pilots to streamline operations and boost efficiency, including summarizing reports for advisors.<sup>3, 4</sup>

## Real-world asset tokenization

Real-world asset tokens powered by robust blockchain networks improve liquidity and access

#### Background

- Blockchain adoption in financial markets has evolved from data privacy to creating a robust infrastructure for converting real-world assets (RWA) into digital tokens.
- The value of RWA tokens is expected to reach USD 10.9 trillion by 2030, with real estate, debt, and
  investment funds leading the way according to consulting firm Roland Berger.<sup>1</sup>
- With a clear regulatory framework and risk-management practices, blockchain infrastructure is poised to mature further. Cross-chain interoperability will pave the way for achieving mainstream adoption.

#### **Impact**

- Tokenization enables faster liquidity for owners of RWA like real estate and improves market accessibility
  by allowing investors to own fractional shares of high-value assets.
- Blockchain networks streamline the exchanging process of RWA tokens allowing 24/7 trading with improved security of valuable assets and reduced transaction costs.
- RWA tokenization will affect asset classes unevenly. Assets with large market sizes and fewer regulatory
  hurdles are likely to be adopted first. Less liquid assets or those with inefficient market processes will gain
  significant advantages from tokenization.

Notes: Real-world asset tokens are digital representations of real-world assets traded on blockchains.

Interoperable blockchain networks are digital structures that allow different trading networks to communicate and exchange data.

Sources: 1.Roland Berger; Capgemini Research Institute for Financial Services analysis, 2024

## Real-world asset tokenization

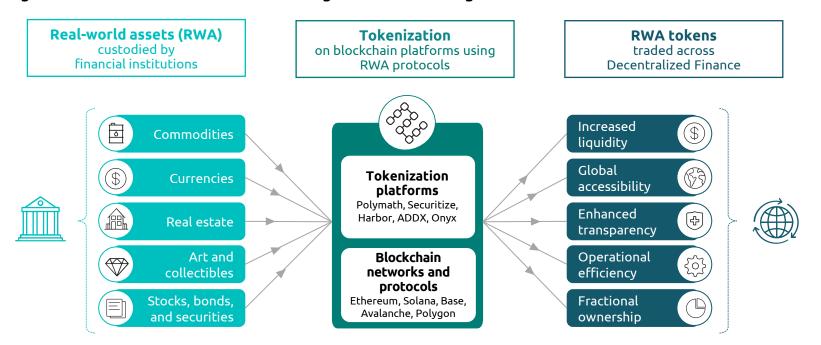

Real-world asset tokens powered by robust blockchain networks improve liquidity and access

#### Figure 9: RWA tokenization converts a range of assets into digital tokens on a blockchain

Notes: **Tokenization platforms** are the front-end user interfaces of digital asset ecosystems that enable interacting with tokens. **Blockchain networks and protocols** are back-end infrastructure that power token creation and management.

Source: 1. CoinDesk; 2. Deutsche Bank; Capgemini Research Institute for Financial Services analysis, 2024

#### J.P. Morgan

In June 2024, J.P. Morgan's Onyx
Digital Assets blockchain helped
Fidelity International in tokenizing
shares of a money market fund, to
enhance efficiency and reduce
transaction costs. J.P. Morgan plans to
expand tokenization across various
asset classes including equities and
fixed income.<sup>1</sup>

#### **Deutsche Bank**

Deutsche Bank joined the Monetary Authority of Singapore's **Project Guardian** in May 2024. The initiative tests an **interoperable blockchain platform for tokenized and digital funds**. The bank will collaborate to develop protocol standards and best practices in digital asset servicing.<sup>2</sup>

# Cloud-native wealth management platforms

Cloud-native platforms scale workflows and enable cost-efficient wealth management processes

#### **Background**

- Enterprises worldwide are adopting cloud solutions to implement artificial intelligence strategies. Al
  models process large datasets for accuracy, which can be effectively managed and administered through
  scalable cloud platforms.
- Capgemini's 2024 and 2025 World Cloud Reports Financial Services found that 91% of financial services organizations had initiated cloud migration, but only 11% had implemented highly-scalable cloud platforms.<sup>1,2</sup>
- Cloud-native platforms **accelerate data integration**, enabling advisors and clients to leverage advanced data analytics more effectively.

#### **Impact**

- Cloud-native solutions enable wealth firms to view and manage assets across various custodial platforms, enabling seamless data integration and streamlined workflows.
- Cloud-native platforms are designed with modular offerings, providing flexibility for wealth firms to
  expand use cases in line with their API strategy. The rapid development cycles of "cloud-native" versus "
  cloud-enabled" platforms, enable faster adaptation to evolving market conditions and client needs.
- As clients and markets change, cloud-native platforms can be scaled up or down to accommodate data volumes. And the pay-as-you-go nature of cloud-native platforms enables cost-efficiency.

Sources: 1. World Cloud Report 2024; 2. World Cloud Report – Financial Services 2025; Capgemini Research Institute for Financial Services analysis, 2024

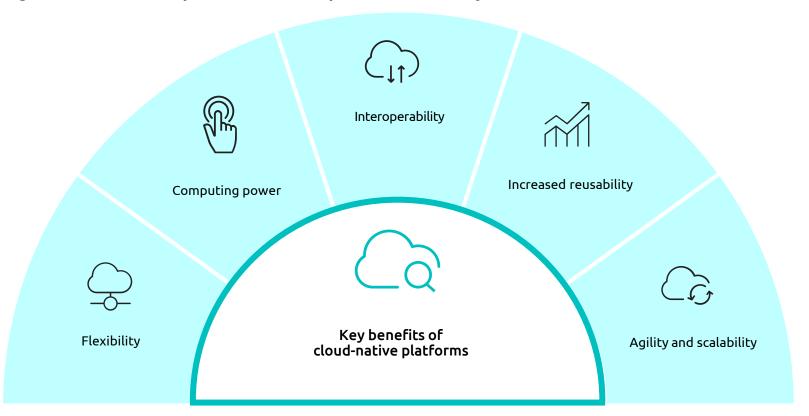

# Cloud-native wealth management platforms

Cloud-native platforms scale workflows and enable cost-efficient wealth management processes

#### **BNY Mellon**

BNY Mellon launched a cloud-data platform, "Wove Data" in 2024 to complement its portfolio wealth management platform, "Wove". The cloud platform helps wealth executives manage large, multi-custody data and gain insight into BNY Mellon investment products, advisor teams, and operations.<sup>1</sup>

#### **Swedbank Robur**

Swedbank Robur used a SaaS solution from Copenhagen-based **SimCorp** to migrate from an on-premise to cloud-based investment management platform. The 2024 move enhances operational efficiency and scalability of front-to-back capabilities such as simplifying investment strategy changes and new fund launches.<sup>2</sup>

Sources: 1. BNY Mellon; 2. Simcorp; Capgemini Research Institute for Financial Services analysis, 2024

# Partner with Capgemini

Financial services firms seek alternatives to costly and complex technology transformations to stay competitive by increasing agility and reducing time-to-market.

We offer modular, plug-and-play solutions using microservices, APIs, blockchain, and quantum technologies. This approach, paired with enhanced customer journeys, delivers business value incrementally, rather than requiring long implementation timelines before realizing benefits.

#### **Enhanced Digital Wealth Experiences**

Capgemini empowers banks and wealth management firms to deliver unified, seamless digital experiences for both clients and advisors. How?

- We design and implement streamlined client journeys that seamlessly integrate critical touchpoints between advisors and clients.
- Our omnichannel tools allow investors to initiate and continue their financial activities from any preferred channel (e.g., web, mobile, in-person).
- We provide robust digital document and esignature solutions to reduce manual paperwork and accelerate transaction processing.

# Intelligent Advisor and Augmented RM

High-net-worth clients demand personalized solutions and seamless engagement.

With years of designing powerful human experiences and drawing from lessons learned, Capgemini's Intelligent Advisor and Augmented Relationship Manager (RM) solution enables personalized interactions based on a 360-degree view of clients.

#### Wealth Ecosystem

Siloed systems and data inconsistency are a challenge for wealth management firms.

In partnership with select FinTechs, Capgemini developed a fully modular and composable end-to-end, full-service wealth stack to help wealth management firms build differentiated capabilities without impacting their core systems.

The wealth stack can be operated on-premises or on cloud and is compatible with all major hyperscalers. Clients have the option to outsource IT and operations on cloud.

# Ask the experts

Gareth Wilson
Global Head of Banking and
Capital Markets Practice
gareth.wilson@capgemini.com
With over 30 year of experience,
Gareth is an expert with a proven track

The Capgemini Research Institute for Financial Services is the in-house think tank focused on digital, innovation, and technology issues impacting banks, wealth management firms, payments players and insurers. The Institute annually publishes its signature Financial Services World Reports series that draw on voice of the customer surveys, CxO interviews, and partnerships with technology companies as well as academia to uncover emerging trends and explore how AI, cloud, data, and digitalization are driving transformative business outcomes. Supported by time-series global datasets, our industry experts offer actionable insights, trend analyses, and innovative solutions to address the dynamic challenges of financial institutions in a fast-changing global economy.
