

Capgemini and HP Inc.

Print-as-a-Service

Business Challenge:

Security. Service. Cost.
Improve service levels, lower costs and securely manage devices, data and documents in a network without boundaries.

Response to the challenge:

HP Managed Print Services rated #1 in customer satisfaction¹. Hardware, security, services, and expertise that can streamline and safeguard document workflows to help reduce costs and improve productivity.

Capgemini and HP Inc.

Contact Capgemini today for your network security, TCO and application usage assessment including Penetration testing and vulnerability scans.

Print-as-a-Service

- Immediate savings of up to 30% on annual print cost² with HP's comprehensive suite of hardware, software, tools and printer expertise
- Protect your data and network with industry leading security, compliance reporting, proactive support (Secure MPS) and secure automation
- Enable employees to securely work and print virtually anywhere from any device
- Keep the fleet up and running with automated monitoring and predictive management tools and business intelligence analytics that provide greater transparency and consistent global delivery
- Ability to "Manage as-is" incorporating your current equipment into a Managed Print Solution, including transition management
- Option to provide "One Contract" to implement one global solution
- Environmentally-friendly gamification options to create buy-in from users to print fewer pages, less often
- Packaged workflows (Pega, Guideware, etc.), multi-vendor, and industry specific document workflows
- Tier 1 support
- C-level strategic reviews
- Regulated industries? We can help mitigate risks by automating compliance requirements in regulated, print-heavy industries.
