Capgemini Offers Customized and Flexible Service Offering

Each Solution is Designed, Built and Operated based on Each Customer's Individual Needs

04 Iterate to continuously sharpen delivery focus and increase quality

01 Assess Customer's need and business objectives

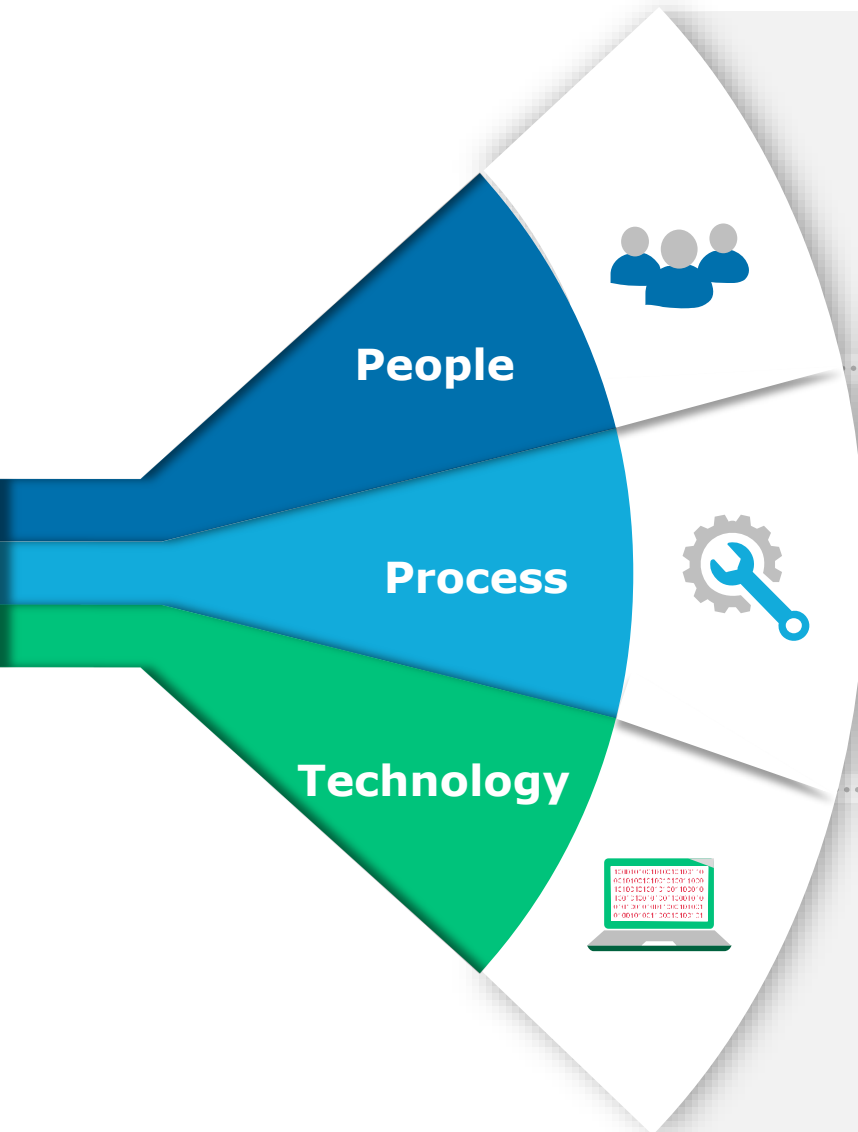

02 Choose right solution and plan its execution. Define operating model for the assignment

03 Execute chosen solution using the desired combination of:

- Onshore vs offshore delivery capabilities
- Customer, Capgemini or industry standard tooling

Service Offerings are Focused around Three Key Dimensions

Teams of experts, with flexible combination of onshore and offshore placement

Efficient delivery methodologies adapted to the specific customer needs

We provide state of the art tooling as part of our services, or reuse customer's existing assets, on a case by case basis

Three Service Offerings with Several Service Options

Service Offerings and Options can be mixed and matched together to fulfil individual customer needs

DevOps as a Service

- Assessment of as-is delivery structure and pipeline
- Planning of to-be DevOps pipeline
- Implementation of DevOps operating model
- Running DevOps pipelines: pipeline as a service
- Automated metrics and KPI collection
- Release automation and orchestration

Cloud Delivery as a Service

- Cloud solution concepting
- Cloud solution design
- Cloud solution implementation
- Cloud Native Application Development
- Cloud application transition to cloud
- Infrastructure as a code services
- Cloud applications "run/operate" services

Project Execution as a Service

- System Development Life Cycle (SDLC) assessment
- SDLC process creation
- Release Management services
- Cutover and transition management services
- Agile/SAFe delivery services

**Services are provided through individual experts, or through project teams.
It is naturally possible to help customers just with resource augmentation to fill their gaps in staffing**

Capgemini Group Partner Network Enables Flexible Delivery Options

Capgemini offers onshore and offshore possibilities for both build and run services

Our delivery partner, Sogeti, has a strong expertise in provision on Cloud and DevOps services from offshore locations throughout the entire project delivery lifecycle

We can conjoin on site experts from our team of cloud, DevOps and execution delivery specialists with Sogeti delivery capabilities to offer the best combination of services at right pricing level personalized to the needs of the customer

About Capgemini

Capgemini is a global leader in partnering with companies to transform and manage their business by harnessing the power of technology. The Group is guided everyday by its purpose of unleashing human energy through technology for an inclusive and sustainable future. It is a responsible and diverse organization of 270,000 team members in nearly 50 countries. With its strong 50 year heritage and deep industry expertise, Capgemini is trusted by its clients to address the entire breadth of their business needs, from strategy and design to operations, fuelled by the fast evolving and innovative world of cloud, data, AI, connectivity, software, digital engineering and platforms. The Group reported in 2020 global revenues of €16 billion.
