

# Oracle Cloud Readiness Assessment

The Oracle Cloud footprint is growing rapidly across Software-as-a-service (SaaS), Platform-as-a-service (PaaS) and Infrastructure-as-a-service (IaaS) solutions. Each of these solutions can be adopted and adapted in multiple ways by businesses to meet their current and future business needs. The choices are many and when combined with business requirements around social, mobile and analytics within the boundaries of data security, scalability and accessibility, a complex matrix of options seems to take shape comprising of multiple decision points each with its own set of advantages.

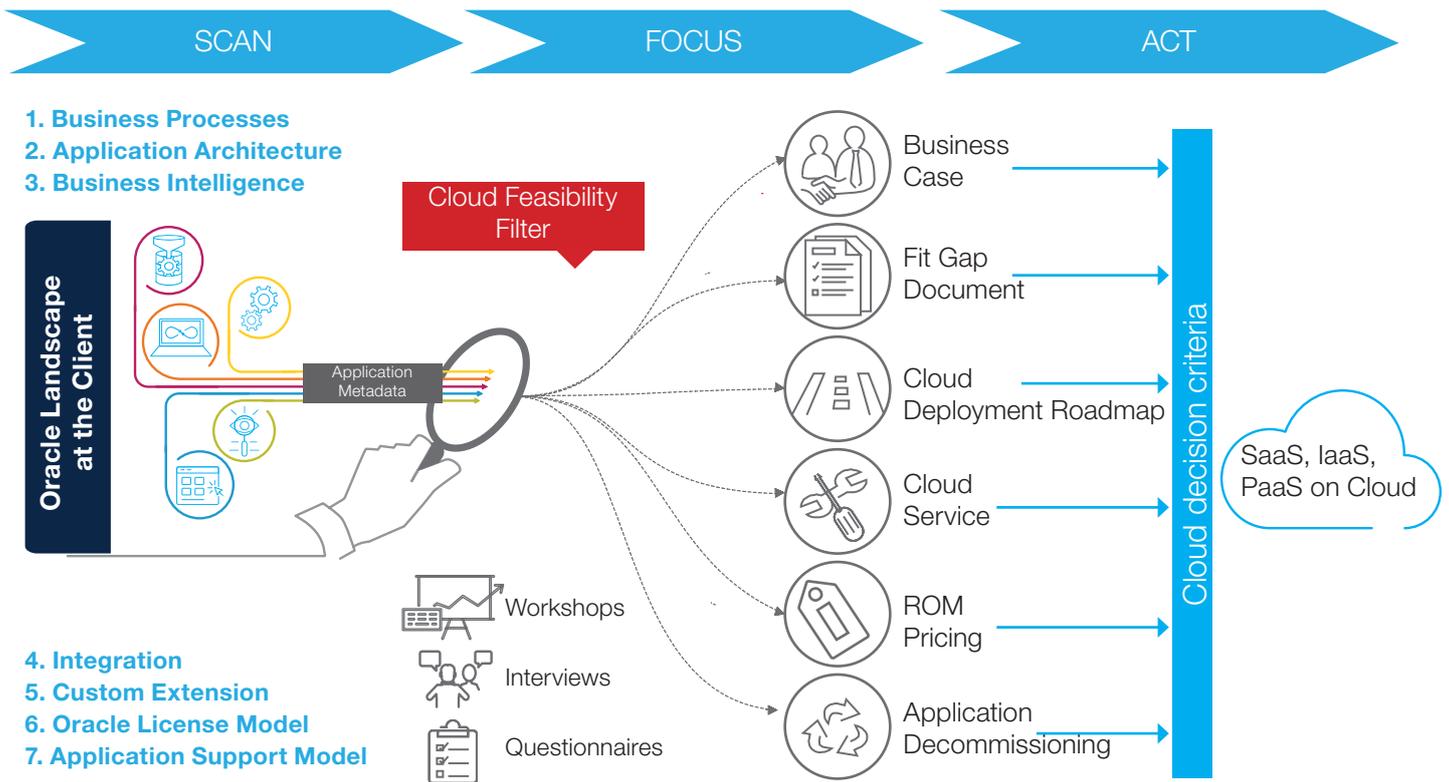

With this increase in solution options and benefits that can be derived from Oracle Cloud, we need to identify an efficient way to deploy these solutions. We need to answer challenging questions like, “How can I maximise the benefits for this solution”, “How should I deploy these services”, “What impacts will this have on my current operations” and “Am I ready to start this journey”. We need to understand business imperatives, core requirements, security considerations and operating models to be able to define the solution, the roadmap for deployment and benefits realisation plans.

To make the right fact-based decisions to adopt Oracle Cloud Services requires expertise and experience of a proven Oracle partner. Capgemini has developed, our very own “Cloud Readiness Assessment” Methodology which leverages our experience in delivering benefits focused solutions across multi-cloud deployments. Our Cloud Readiness Assessment offers a highly collaborative fact-based analysis to produce three powerful deliverables – Business Design, Cloud Strategy and Deployment Roadmap to reduce decision risk in adopting Oracle Cloud Services.

The Capgemini Oracle Cloud Readiness Assessment leverages pre-built tools and accelerators such as ROI calculators, and deployment models as well as our experience in delivering cloud, to focus on a low risk, high return business case for migrating to Oracle Cloud.

## Our approach is based on three key phases-Scan, Focus, Act.

- **Scan :-** This phase provides us with an understanding of the current business, processes, IT landscape and operating model and using our workshop based approach, we can quickly identify the change areas and concerns to be addressed.
- **Focus :-** In this phase, we concentrate on the business areas and operating models and their challenges, to define a Cloud-based solution or set of services and the impacts of deploying these.
- **Act :-** This phase takes the outputs from the analysis and we work with you to define the solution, deployment roadmap, change impacts and create a high level cost / benefit view that can be taken forward as a business case.

The outputs from the focus areas are combined into three powerful deliverables that provide the business case to jump-start your journey to the Oracle Cloud. These outputs are summarised below:-

Business Design	Cloud Strategy	Deployment Roadmap
Demonstrates our understanding of the business and financial value of the transformation	Determining options and viability of the different Oracle Cloud adoption options – SaaS, PaaS and IaaS	Definition of a Roadmap based on the solution required and options available
High Level Business Requirements and Challenges	Business Intelligence Strategy	Proposed Implementation and Resource Plan
High Level Fit Gap Analysis	Data Migration Strategy	Risk Matrix
Security Requirements and Assessment	Integration Strategy	Change Impact and Operating Model analysis
End State Architecture	Draft Environment Plan	Rough Order Of Magnitude (ROM) Pricing (incl. software pricing)

Our focus on business and solution design as well as current and strategic needs means Capgemini deliver a roadmap and approach not just for the immediate solution, but also to provide a platform that can deliver continuous improvement going forwards. This approach can be tailored to meet the needs of your business and can be focused in on specific areas as required. Our experience as a Cloud Premier and Oracle Diamond partner means we can leverage our specialist global team knowledge and combined with our Oracle relationships to ensure we define the optimum roadmap and business case to move you forward.

## Why Capgemini Oracle Cloud Readiness Assessment?

A **Cloud Premier Diamond Partner** delivering Oracle solutions for over 20 years.

Authorised Oracle **Managed Services Provider (MSP) Partner**

Leading industry analyst at, Forrester positions  
**Capgemini as a leader in the next-gen Oracle Applications projects**

Proven examples of completed cloud assessments :-  
**Successful completion of many Oracle Cloud Implementation & Migration projects.**

Over **14,800 Oracle trained** resources including **7,000+** Oracle certified consultants ; **37 basic** and **16 advanced** specializations

**15+ Oracle approved solutions** globally; **20+ demo centers** and **15+ CoEs worldwide**

**5,000+** successful implementations of Oracle applications across all industry sector

**To assess your readiness for adopting Oracle Cloud Services, please contact:**
