

# Agility Unlimited: SAP HANA Proof of Concept in 24 Hours

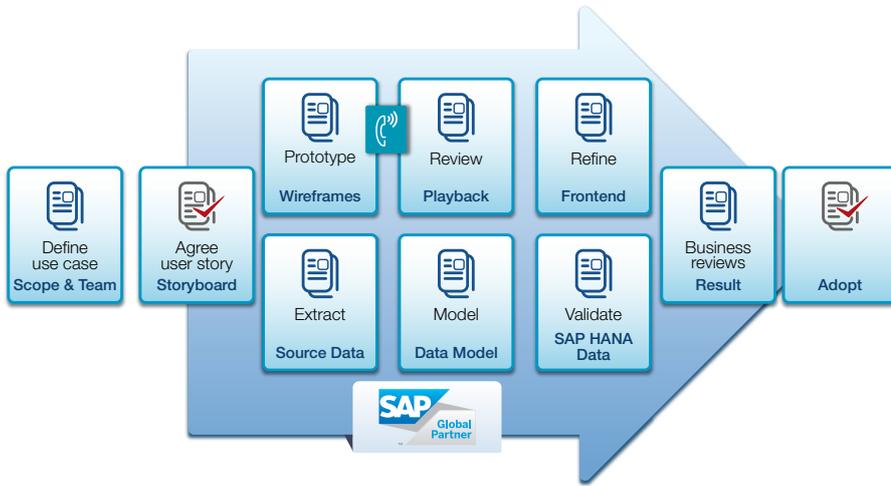

## Find out how 24 hours can change your business forever

SAP HANA's unprecedented speed offers businesses an incredible opportunity to increase **agility** and jumpstart **innovation**.

But seeing is believing.

Capgemini offers you the chance to find out for yourself, with your data, in just 24 hours by offering a proof of concept based in the Cloud.

Capgemini's 24 Hours for SAP HANA delivers insights into what HANA can do for your data and for your report development process.

## How it works

We work together to identify an urgent business need that we can address. This is captured in a user story. We will then do the following in 24 hours:

- Define and refine the output using Capgemini's famed Rapid Design and Visualization (RDV) techniques
- Develop a SAP HANA model
- Load the required source data
- Develop the required information models
- Test and validate the solution
- Play back the solution

If you like what you see after 24 hours, the choice is up to you. You can continue to use SAP HANA hosted in the Cloud and benefit from some of the most trusted Cloud services in the industry or you can use it as an intermediate solution until you roll out SAP HANA on-premise.
