

COMPLETE – Capgemini’s Cloud Abstraction and Aggregation Business Platform

Now, you can get the flexibility and pricing advantages of a cloud environment, while still keeping full control of your environment.

What is COMPLETE?

COMPLETE – Capgemini Orchestration Management PLatform End to End is an enterprise ready framework and intelligent platform that integrates and supports applications in the Cloud. Leveraging the power of Amazon Web Services, Virtustream, and/or Microsoft Azure COMPLETE “abstracts” the complexity of multiple Cloud and non-Cloud infrastructures and presents to the enterprise the same look and feel as if the application’s ecosystem is running in their datacenter.

This premiere, cost-effective solution lets you run multiple applications in a consolidated platform. Preloaded and integrated, supporting almost all operating systems and applications, COMPLETE offers maximum flexibility including the ability to expand and contract, leveraging its Cloud abstraction and aggregation abilities. This allow you to take full advantage of the most powerful aspect of cloud computing, the consumption based model, while maintaining the same look and feel to your application as if it was running in your own data center.

People matter, results count.

Why not enjoy all the advantages of a virtual private cloud?

With COMPLETE you can achieve the business benefits you need for optimal performance:

- Speed to value: with on-demand capacity, you can adapt and scale IT processing in response to market-driven changes and evolving business needs. Spin up application environments in minutes, not weeks.
- Business agility: as you gain the power to match service level agreements to business value, you'll reduce procurement lead times and free up resources to innovate and respond to changing competitive conditions.
- Costs reduction: you'll be able to leverage and allocate enterprise assets for operational efficiencies; what you pay depends on service-level requirements and actual usage.
- Reliability and privacy: with an available and resilient infrastructure, you can "right size" service provisioning, balancing dedicated and shared options in a 24x7 operating environment. Size for minimum not maximum. Scale up or down as needed.
- Single integrated experience: running multiple applications in a consolidated platform, COMPLETE optimizes your applications, giving users a common "look and feel" that supports collaboration and productivity.

Perhaps best of all, because Capgemini is efficient and effective in our own methods — able to leverage our own "quick start" methodologies and tools — you're assured of high quality and a rapid return on investment.

What's inside COMPLETE?

- COMPLETE is an end-to-end solution, available 24x7: hardware (servers), storage; network; security and compliance; and management support services (for platform/virtualization, non-production and production development, training, and disaster recovery, and resource bursting).
- COMPLETE is built on a flexible infrastructure, giving your business the ability to adapt or scale IT service delivery based on changing, market-driven needs.
- COMPLETE is architected with an abstraction layer sitting on top of multiple topologies that allow for service level management, governance, metering and monitoring, billing, reporting and capacity planning. Your subscription reflects your unique service-level requirements and actual usage.
- COMPLETE topologies are built on a "virtual private" infrastructure by partnering with Amazon Web Services, Microsoft Azure or Virtustream. The platform service includes the architectural design, implementation and management of the solution leveraging application.

Capgemini is your best choice, for all the right reasons.

To build your virtual private cloud, we begin with a "decision matrix" that relies on your unique business opportunities to guide the solution's design, migration, and integration. Then, working in a truly collaborative relationship, we'll help you:

- Plan and execute a "journey to the cloud" with out-of-the-box cost savings
- Leverage our internal knowledge to build reusable templates for rapid deployment
- Imagine a services catalog containing your SAP environment
- Realize the benefits of cloud computing within the right environment
- Migrate any and all computing resources to the cloud model at your own pace
- Achieve a "one stop shopping" experience for the purchase, installation, configuration, and support of a cloud

With Capgemini, you get a cloud solution that's simple, reliable, and complete — everything you're looking for, from a single service provider.

About Capgemini

With almost 145,000 people in over 40 countries, Capgemini is one of the world's foremost providers of consulting, technology and outsourcing services. The Group reported 2014 global revenues of EUR 10.573 billion (almost \$12.8 billion USD).

Together with its clients, Capgemini creates and delivers business and technology solutions that fit their needs and drive the results they want.

A deeply multicultural organization, Capgemini has developed its own way of working, the Collaborative Business Experience™, and draws on Rightshore®, its worldwide delivery model.
