

The problem isn't the programme, it's the delivery model itself. Let's reinvent it.

Leaders are under pressure to deliver larger, more complex programmes with greater confidence. Yet value is often lost long before construction begins, then compounds through design, delivery, handover and operations.

Ask yourself...

- 1 Are you using digital to change how construction programmes are delivered, or simply digitising yesterday's model?
- 2 What percentage of programme decisions are based on predictive indicators versus lagging KPIs that tell you what has already gone wrong?
- 3 If you asked for the current cost, schedule, risk, and productivity position today, how much of the answer would come from real-time data versus manually produced reports?
- 4 If your most experienced resources left tomorrow, how much critical programme knowledge would be captured in systems versus remaining in people's heads?
- 5 Are your partners delivering one programme, or just optimising their own part of it?

You won't solve this by scaling traditional delivery models or simply adding more people. The entire model needs to change.

Capgemini Enterprise Capital Performance

Deliver better programme outcomes.

Capgemini brings deep engineering, technology, delivery transformation and data-driven performance expertise together to help capital programmes operate as one. We connect decisions across the delivery ecosystem, build digital capability into the model and focus partners on shared programme outcomes.

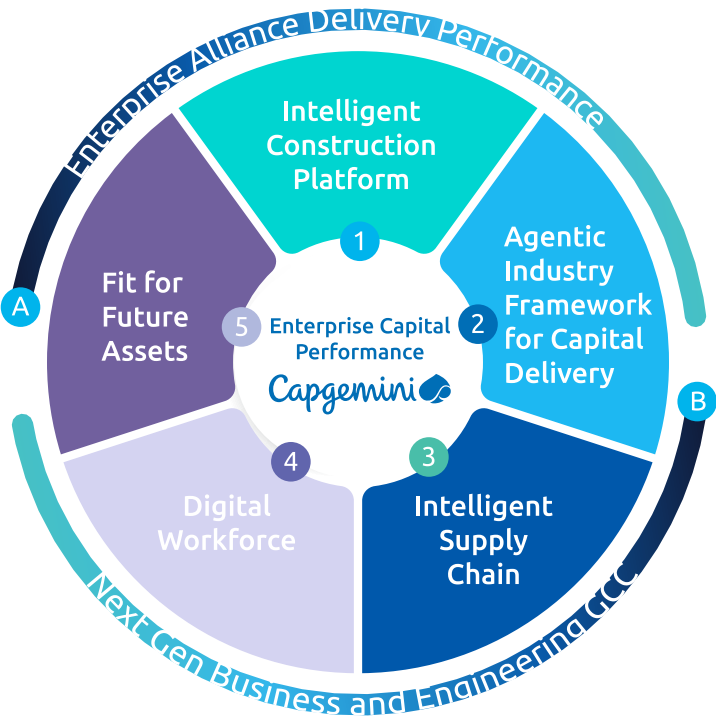

Two delivery models

A. Enterprise Alliance Delivery Performance
An embedded performance partner working across the delivery ecosystem to align partners (not replace them) and improve programme-wide performance.

B. Next Gen Business and Engineering Global Construction Capability
A scalable, AI first digitally enabled model that increases delivery capacity, reduces cost and delivers a step change in engineering productivity performance.

Five connected performance themes

1. Intelligent Construction Platform
The integrated delivery environment for capital programmes, a connected digital experience unifying data, systems and AI.

2. Agentic Industry Framework for Capital Delivery
A fully agentic value chain that aligns business value, agentic workflows, agent configurations, and industry specific outcomes.

3. Intelligent Supply Chain
An integrated end-to-end supply chain that improves flow, reduces disruption and protects delivery commitments.

4. Digital Workforce
An AI-enabled, digitally equipped workforce driving productivity and scaling delivery capability.

5. Fit for Future Assets
Assets designed with the end in mind, exploiting physical and digital convergence to optimise efficient, data-driven operations from day one.

Why partner with Capgemini?

Turn capital investment into predictable performance.

A new kind of delivery partner

We go beyond traditional engineering and advisory models, bringing integrated digital, delivery and transformation capabilities to reshape how programmes perform.

AI & technology at scale

We bring unmatched AI and digital capability into capital delivery, with global reach and partnerships at the cutting edge of AI and technology platforms.

Global scale, cross-sector advantage

We apply proven approaches from across geographies and industries, bringing global scale and cross-sector insight to accelerate performance.

Deep sector & delivery expertise

We combine leadership with hands-on experience delivering complex capital programmes at scale – bridging strategy, engineering and execution.

EXPLORE OUR ENTERPRISE CAPITAL PERFORMANCE OFFERING

Our Enterprise Capital Performance offering connects engineering and technology, delivery transformation and data-driven performance to strengthen delivery certainty, accelerate performance and unlock greater value.

Make capital performance real

Connecting the people, data and decisions that drive real value from major capital programmes.

About Capgemini

Capgemini is the business transformation partner for enterprises in the age of AI. We help organisations imagine and build an intelligent, sustainable future, combining AI, technology and human ingenuity to transform how they operate, innovate and grow. With unique end-to-end capabilities spanning strategy, technology, engineering and intelligent operations, we bring together deep industry expertise and market-leading capabilities in AI, cloud and data to turn ambition into measurable business outcomes at scale. Supported by a robust ecosystem of partners and nearly 60 years of expertise, Capgemini is a responsible and diverse global organization of over 410,000 team members in more than 50 countries. The Group reported 2025 revenues of €22.5 billion.
