Capgemini Signs An Extensive Infrastructure Outsourcing Agreement With Kadaster¹ In The Netherlands

Paris, Utrecht, 17 July 2013 – Capgemini, one of the world’s foremost providers of consulting, technology and outsourcing services, today announced that its Dutch subsidiary, Capgemini Nederland B.V. has signed an infrastructure outsourcing agreement with Kadaster, the Netherlands’ Cadastre, Land Registry and Mapping Agency. The agreement includes the outsourcing of Kadaster’s workplace services, office automation, and datacenter services to Capgemini. The contract has an estimated value of 100 million Euros over a 6-year period. The contract includes two options for a two-year extension.

Kadaster wants to outsource the management of its generic infrastructure components to a service provider whose core competencies include infrastructure services. Kadaster expects to be able to better guarantee the continuity of its own service delivery. Moreover, outsourcing enables Kadaster to increase its innovative powers by making use of the expertise of Capgemini, where technology is at the heart of business.

Both parties have agreed that specific employees of Kadaster’s own data center can transfer to Capgemini on a voluntary basis. The agreements that have been closed with the unions and the Workers Council are part of the contract.

Dorine Burmanje, CEO Kadaster said: *“After a careful preliminary phase, we have succeeded, together with trade unions, Works Council and Capgemini, in building a solid foundation for outsourcing our infrastructure services and providing a sound perspective for all staff involved. We have full confidence in an excellent partnership with Capgemini for the future.”*

Patrick Nicolet, Infrastructure Services CEO and member of the executive committee at Capgemini: *“This major contract demonstrates the depth and differentiation of Capgemini’s Infrastructure capabilities in the Netherlands. We look forward to delivering quality services which should drive innovation and efficiency for Kadaster. Kadaster is clearly a significant customer for us and it’s great to see that view reciprocated through this signing.”*

¹ Includes :

- Cadastre : a comprehensive register of the dimensions and locations of the land of a country. It includes details of the ownership, the tenure, the precise location, the dimensions (and area), the cultivations if rural, and the value of individual parcels of land.
- Land registry records matters concerning ownership, possession or other rights in land.
- Mapping agency provides the national mapping and maintenance of the national reference coordinate system.

About Capgemini

With more than 125,000 people in 44 countries, Capgemini is one of the world's foremost providers of consulting, technology and outsourcing services. The Group reported 2012 global revenues of EUR 10.3 billion. Together with its clients, Capgemini creates and delivers business and technology solutions that fit their needs and drive the results they want. About Kadaster

Kadaster collects and registers administrative and spatial data on property and the rights involved. This also goes for ships, aircraft and telecom networks. Doing so, Kadaster protects legal certainty. Kadaster is also responsible for national mapping and maintenance of the national reference coordinate system. Furthermore, it is an advisory body for land-use issues and national spatial data infrastructures.

Kadaster's information is available predominantly through online web services, including information on energy labels of houses and underground cables and pipelines. Kadaster's main customer groups are civil-law notaries, local authorities, businesses, financial institutions and private individuals. Kadaster maintains the Key Registers Cadastre and Topography.
