

IBX Purchase-to-Pay for SAP MM

Accelerate
time to world-
class results

Leverage your existing investments in SAP MM to create an easy-to-use self-service procurement portal to increase process efficiency and contract compliance on indirect spend. Capgemini IBX Business Network helps you transform your operational procurement to reach world-class results.

Leverage your SAP MM (Materials Management) to create an easy-to-use self-service procurement portal

Did you know that you can increase indirect spend compliance and boost automation of the operational purchasing process by transforming your SAP MM into an intuitive self-service procurement solution?

With IBX Purchase-to-Pay, you can leverage your existing SAP MM to get a procurement solution that increases employee productivity across the organization while leading to increased compliance, as users are guided to preferred products and suppliers. You can now easily provide your business stakeholders with a procurement channel that is as easy to use as any modern consumer web shop and requires no training, which ensures high user adoption. The rich content and call-off options let you maximize the spend volume that is captured through this best-practice process. High compliance and high usage of catalog content lead to increased productivity and enable automation of the full purchase-to-pay process.

IBX Purchase-to-Pay is a Cloud-based layer that easily connects to your SAP MM system. It drives maximized ROI on existing technology investments, enabling you to have one single system of record rather than dealing with two versions of truth.

People matter, results count.

Capgemini helps you reach world-class results:

fast supplier adoption

quick technical implementation

leveraging your SAP MM investment

This is possible because IBX Purchase-to-Pay uses SAP MM as the master, and all information about suppliers, purchase requisitions, orders and goods receipt is stored in SAP MM. The solution enables you to get the maximum outcome of a server product you already own, not having to buy a new one to access the latest technologies for casual and professional users.

In addition to the easy-to-use shopping interface, IBX Purchase-to-Pay includes a flexible, business rules-based approval workflow using built-in best-practice procurement processes with easy maintenance of both spending and approval limits. Approval, using the mobile approval app, lets you accelerate the approval process while keeping control of the procurement process. The efficient spot-buying process enables you to capture more complex categories, for example, professional services or one-time events, and allows you to boost savings on existing frame agreements through a second round of competition. For the professional users in the purchasing department, the solution includes digital tools for supplier collaboration, order and content management, as well as a set of powerful business intelligence tools that provide insights to accelerate the transformation.

Fast supplier adoption ensures success

It takes more than just an easy-to-use shop to optimize the procurement process. In order to achieve high user adoption and ensure a high percentage of no-touch POs, rich supplier catalog content is crucial. Rich catalog content makes it easy for casual requisition managers to easily find and order the necessary goods and services in just a few clicks and without involvement of the procurement department. It is also a prerequisite for automating procurement and accounts payable processes as it enables the automated determination of cost objects and approval workflows.

As the procurement department, your focus is on the selection of your preferred suppliers and the negotiation of product ranges and prices. IBX Purchase-to-Pay enables you to efficiently make the contracts operational with supplier-managed content. Capgemini's analyst-rewarded supplier activation service guarantees fast supplier adoption of your suppliers by connecting you directly with the IBX Supplier Network of more than 550,000 suppliers worldwide. Capgemini offers the optimal activation strategy adapted to different supplier groups for faster return on investment (ROI), and a focused effort to quickly secure the top suppliers combined with cost-efficient large-scale automated activations to capture the tail end of the supply base.

IBX Supplier Network makes it easy for your suppliers to support your procurement initiative thanks to an easy-to-use catalog management tool that easily adopts to their exporting systems. Suppliers benefit from a streamlined order-to-cash process, receiving accurate and complete orders while improving customer responsiveness, lowering process costs and accelerating the speed of payments. Suppliers can speed up their customer order process with end-to-end collaboration on order fulfillment and further optimize the process by integrating their ordering systems to the network.

Enabling world-class operational procurement

Capgemini can help you transform your operational procurement to reach world-class results. With operational procurement benchmarks from our BPO operations and experience from hundreds of procurement implementations, we can help you optimize buying channels for increased automation and to set up a process for ad-hoc needs and more complex purchases.

Capgemini is also one of the world's largest and most experienced SAP systems integrators, with 15,900 practitioners and over 40 years of experience. The technical connection of the Cloud-based IBX Purchase-to-Pay to your SAP MM system is typically completed in three to four weeks, thanks to the ready-to-use SAP MM adapter. It is an easy setup, and there is no need for added configurations in SAP MM. The reliable architecture is built on certified* security standards. IBX Purchase-to-Pay is a packaged solution with long-term end-to-end support.

* Capgemini IBX Business Network is ISO 27001 and ISAE 3402 (SAS 70 type II) certified.

About IBX Business Network

The IBX Business Network is part of the Capgemini Group, one of the world's foremost providers of consulting, technology and outsourcing services. The Group reported 2014 global revenues of EUR 10.573 billion. Together with its clients, Capgemini creates and delivers business and technology solutions that fit their needs and drive the results they want. A deeply multicultural organization, Capgemini has developed its own way of working, the Collaborative Business Experience™, and draws on Rightshore®, its worldwide delivery model.

Connecting over 340 large buying organizations, 550 000 suppliers and providing services in more than 140 geographies, the IBX Business Network is a Cloud-based, ERP independent, e-Procurement platform that optimizes user-experience, enables superior spend management, while exacting lower total cost of ownership. Part of Capgemini's BPO portfolio, the IBX Business Network is a complete ready-to-run procurement service that supports the entire closed-loop Source-Purchase-Pay process, resulting in lower costs and faster ROI, increased spend visibility and transparency, increased control and compliance and improved supplier quality.
