Capgemini Now Certified in Run SAP[®] Methodology

Capgemini now certified to implement end-to-end solution operations standards for clients

PARIS, February 8, 2010 – Capgemini, one of the world’s foremost providers of consulting, technology and outsourcing services and an SAP[®] services partner, today announced it has been certified by SAP AG as a provider of solution implementation based on the Run SAP methodology. Capgemini will incorporate the methodology into its implementation standards.

“By adopting the Run SAP methodology into our own implementation standards, we are helping ensure high-quality, easy-to-maintain solutions based on best industry standards,” said Renate Radon, vice president and global alliance executive, Capgemini. “We believe that Run SAP is a proven methodology for managing our clients’ SAP applications through end-to-end solution operations standards. This certification ultimately will empower our customers to manage their SAP applications more efficiently and at a lower cost.”

Run SAP is a phased methodology based on world-class knowledge. It is designed to provide best-practice procedures, content, services, training and tools for end-to-end solution operations, along with a standardized and proven implementation method. The Run SAP methodology focuses on application management, business process operations, and administration of SAP solutions. The methodology describes how support should be implemented across the lifecycle design, set-up, operations and optimization. In addition, with its best-practice documents for solution operations, it describes how to implement end-to-end solution operations for different SAP software-based business processes.

“We applaud Capgemini’s achievement as an SAP services partner certified in the Run SAP methodology,” said Dr. Uwe Hommel, executive vice president of Active Global Support at SAP AG. “By adopting the end-to-end solution operations standards provided by the Run SAP methodology, Capgemini will deliver to its customers a higher level of effectiveness and efficiency.”

Run SAP is an integral part of SAP Enterprise Support services, a holistic support model designed to enable continuous improvement and successful solution operations.

About Capgemini

Capgemini, one of the world's foremost providers of consulting, technology and outsourcing services, enables its clients to transform and perform through technologies. Capgemini provides its clients with insights and capabilities that boost their freedom to achieve superior results through a unique way of working, the Collaborative Business Experience™.
