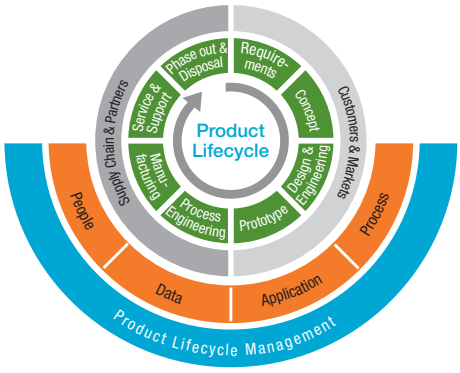
PLM Solutions | the way we do it

Product Lifecycle Management: Harmonize Business Applications



"A global and transversal capability enables Capgemini to be a Top 5 global PLM systems integrator"

Product Lifecycle Management's impact to manage a strategic product development approach, significantly improve efficiencies across distributed product development environments, and even foster product innovation has made it an agenda topic both for the CTO and CIO of global engineering and manufacturing organizations.

Capgemini's expertise in enterprise PLM processes and applications, experience in key industries, partnerships with global PLM ISVs help to provide complete PLM solutions. With increasing product complexity, multi-disciplinary product engineering processes and global collaborations the PLM application landscape often becomes very complex. Capgemini's approach is to assess the landscape in context of the products being manufactured, global distribution of teams involved and PLM technology before building the roadmap to adopt a simplified next generation PLM environment.

Capgemini accelerates the adoption of PLM through proven frameworks, accelerators, and complements the PLM technology with its own assets for specific use cases.

People matter, results count.

PLM Solutions | the way we do it

Assets for PLM Success

Frameworks

- PLM on Mobile
- Product Information Access Framework
- PLM ERP Integration (PLM – ERP)
- Continuous Integration
- PLM Data Migration

Accelerators

- Upgrade Factory
- Data Migration Factory
- Sensitive Data Management
- Preconfigured Systems for PoCs

Focus Industries

- Automotive
- Aerospace
- Energy & Utilities
- Consumer Products
- Medical Devices
- Industrial Products

Solutions and Services Portfolio on ENOVIA

Consulting

- PLM Maturity Assessment
- PLM Roadmap definition
- PLM architecture
- People – Data – Application – Process Integration architecture

Implementation

- Solution design
- Customization, Configuration, Deployments
- Application Migration/ Upgrade/ Integration
- Data Migration
- Testing

Application Management

- Transition planning and execution
- Managed PLM services
- Production Support – L1 and L2
- Application Maintenance – L3
- ISV Liaison

Process Solutions

- Compliance Mgt
- Document and Content Mgt
- Product Configuration Mgt
- ALM, Systems Engineering
- Service Lifecycle Mgt
- PLM Analytics

Capgemini – Dassault Systèmes Partnership

DASSAULT SYSTEMES

- Global strategic and Systems Integration partnership
- Access to first-hand technical support
- Partnership to help customers succeed with Dassault Systèmes technologies
- Capabilities cover ENOVIA , EXALEAD, CATIA, SIMULIA, SOLIDWORKS, DELMIA, and 3Dvia

Success Stories on ENOVIA

Next generation PLM implementation and enterprise integration to standardize the product development processes for complex product assembly structures and varying product configurations

Modernize the PLM landscape, consolidate software platforms and phase out legacy systems for a single window of digital engineering processes and data management for over 15000 users

99.99% uptime of PLM systems while reducing the DCR and Issue Processing Time by 50% through our expert PLM application management services.
