

Driving *transformation* through collaboration

Welcome to Aguascalientes Mexico GDC

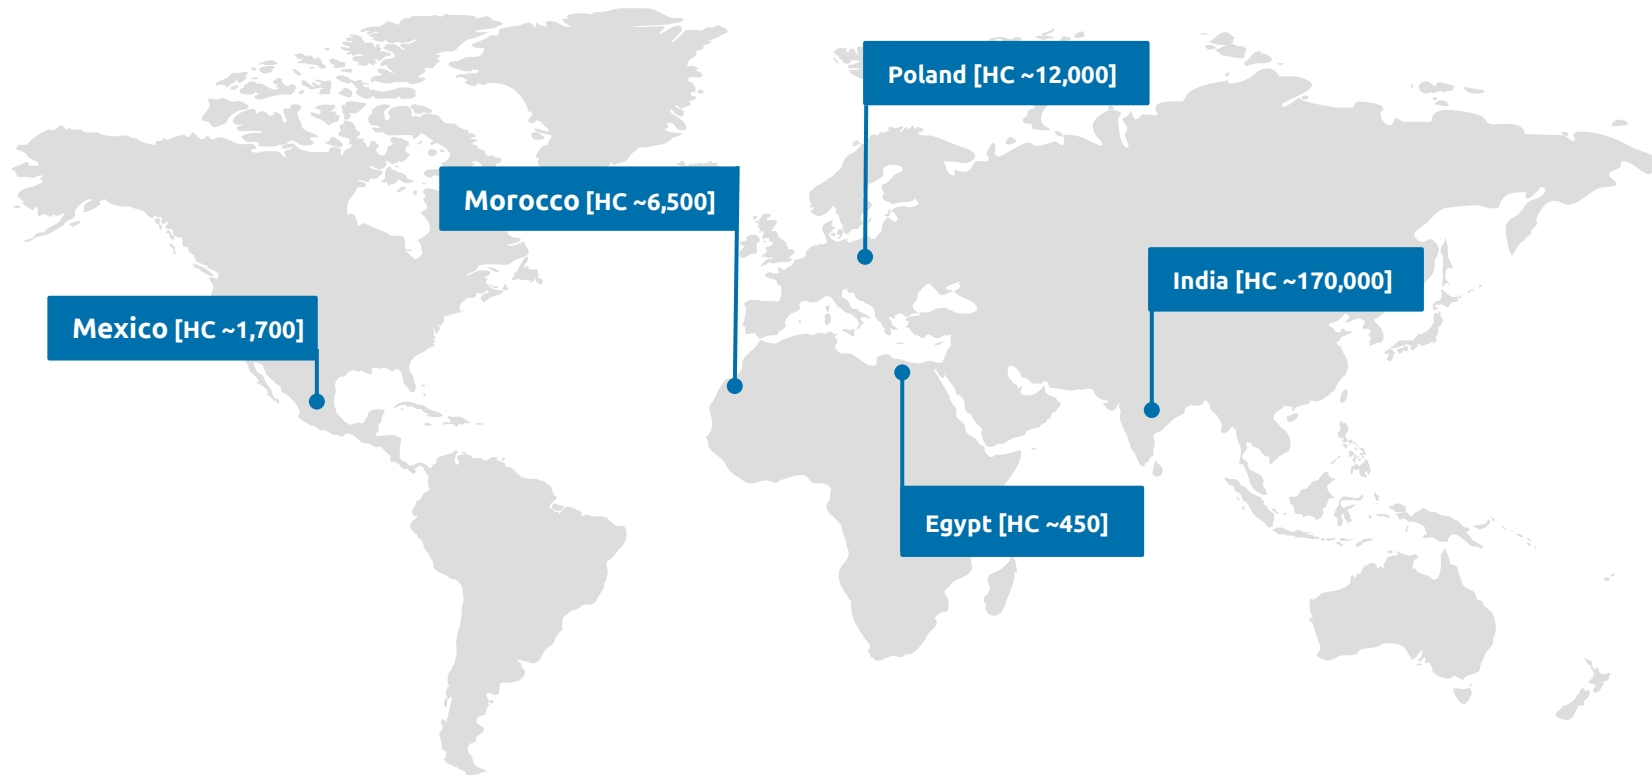

GDC Strategy & Capabilities

C&CA, Testing, SAP, I&D

Capgemini's **Global Delivery Center** Network

Countries selected based on five key criteria:

Talent Pool
Labor Costs
Political Stability

Competition
Relevance for Capgemini

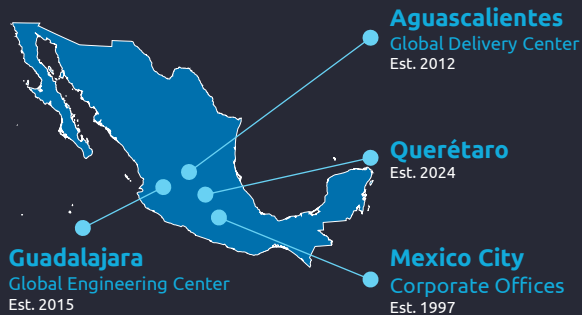

GOALS

Increase Capgemini's delivery footprint and efficiency through :

- 1 Global Delivery Center (GDC) network across time zones
- 2 GDC enables standardized way of working & governance
- 3 Improve competitiveness
- 4 Cross-pollination of best practices with local adoptions
- 5 Remove the silo effect within a Global Delivery Cter

Mexico Insights

Capgemini has over 28 years of presence in Mexico, and 13 years in Aguascalientes:

Aguascalientes is a rapidly growing hub for manufacturing, technology, and logistics:

- Automotive
- Electronics
- IT services

GDC Location Strengths:

- High-speed backbone connection with the US
- Competitive labor market
- Skilled talent with English proficiency
- Strategic location in the *Bajío* region
- Secure and low-risk environment

Talent Acquisition

Mexican Talent is:

Young
Young IT/STEM talent supported by Mexico's youthful demographics

One of the largest in the world
Surpassing Japan, Germany, and France in the number of graduates

Specialized in STEM areas
+ 200K STEM annual graduates

TA resources:

- Referral program (internal)
- Internal opportunities (mobility)
- Job boards
- Partnership with top Universities
- Careers site (Success Factors)
- Social media – LinkedIn
- Employer branding campaigns

Talent Retention

Flexibility

- WFH & WFA
Hybrid work policy, exceptions based on client needs
- Work-life balance
- Wellness program
- Psychological & medical support

Caring

- CSR and engagement activities
- Environmental Sustainability
- Diversity, Equity, and Inclusion
- Great Place to Work
- Capgemini Close2U
- Competitive compensation & benefits

Career Path & Growth

- Talent mapping
- 360° Feedback
- English programs
- Upskilling programs & certs.:
 - Project Mgmt.
 - People Mgmt.
 - Technical skills

Hybrid Work

Capgemini prioritizes work-life balance, offering flexible options for where and how work is done.

Hybrid work, including remote options, is available for most employees, with flexibility to work from home up to 70% of their time.

- ~50% of the Ags HC is working 100% remotely.

C&CA Capgemini Capabilities

The C&CA Practice includes **900+** consultants in Mexico

70% Developers Java, MSF, Mobile
Pega, Power Apps APIs, Microservices
BPM Cloud: Azure, AWS, GCP

20% PMs, Scrum Masters,
Business Analyst

10% Architects | Technical Leaders

DIGITAL FACTORY

- Custom Business Solutions
- API & Microservices Factory
- Application Integration

CLOUD SERVICE

- Apps Modernization
- Cloud Native Solutions

LOW CODE DEVELOPMENT

- PEGA
- Power Apps

Testing Capabilities

The Testing Practice has **700+** consultants in Mexico

MANAGEMENT TEST SERVICES

- Implementation
- Government
- Review
- Operations

QUALITY TRANSFORMATION SERVICE

- Audits
- TPI/QBP
- STI
- Quality Control

SPECIALIZED TEST SERVICE

- Non- function
- Functional
- Automation

PBS SAP Capabilities

Our Experts 250+ experts in Mexico

Customer Experience

SAP CX, BRIM, OTC & Qualtrics

HR & People Engagement

SAP HCM, HCM Payroll, SAP Success Factors (Employee Central, Recruitment, Learning, Payroll)

Supply Chain

SAP IBP, SAC, APO, GTS, TM, EWM, AIN, EAM, PLM

Network & Spent Management

SAP Ariba, S/4 HANA, SAP Concur

Digital Finance

S/4 HANA Finance, Central Finance, Group Reporting, BPC, SAC

Digital Manufacturing

Industry4now, MII/ME, S/4HANA Manufacture

Analytics

SAC, Data Sphere, BPC, Group Reporting

Technical Features

Basis, CPI, PI/PO, BTP, GRC, Security & Roles

Implementations on S4H

Brownfield, Rightfield (Hybrid) & Greenfield

"Brownfield" Approach

Convert today's ERP solution and data as smooth and noiseless as possible to S/4HANA. Minimal adjustments and maximal continuity for the business.

"S/4HANA Rightfield"

The best of both approaches. Always individual!

"Greenfield" Approach

Design „from scratch“, optimized processes & solutions. Often combined with new or adjusted Target Operating Model. New process templates, solutions & data models. Significant changes for IT & Business inevitable.

Assessment & transformation

Rollouts for SAP S/4HANA

Module and product implementation

AMS through Application ADMNext

Insights & Data Capabilities

The I&D Practice has more than 27,000 team members globally, 2,550 in North America and more than 150 in Mexico

350+ Industry SMEs and
Domain experts globally

Capgemini's GBS Capability for Schlumberger

KEY FACTS ABOUT OUR BUSINESS

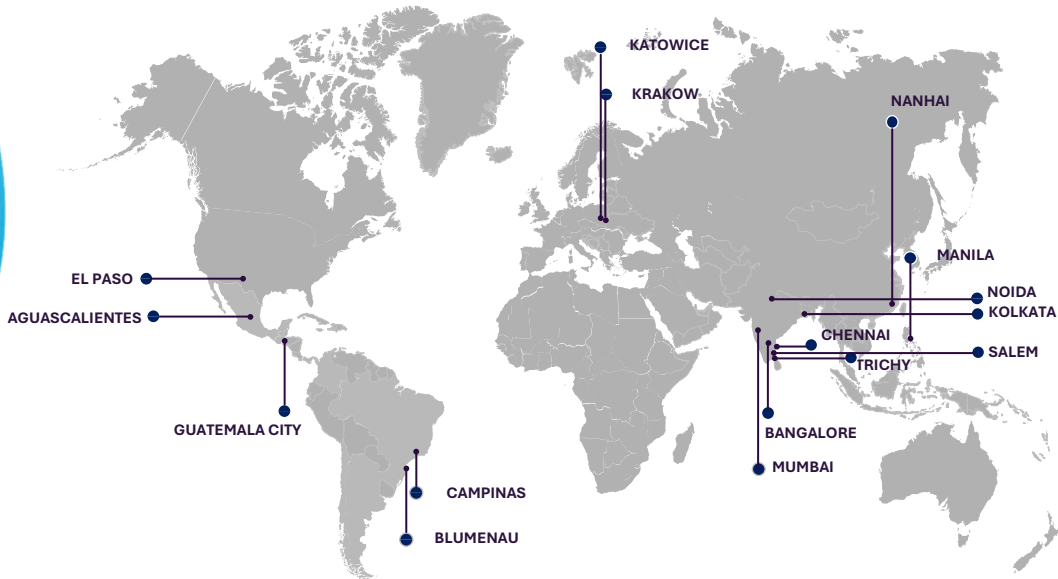

26 years of experience
A multicultural team of 30,000+ professionals
~40 languages and 24/7/365 Global Operations
~120 clients in 180+ countries and territories

Flexible, platform-based methodology for business transformation, automation, and benchmarking
D-GEM reviews and validates impact of technology on your people and their capabilities
Industry know-how and leading solutions across all major sectors

BUSINESS SERVICES IS A GLOBAL BUSINESS LINE OF CAPGEMINI THAT HELPS REIMAGINE YOUR BUSINESS OPERATIONS TO DELIVER FRICTIONLESS ENTERPRISE

GLOBAL DELIVERY NETWORK

INTELLIGENT FINANCE & ACCOUNTING OPERATIONS

- Margin improvement
- Revenue growth
- Working capital increase
- Greater controls

INTELLIGENT SUPPLY CHAIN OPERATIONS

- Revenue growth
- Enhanced customer experience
- Margin improvement

INTELLIGENT PEOPLE OPERATIONS

- Enhanced employee experience
- Improved employee engagement
- Talent development

INTELLIGENT CUSTOMER OPERATIONS

- Enhanced customer experience
- Improved customer engagement
- Revenue growth

COGNITIVE PROCUREMENT OPERATIONS

- Enhanced customer experience
- Reduced cost
- Increased productivity

INTELLIGENT PROCESS AUTOMATION

- Enhanced customer experience
- Improved efficiency
- Enhanced agility

GBS CONSULTING & TRANSFORMATION

- Increased operational efficiency
- Digital Transformation
- Business Outcomes
- Reduced cost

Signature Issues & Strategic Imperatives

As companies are facing increasingly complex, multi-faceted challenges*, GBS proves to be the game-changing, transformational solution to overcome these issues head-on. *(Capgemini-HFS Study 2024)

KEY CHALLENGES | *What we learned from our 500+ survey respondents to the Capgemini – HFS Survey 2024...*

REVENUE & MARGIN PRESSURE

Driving revenue growth and improving profitability and margins (#1 business priority).

COST & PRODUCTIVITY

Reducing costs and enhancing operational performance — while maintaining service quality.

STRATEGIC FOCUS

Aligning organizational focus around growth, innovation, and digital transformation / enablement.

TALENT SHORTAGE

Attracting and retaining skilled talent — particularly in specialized and digital domains.

INNOVATION SPEED

Accelerating product and service innovation to improve speed-to-market.

DIGITAL TRANSFORMATION & CX MODERNIZATION

Elevating customer experience and modernizing operations through rapid digital transformation and emerging technologies such as Agentic and Gen AI.

INSIGHT-DRIVEN ORGANIZATION

Moving from retrospective reporting to real-time, insight-driven decision-making.

REGULATORY DEMANDS

Ensuring compliance with evolving regulatory, security, and privacy requirements (e.g., ESG, tax policy, data governance).

GBS, WHY NOW? | *“GBS isn’t just about cost anymore — it’s about scaling transformation, unlocking agility, and building a smarter, more connected enterprise.”*

74%

of GBS organizations agree “it is time to change the narrative, from cost-out only to value. –

TALENT ACCESS | GBS enables access to global, specialized talent with deep domain expertise—aligned to delivering business outcomes.

BUSINESS AGILITY & RESILIENCE | GBS enhances organization agility with rapid allocation of resources and built-in business continuity, supporting faster response to change.

ELEVATED CUSTOMER EXPERIENCE | GBS delivers consistent, integrated, intelligent service excellence elevating customer experience across the value chain.

DATA & INSIGHT-DRIVEN FOCUS | GBS powers real-time insights, predictive analytics, and enterprise-wide data flow, enabling smarter decisions at scale.

VALUE CHAIN & ECOSYSTEM ORCHESTRATION | GBS moves beyond the back-office to becoming an orchestrator of innovation and enterprise capabilities—powered by AI, new technologies, and evolving skillsets.

BUSINESS VALUE UNLOCK | GBS simplifies, standardizes, automates, and scales operations—driving and unlocking productivity, ROI, and strategic growth / innovation, while shifting focus from KPIs to Key Performance Outcomes (KPOs).

DIGITAL TRANSFORMATION ACCELERATOR | GBS accelerates digital adoption through automation, AI, analytics and an integrated tech-enabled backbone, helping the business move faster and smarter. GBS is key to prepare organizations to move to Agentic and will be at forefront of solving immediate impact to HR/People challenges

GBS Market Trends & Outlook | Future of GBS

As thought leader in the GBS industry, we believe that the GBS organization is shifting and changing in 7 critical ways.

CAPGEMINI – HFS STUDY 2024 |

1 **Scope: Shift from silos to synergy**

Shift from defining your scope by functional activities to enterprise-wide data flows. The goal is a seamless, connected enterprise that maximizes digital transformation

2 **Success measures: From KPIs to key performance outcomes (KPOs)**

Move beyond operational cost reduction and productivity metrics. Start measuring customer satisfaction, revenue growth, and process transformation.

3 **Technology: From enabling process to creating competitive advantage**

Generative AI (GenAI), machine learning, and hybrid/multi-cloud solutions will be central to driving innovation and delivering business outcomes, not just enabling operations.

4 **Data: From reports to revenue**

Leverage data as a core asset for decision-making and value creation. Generate insights that drive strategic decisions and uncover new value sources.

5 **Skills: Beyond labor arbitrage (finally!)**

Emphasize acquiring new and hard-to-find skills over traditional cost-cutting measures. Focus of soft skills (communication, negotiation, etc.) and nurture talent that drives innovation and transformation.

6 **Third-party providers: From vendors to orchestrators**

Evolve third-party providers from transactional vendors to ecosystem orchestrators that would bring new skills, technologies, and capabilities to support your GBS transformation.

7 **Commercial models: From counting bodies to measuring outcomes**

Engagement models with third-party providers must become more flexible and outcome-based. This promotes GBS initiatives align with business objectives and deliver measurable results.

Companies choose from four different GBS operating models based on their needs

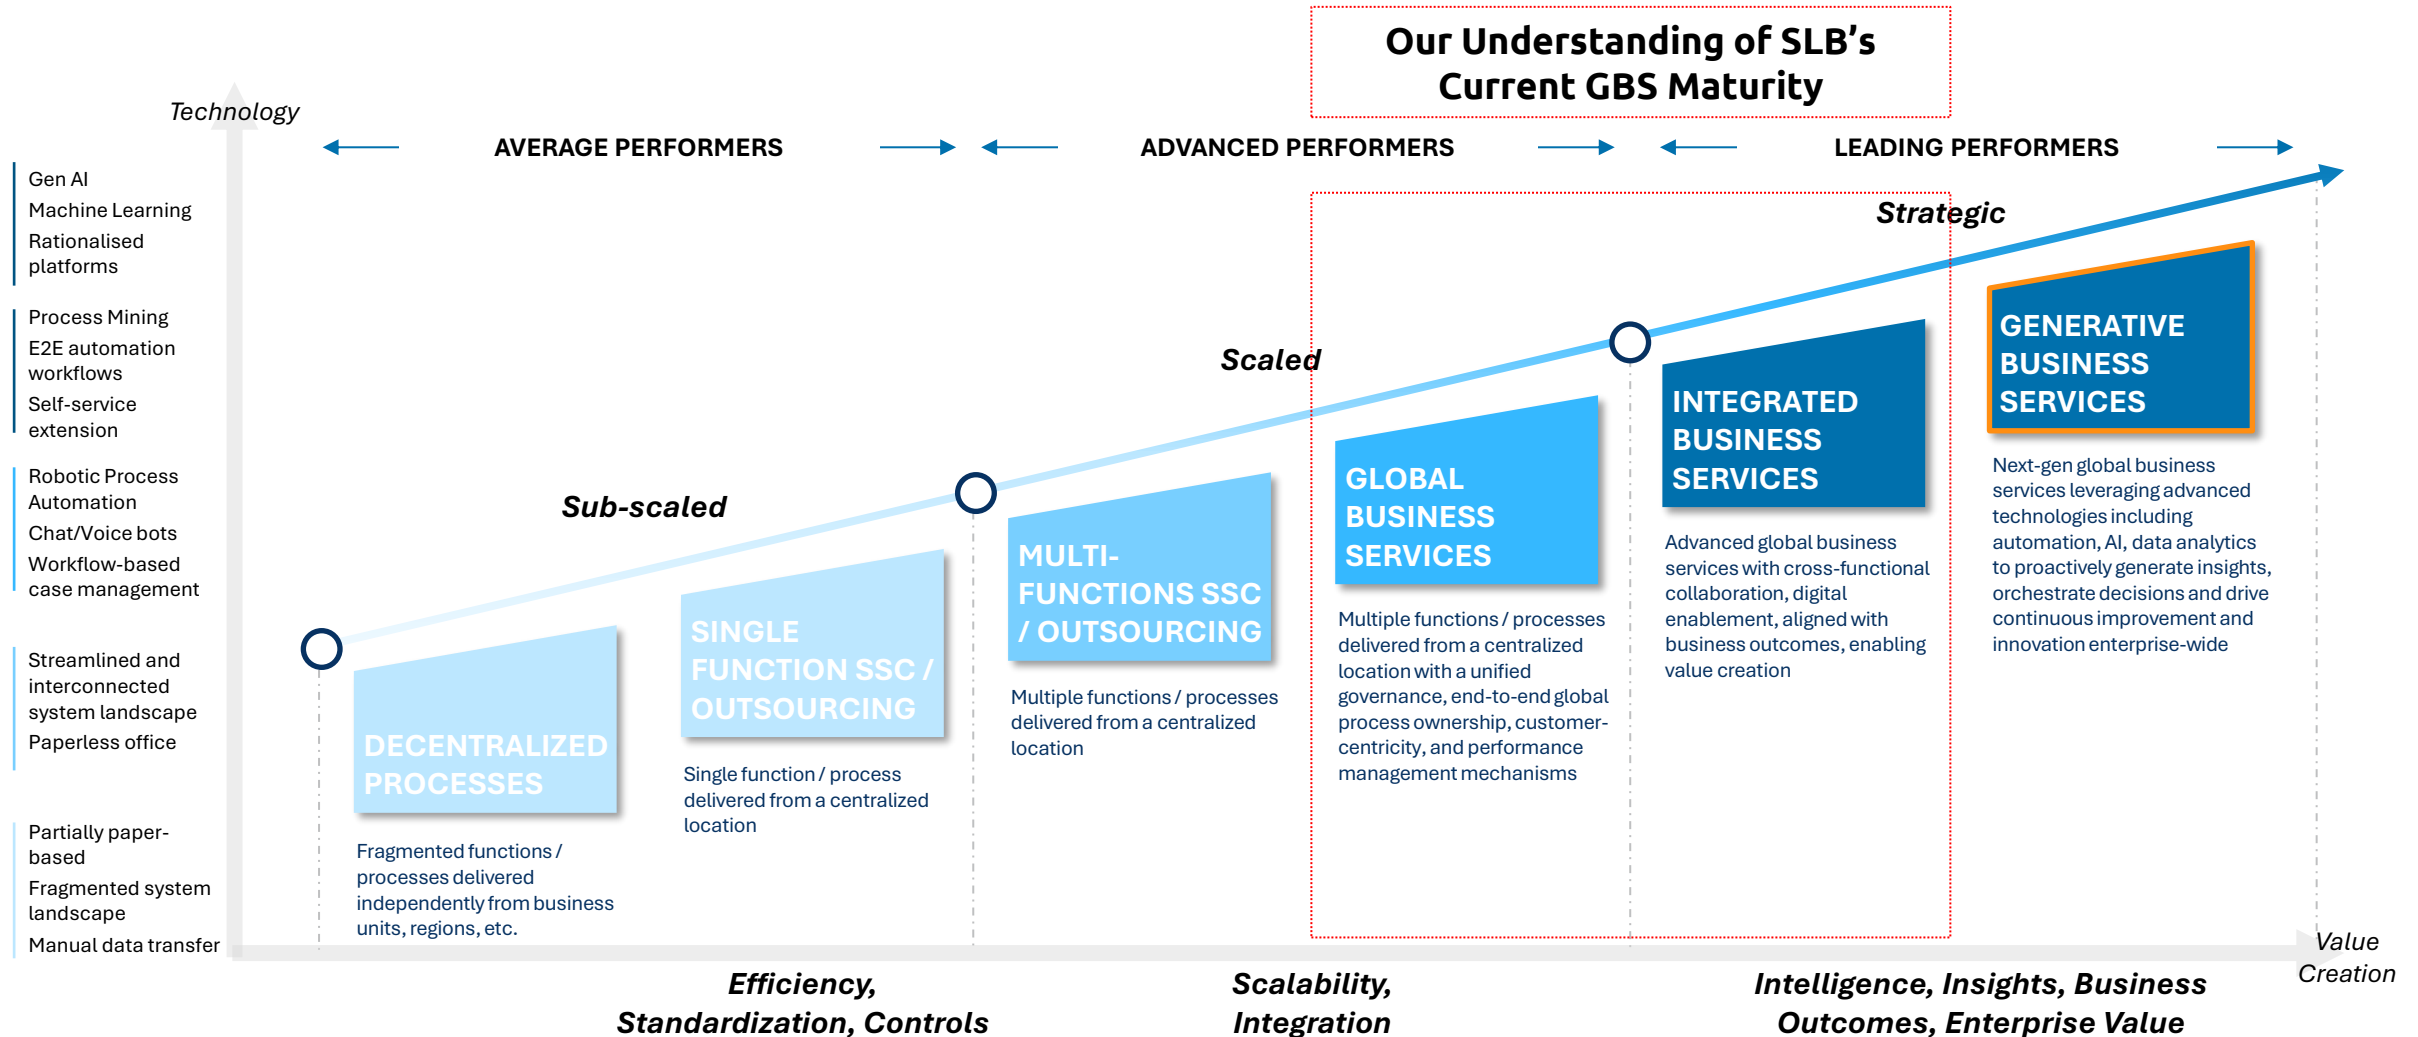

Captive/GCC	BOT (Build Operate Transfer)	Hybrid Captive + Outsourced	Outsourced
<ul style="list-style-type: none">▪ Own center, typically in a low-cost location▪ All activities performed without the involvement of service provider	<ul style="list-style-type: none">▪ Third party manages entire operations setup as a JV▪ Stabilized and transferred back to the client after stipulated period	<ul style="list-style-type: none">▪ Own center and Service Provider Locations▪ Transition, governance & program management provided by service provider	<ul style="list-style-type: none">▪ Everything is managed by service providers based on SLA (Service Level Agreement) contracts
			

Our Understanding of SLB's GBS Model

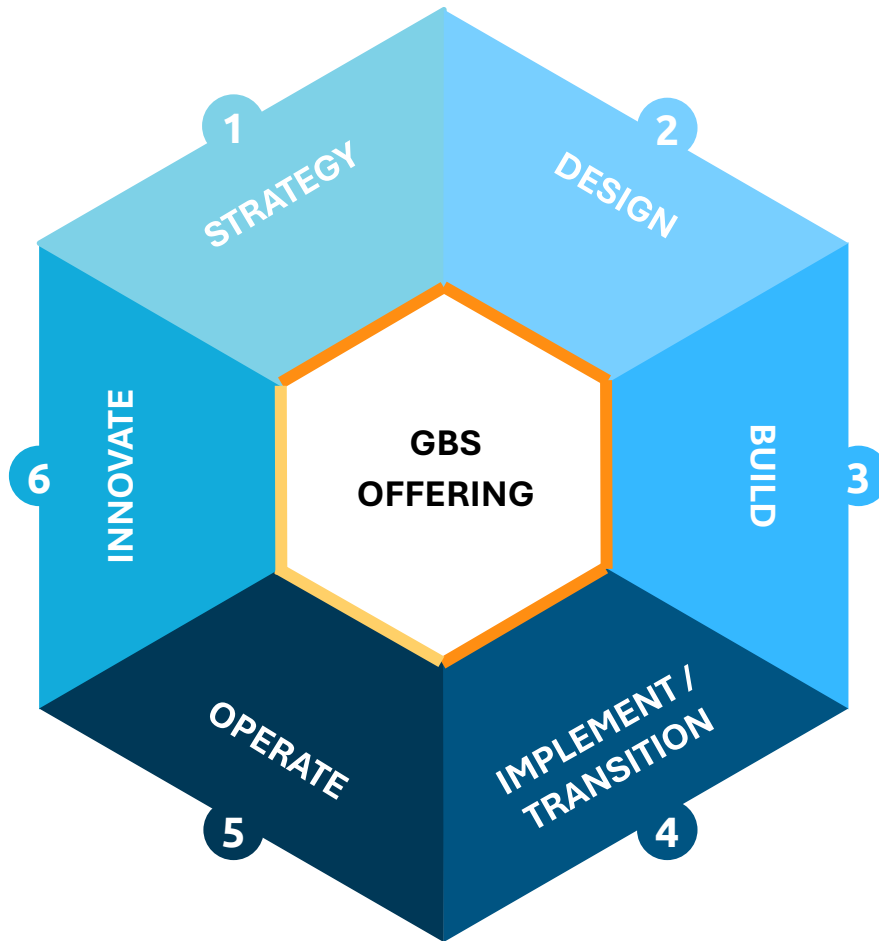

GBS Evolution & Maturity

Organizations have evolved from decentralized and fragmented services / functions to integrated, generative business services, shifting focus beyond transactional operations to driving enterprise value, strategic business insights and innovation.

Capgemini helps client's across the range of GBS Journey

Capgemini offers end-to-end and modular consulting transformation and operational services spanning from strategy through design and implementation to delivery and innovation, supporting companies in their GBS transformation journey. Clients can select the full service or specific solutions tailored to their unique needs.

1. STRATEGY

2 to 3 months

- Vision & Strategic Value Drivers
- Capability Assessment (including activity analysis, maturity assessment, etc.); Feasibility Assessment (including fit & readiness, gap analysis, process split hypotheses, etc.)
- High-Level Operating Model
- Location Strategy; Implementation / Transition Strategy
- Business Case & Strategic Roadmap

2. DESIGN

3 to 6 months

- Detailed Op. Model Design (including service catalogue, KPIs, KPOs, SLAs, org. structure, governance and interactions model, etc.)
- Global Process Model Design
- Technology & Data Enablement Design (e.g., automation, AI, etc.)
- Detailed Implementation / Transition Plan
- Change Management & Communication Strategy & Plan

3. BUILD

3 to 6 months

- People & Talent Setup: Resource Sourcing, Recruitment, HR Setup
- Governance Setup
- Operations Setup
- Site & Logistics Setup
- Infrastructure & Technology Setup

4. IMPLEMENT / TRANSITION

3 to 18+ months

- Ramp-up
- Impact Assessment & Gap Analysis
- Knowledge Capture, DTPs & SOPs
- Knowledge Transition, Training
- Go-Live Support

5. OPERATE

Ongoing / Continuous

- Operations Stabilization
- Managed Services Deployment
- Services Delivery & Execution
- Performance Management, Benefits Realization Tracking
- Technology & Data Solution Enablement
- "Flying Squad"

6. INNOVATE

Ongoing / Continuous

- GBS Enablement
- GBS Maturity Assessment
- Talent Seeding
- Transition & Recruitment as a Service
- AI Strategy and Implementation for GBS
- Value Realization Office Setup
- Continuous Improvement & Innovation

GBS Benefits & Outcomes

GBS transformations typically drives benefits and value through operating model optimization, digital transformation, labor arbitrage, productivity gains and unlocked business outcomes.

Benefits Drivers		Estimated Benefits Range*
	COST OPTIMIZATION Operating model optimization, process centralization, labor arbitrage, right-sizing / skilling, ERP modernization funding (S/4, Oracle)	~40–50+%
	DIGITAL TRANSFORMATION GBS in frontlines for identifying GenAI and Agentic AI use cases and implementing at scale; building data trust; digitization of workflow platforms	~30-40+%
	PRODUCTIVITY IMPROVEMENT Process and Policy standardization, improvement, and adoption	~20-30+%
	BUSINESS OUTCOMES UNLOCKS Illustrative examples include Revenue growth, cash flow optimization / working capital improvement (DPO, DSO), speed-to-market, customer satisfaction, Spend Savings etc.	Revenue growth: ~1 – 4 % DSO improvement: ~5-10% Speed-to-market increase: ~30-70% Customer satisfaction increase: ~20-30% Spend Savings: ~6-9%

GBS Success Stories | Work Centralization

AI in GBS

Capgemini 

7 Key Emerging Trends from Capgemini and HfS Generative Business Services Study

1. Rise of agentic AI and impact on value beyond point solutions

Enterprises have latched on to agentic AI for its several features. Agentic AI brings action to AI, and we expect to see it embedded in solutions delivering end-to-end value and helping AI partners drive a greater focus on business value outcomes as automation moves from task-based to goal-based. This will help organizations move beyond point solutions, where traditional or previous service engagements are constrained to point solutions rather than transformation.

2. Services-as-software across the value chain

As part of the shift towards agentic vision, services firms will replace labor arbitrage with AI-powered software-as-a-service arbitrage, thereby changing how enterprises consume services. This will fundamentally change the software development lifecycle and, in some cases, shorten it by 10x. This trend should accelerate throughout 2025.

3. Democratization of AI through generative models

Generative models are the natural language data interaction. It's no longer confined to technology teams or specialized roles but rather empowers every employee to interact with AI systems seamlessly. This trend is expected to continue as companies harness the power of these tools for their own competitive advantage by enabling faster decision-making processes that leverage large volumes of data more efficiently than ever before possible without human intervention at all levels within an organization hierarchy (e.g., automated decision-making while maintaining compliance standards). The democratization process also enables organizations' operational hierarchies to allow decentralized decision-making while maintaining compliance standards across various functions within an organization.

4. GenAI as the new data powerhouse

GenAI is revolutionizing how enterprises manage and utilize data. It not only processes vast amounts of structured and unstructured data but also generates insights that drive better decision-making faster than ever before possible previously thought achievable through traditional methods alone (e.g., manual analysis). The shift enables enterprises to rethink their entire approach towards managing big datasets by leveraging machine learning techniques like deep learning algorithms which can analyze massive datasets quickly providing real-time insights into business operations such as customer behavior patterns or market trends etc., resulting in significant improvements overall efficiency gains throughout enterprise operations globally when combined together effectively using intelligent document processing (IDP) enables seamless workflows that drastically reduce manual intervention required previously thought necessary before now possible thanks largely due advancements made recently over past few years alone making this one most exciting times history technology industry today!

5. AI-driven ecosystems: the new competitive frontier

The success of GenAI hinges on ecosystem collaboration. Enterprises are increasingly engaging with an expanded network of partners—from cloud providers such as AWS to AI specialists such as Anthropic. These ecosystems facilitate co-creation and scalability, blending industry-specific solutions with foundational technologies. Enterprises that build these collaborations effectively will define market leaders in the Generative Enterprise era.

6. Hyperpersonalization and the era of human AI collaboration

Hyperpersonalization is the new battleground for customer and employee loyalty. GenAI enables enterprises to deliver tailored experiences at scale, from personalized marketing campaigns to custom-tailored HR support that can improve retention and well-being—making this another area where enterprises are looking to invest heavily in 2024. Enterprises will also need to navigate how humans and machines work together more seamlessly. This trend extends beyond traditional marketing into HR, IT, engineering, supply chain, and virtually any function where humans interact with machines.

7. Regulation, deregulation, and China

The US President Donald Trump had already backed the Biden directives on AI, removing regulatory shackles that have held back innovation while carefully watching his Stargate Infrastructure Initiative unfold in China. China has set up their own alternative frameworks to ChatGPT et al., leveraging its national data security act that restricts foreign access. Leave the race to AGI to governments and hyperscalers—customers won't want their data locked up abroad or caught up in recent R&D disasters.

GBS Market Trends & Outlook | GBS & AI

With human-business and business-business data-driven experiences taking center stage, the businesses can become interconnected ecosystems of autonomous capabilities and business experiences.

AI is a major transformation lever for GBS

Empowered Stakeholders

Gain personalized insights and on-demand deep dives thanks to predictive and preventing analytics powered by automated insights and personal digital process assistants.

Ecosystem of Automation

Break the business technology silos with API-first and cloud-native toolkit automating entire value chains across processes - without any manual work. Powered by Generative AI.

Autonomous Processes

Embrace Enterprise-on-demand powered by self-generating business processes and next-generation business platforms with processes operated programmatically without manual work.

Autonomous Interactions

Both system and people need to seamlessly exchange information at speed and scale – build thanks to power of API-economy and Generative AI enabling next-generation of Self-Service and AI-first business experiences.

New Process Experiences

Redefine your business processes that clients and employees love by inviting automated transformative opportunities with Human-centric GenAI and Self-Service capabilities.

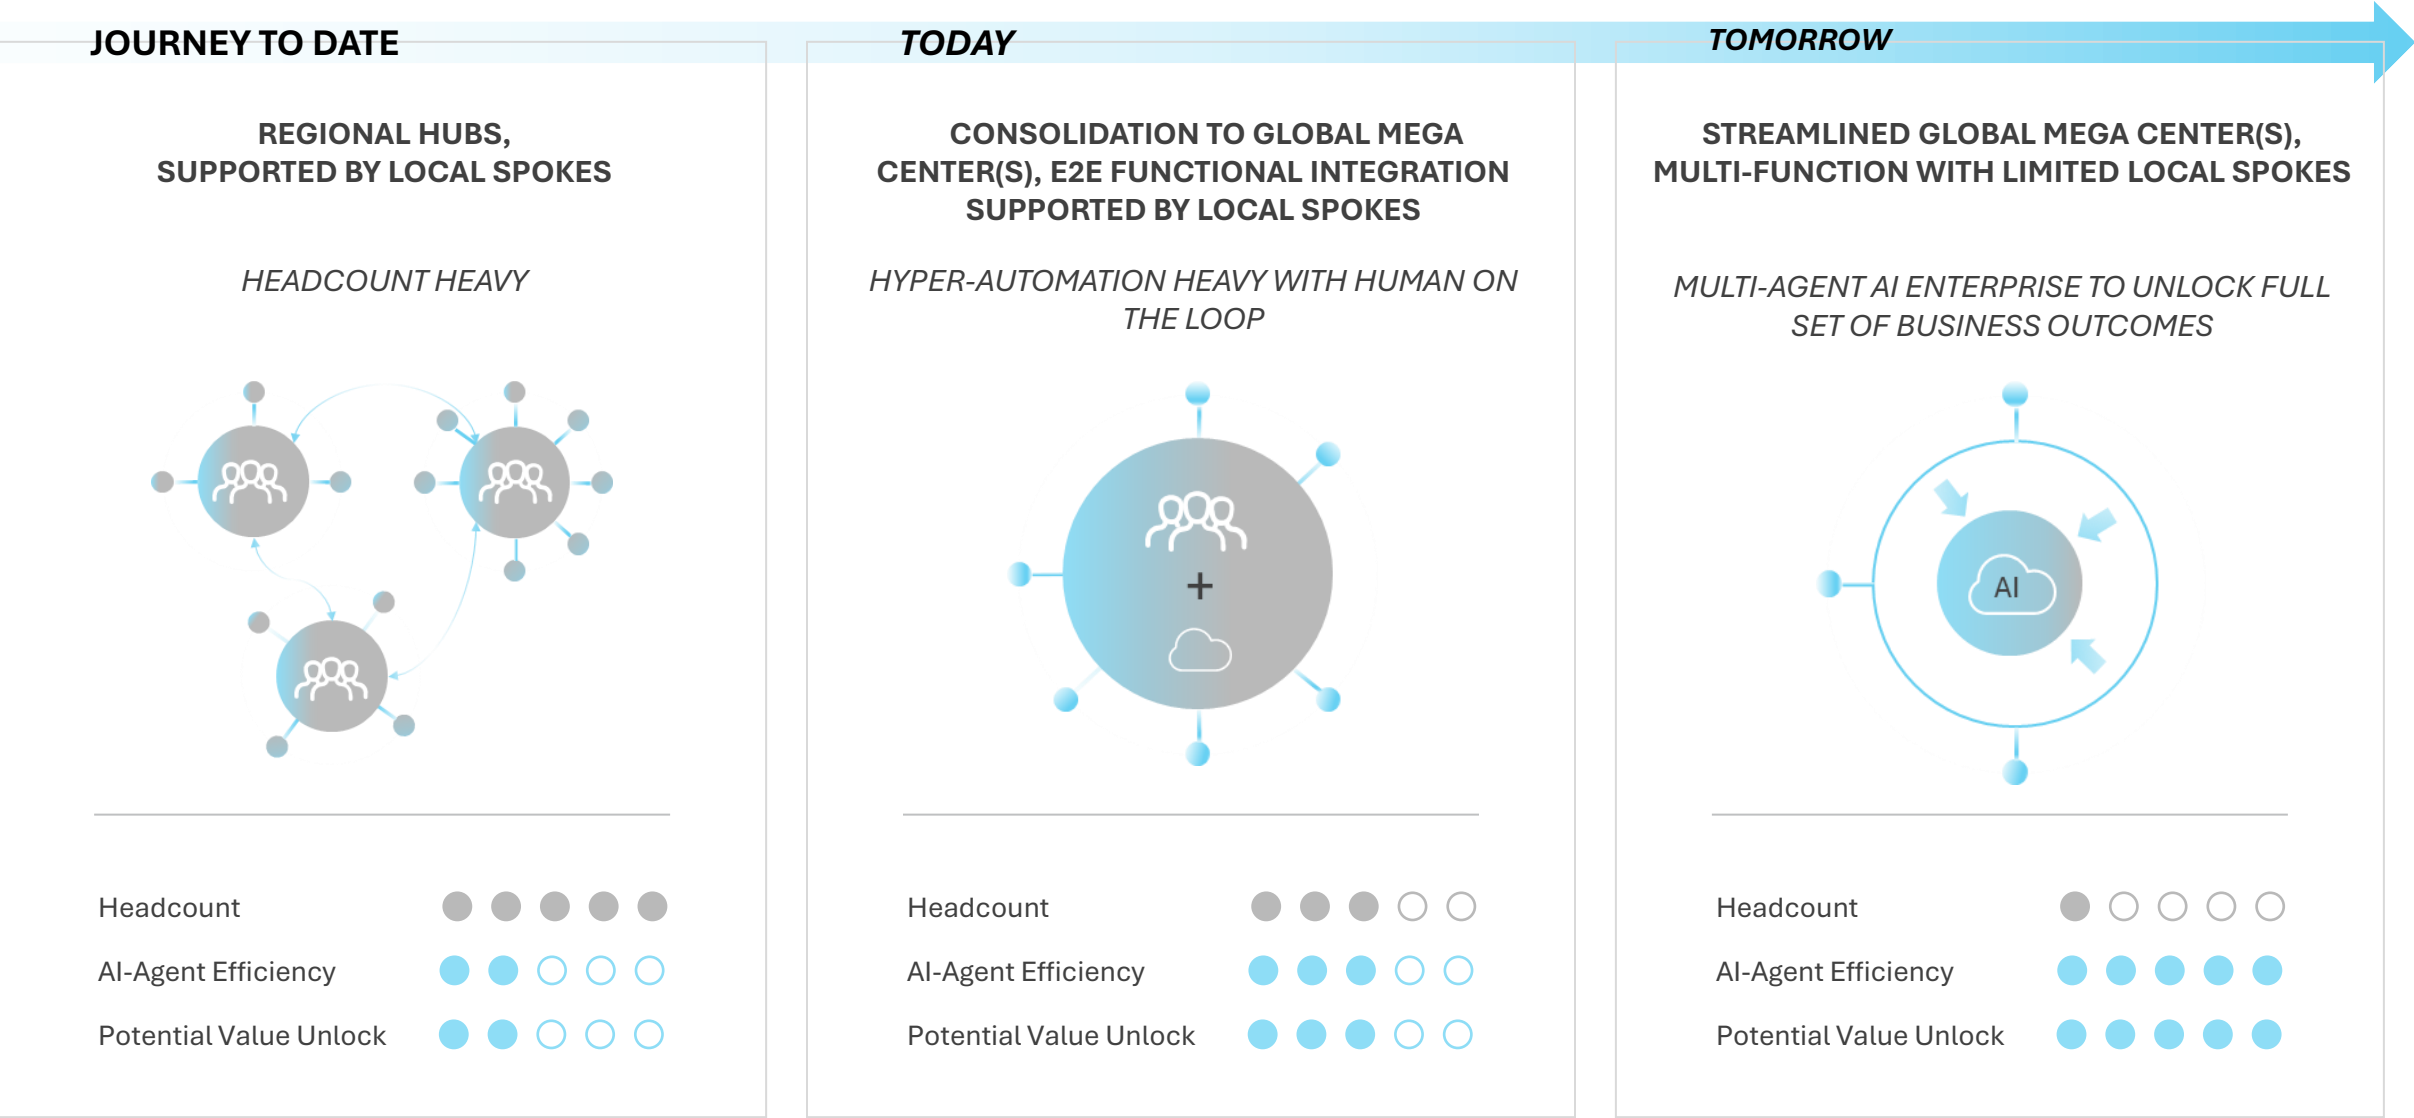

Autonomous Data

Shape enterprise ecosystem of data powered by personal data assistants helping you to identify, transform and extract information across entire connected enterprise.

GBS Market Trends & Outlook | GBS & AI – Path Forward

AI-agents are set to reshape GBS operations and unlock next-generation capabilities, driving value creation far beyond traditional productivity gains.

During that evolution Transition and Change Management are critical *to fully utilize long term potential of people, processes, data and technology*

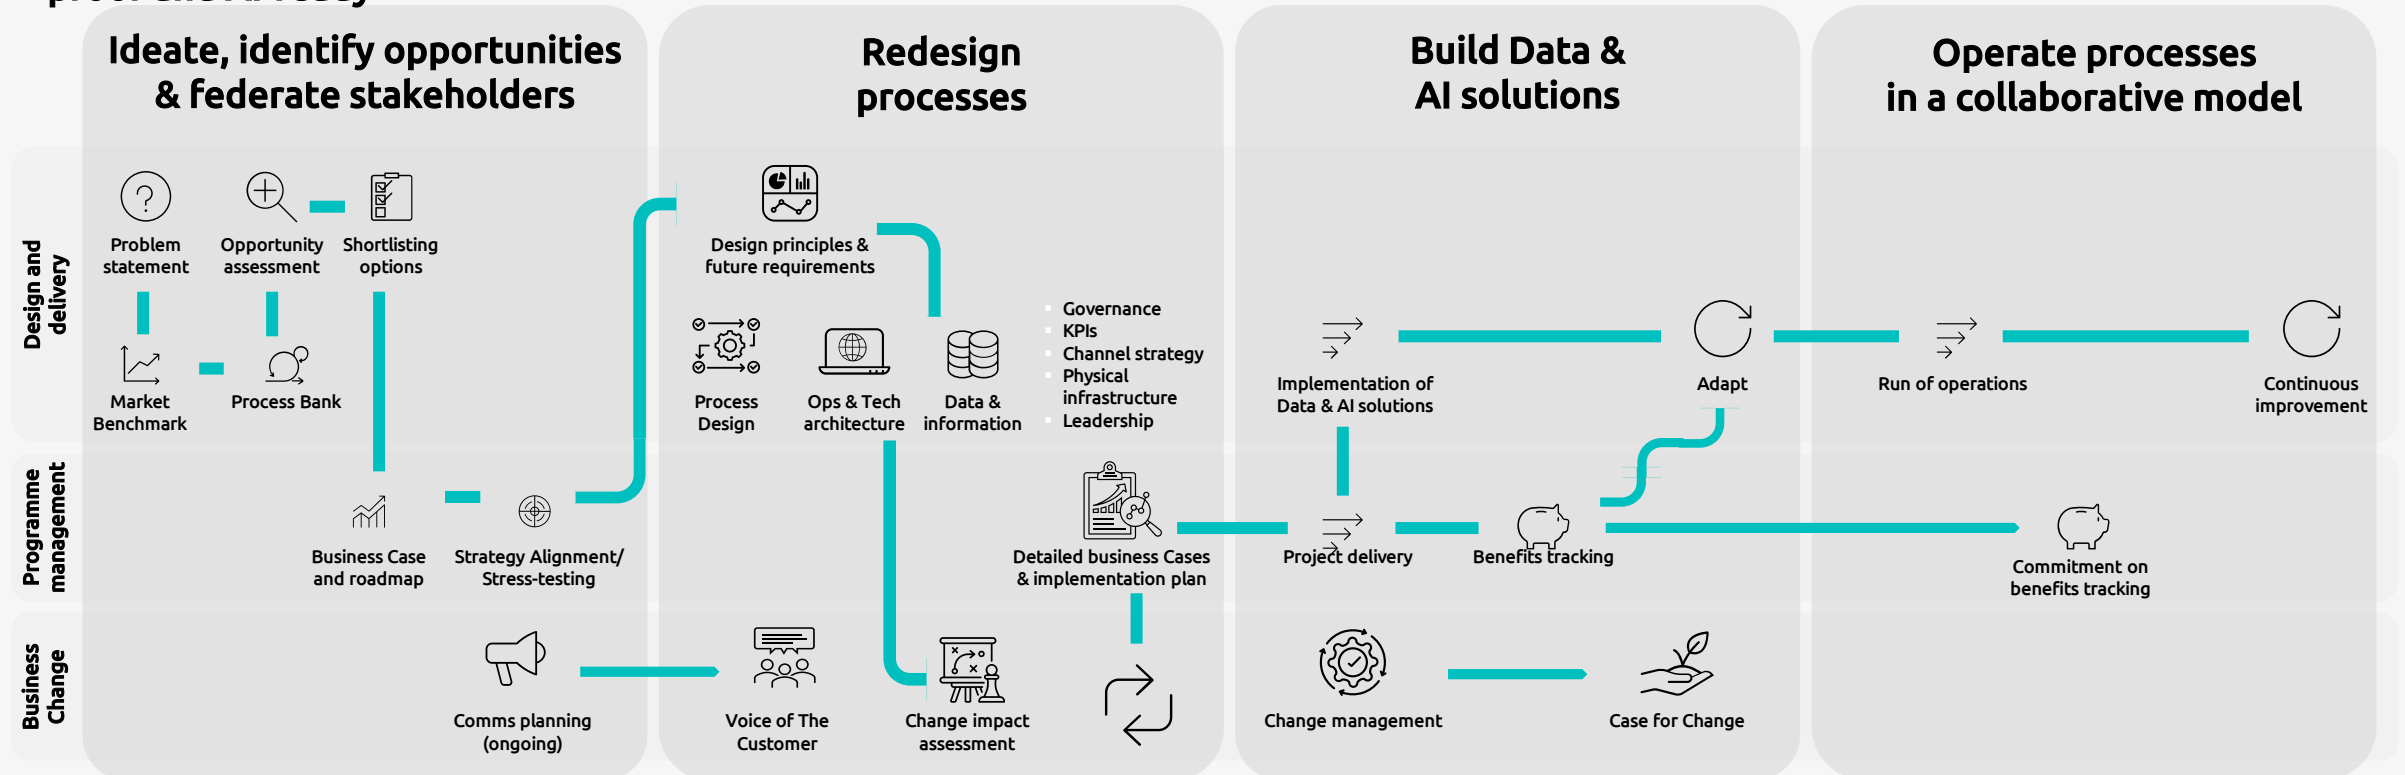

CONTEXT

- Your company has the ambition to transform & reinvent the Business Flows
- Executive alignment around the need to increase attention on AI
- Additional AI scope added to ensure that the future organization is future-proof and AI-ready

DELIVERABLES

- AI-first process design framework
- Map the new suggested processes/business capabilities
- Change & Life Cycle Management Approach

Augmentation of Human Processes with Agentic AI

Joint AI Technologies CoE

Capgemini's Competitive Advantage & Key Differentiators in GBS

Capgemini is uniquely positioned as a preeminent advisor and trusted partner to support clients in their GBS transformation journeys combining capabilities and skillset, functional and industry expertise, market insights and leading practices, digital prowess, etc.

END-TO-END GBS CAPABILITIES

Comprehensive, integrated, GBS transformation offering from strategy through operations / execution; "Consulting to Ops" one-stop shop

GLOBAL DELIVERY NETWORK

Agile, global delivery resources and network in-market, nearshore and offshore, powered by over 26,000 experts across Americas, EMEA and APAC

DEEP FUNCTIONAL DOMAIN & INDUSTRY EXPERTISE

Deep functional and industry expertise across Finance, Supply Chain, Sales, IT, HR, etc. serving all industries (CPRS, MALS, TMT, FSI, etc.)

STRONG TECHNOLOGY ECOSYSTEM

Robust ecosystem of strategic relationships, partnerships and alliances with technology providers across ERPs, automation, AI, cloud platform, etc. (SAP, Workday, Blackline, Celonis, etc.)

GLOBAL LEADER IN DATA & AI

Market leading data & AI capabilities embedded to power intelligent GBS operations with 30,000 data consultants and 1,000+ dedicated to AI

PROVEN ASSETS & ACCELERATORS

Extensive library of proprietary pre-built assets and accelerators, leading practices including DGEM & ESOAR to accelerate transformation programs

BUSINESS TRANSFORM. ORCHESTRATOR & INTEGRATOR

Orchestrators & integrators for large-scale and complex operating model, process, and digital transformations for seamless integration between business capabilities and tech. solutions.

BUSINESS OUTCOMES MINDSET

Business Outcome-focused approach with proven frameworks for enterprise value creation and realization

RECOGNIZED AS GBS MARKET LEADER

Consistently recognized by industry analysts (e.g., Everest, ISG, HFS, etc.) as GBS market leaders and eminence publishers

Intelligent Supply Chain Operations

Embracing the new supply chain paradigm triggers a lot of questions among our clients

Resilience

How do I optimize inventory allocation for customer retention and revenue protection?

Visibility

How do I integrate workforce and resource information near real time to prevent stock outs or overstocking ?

How do I digitize my supply chain for complete visibility?

Sustainability

How do I track & manage Scope 2 & 3 emissions ?

How do I do report for sustainability audits?

Cost

In a volatile and complex world with geopolitical uncertainties how do I keep my costs in check?

HOW DO WE HELP

Capgemini is an industry leader working with fortune 500 companies to provide data driven, digitally transformed, AI Powered integrated Supply chain **orchestration service** from planning, procurement, production, order management to integrated logistics delivering **sustainable** value outcomes

Proprietary Supply Chain Technology and Partner Network for end-to-end supply chain orchestration

WE DELIVER INTELLIGENT SUPPLY CHAIN OPERATIONS TO ALL OF OUR CLIENTS' REGIONS – APPLYING PROVEN PRACTICES AND INNOVATIVE TECHNOLOGIES

WE COMBINE OUR EXPERIENCE AND SCALE...

Over **20+ years** of experience

Serving **100+ countries**

Serving **20** clients

14 Regional centres

3500+ supply chain experts globally

Averaging **7 years** of client engagement duration

...TO DELIVER A TRANSFORMATIONAL VALUE PROPOSITION

Integrated and **autonomous** supply chain operating models

- **Smart Forecasting & Integrated Business Planning**
- **Agile Order Fulfilment**
- **360 Sourcing & Supplier Collaboration**
- **Integrated e2e MDM**
- **SC Control Tower & Intelligent Automation**

DIGITAL ASSETS WE APPLY

Digital Global Enterprise Model - Mapping of best practice processes across the entire Supply Chain scope

ESOAR methodology – getting Supply Chain operations ready for digital transformation

Blockchain – Capgemini Blue Catalyst solution for Know Your Supplier, to make sure of supplier performance and reliability

Intelligent Automation – various tools ranging from RPA through ML to AI, including chatbots and virtual agents
