

# Capgemini Footprint 2018 H1 versus 2017 H1

- Overall a 6,6% reduction of total carbon emissions in 2018 H1 compared to 2017 H1.
- The reduction is completely realized within business travel: 20,9% reduction of Diesel, 46,6% reduction of Gas and a minor reduction of (car) Electricity. However, emissions of private cars has increased with 15%.
- We see a big increase of train emissions, both national (+24,4%) as international (+20,5%) and the same trend in other public transport (bus, tram, metro).
- With regards to flights we see a reduction of domestic flights (-18,3%) and short haul flights (-22,9%) where a slight increase of long haul flights is measured (+0,1%)
