

Modernize and simplify with Oracle Enterprise Resource Planning Cloud and Capgemini's IMPACT

In today's globalized economy, businesses rely on Enterprise Resource Planning (ERP) systems for reduced costs, greater visibility, improved compliance, more process automation, and decreased time spent reporting and reworking. ERP systems are the backbone of the enterprise, and businesses expect them to boost standardization, collaboration, and efficiency. However, in reality, managing traditional, on-premise ERP software can often be time-consuming and can inhibit business agility – and then there's the cost of staying relevant and innovating, upgrading disparate systems, and maintaining multiple licenses and vendor relationships.

A modern, enterprise-grade ERP platform in the Cloud combined with the expertise of a reliable integrator can transform your business processes and deliver the best of both worlds – the agility and cost efficiency of Cloud computing and everything you expect from traditional ERP.

Oracle ERP: Leveraging agility and innovation for competitiveness

Oracle ERP Cloud is an ERP solution adapted for today's enterprises. It helps you modernize more easily with cloud innovations and fast processing speeds, better empower your people with business insights and social collaboration, and maximize value with predictable pricing and pay-for-what-you-need. It combines the power of a global business software suite with easy-to-use transactional and reporting

capabilities that address financial, procurement, and project requirements across a range of business flows and countries. The complete and integrated suite can transform your organization with the latest social, mobile, and analytic technologies that help optimize collaboration, process efficiency, and compliance while increasing insight into your business. An enterprise-wide solution, it helps you move beyond merely staying informed to actually take action based on the information provided.

Not only do Cloud-based solutions make ERP software more affordable, but they also make these systems easier to implement and manage. Oracle ERP Cloud offers you flexibility and choice in deployment through a comprehensive, modern, and secure Cloud offering. By simplifying your technical requirements and business processes, you reduce costs and free up resources to focus on value-added activities. The solution embeds innovation and productivity into the user interface, delivering a new user experience with built-in features and innovations such as collaboration, contextual business intelligence, role-based dashboards, and mobile applications. With real-time reporting providing actionable insights, business owners can increase the effectiveness of decision-making and drive innovation.

Depending on business needs, Oracle ERP Cloud can be deployed in the Cloud, offered on-premise, or can even be run in conjunction with your current systems.

Oracle ERP Cloud offers you flexibility and choice in deployment through a comprehensive, modern, and secure Cloud offering

Oracle ERP Cloud: Three suites to simplify and modernize your systems

Oracle ERP Cloud consists of the following suites, all of which offer end-to-end integration and embedded social and mobile capabilities to boost collaboration:

Oracle ERP Cloud: Financials Suite: Financials Cloud: A Cloud-based version of Fusion Financials built on E-Business Suite's "gold standard" code set, this is an end-to-end modern finance solution delivering Financial Management, Financial Analytics, Expense Management and Collections and Revenue Management. The suite is designed to automate, streamline, and control financial processes without expensive hardware and system management overhead costs.

Oracle ERP Cloud: Procurement Suite: Built on the award winning E-Business Suite code set, this procurement solution has been developed to address the areas of Strategic Sourcing, Contract Management, Procurement, and Supplier Management.

Oracle ERP Cloud: Project Portfolio Management (PPM): Designed to help you track and control various projects including analytics and performance, this suite includes Project Financial Management, Project Management, Project Resource Management, and PPM Analytics.

Capgemini's IMPACT: Integrated Methodology for Proven and Accelerated Cloud Transformation

Capgemini can help you maximize the potential of Oracle ERP Cloud through IMPACT (Integrated Methodology for Proven, Accelerated Cloud Transformation), our accelerated program for implementing Oracle ERP Cloud for true and timely business transformation. We leverage our experience with the Cloud, partnership with Oracle, and implementation experience in the areas of Oracle Fusion Middleware, Oracle On Demand, and other software-as-a-service (SaaS) solutions to align the platform to your specific needs. Using IMPACT, we deploy Oracle ERP Cloud the way you want and help realign strategy as your business requirements evolve, leveraging the strength of our Business Process Creation and Business Process Management (BPM) practices in order to do so.

Capgemini's IMPACT approach for Oracle ERP Cloud: Financials Suite

- **INTEGRATED** Our integrated approach starts with a candid assessment of how Cloud can fit into your organization, includes advice on best scope and deployment options, and helps you make the right decision for your business.
- **METHODOLOGY** Capgemini's Collaborative Business Experience™ guarantees a people-centered approach to technology and a collaborative culture conducive to accuracy and successful Cloud transformation. Proprietary collaborative tools like our Accelerated Solutions Environment (ASE) facilities make collaboration easy, and offerings like our Application Lifecycle Services help you look at the bigger picture.
- **PROVEN** Capgemini's tried-and-tested implementation methodology offered in partnership with Oracle is based on over a decade of global Oracle application implementation experience and deep, industry-specific knowledge for business-process modeling to help you realize actionable business solutions.
- **ACCELERATED** Capgemini-developed toolsets and processes enable our global consulting team to apply industry best practices and standards to minimize risk, configuration effort, and customization.
- **CLOUD** Capgemini has made large investments in Oracle Centers of Excellence that focus on Cloud adoption and produce proprietary Intellectual Property and solutions designed to reduce risk while increasing speed of delivery and business value for Cloud adoption.
- **TRANSFORMATION** Our consulting teams and technical resources help you realize the business transformation potential of Oracle Cloud Application and achieve actionable business-driven solutions.

Business Process Management: The key to growth and innovation

We believe that your enterprise is only as strong as the business processes behind it. With support from a meaningful BPM framework, Oracle ERP Cloud can become a true foundation for innovation and growth within any organization. This is why Capgemini brings deep BPM and sector knowledge, change management skills, and specialized Cloud orchestration to every implementation of Oracle ERP Cloud.

With a base in highly configurable, adaptable, and intelligent business processes, Oracle ERP Cloud allows you to streamline, optimize, and modify your business processes according to your business needs for fast, agile decision-making – even when those needs change. We work with you to take advantage of this agility and design your business processes for maximum impact, whether that means starting small and gradually building up or doing a complete re-design from the very beginning. As your business needs change, your business processes also need to evolve and we ensure that you are future-ready with a full package of integrated business process support.

Oracle ERP Cloud allows you to streamline, optimize, and modify your business processes according to your business needs for fast, agile decision-making – even when those needs change

Cloud orchestration for business transformation

Capgemini has been a pioneer in helping exploit Cloud benefits for our customers. We saw early on that by harnessing the power of the Cloud, we could help organizations achieve meaningful business change. It is also crucial to realize that the business benefits of Cloud can be exploited without having to add complexity and risk to the management agenda. Businesses have already begun experiencing negative consequences from using several departmental or disparate Cloud solutions; enterprise processes begin to break down due to Cloud silos and data fragmentation. Our own proposition, as a Cloud Orchestrator, aims to help you navigate this quickly-evolving landscape without getting lost, being dazzled by

choices, or following ineffective routes. In Capgemini's view, Cloud is not just a technology issue. It's an opportunity for business to truly transform the way it works and even embrace new commercial models for growth – and solutions like Oracle ERP Cloud enable today's enterprises to transform and grow in this way.

Why Capgemini?

Oracle ERP Cloud has the potential to transform your business, and we work with you to minimize risks and costs in order to help you realize that potential leveraging our global practice of more than 13,000 Oracle expert consultants worldwide including more than 650 trained specialists on Oracle Cloud Applications. Not only are we founding members of Oracle's Cloud Advisory Committee, we were also selected for the Oracle Fusion Applications Beta program, which means we have deep product expertise and play a significant role in the development and enhancement of functionalities. A Global Diamond level partner, we're also recipients of several partnership awards and are recognized by leading industry analysts for our implementation experience. Our investments in an Oracle Center of Excellence and Oracle Solution Center allow us to reduce time-to-value and increase efficiency, and our Accelerated Solutions Environments are designed to unleash action plans in days rather than months.

Thanks to this expertise, we are confident that as your implementation partner, Capgemini can help you realize the true business value Oracle ERP Cloud has to offer.
