

Capgemini My Workspace powered by VMware AirWatch

Flexibility for mobile users to work their way while freeing IT from the burden of enterprise mobility management

My Workspace from Capgemini delivers a single, secure mobile workspace that enables employees to interact and access their data—anytime, anywhere and on any device. The enterprise-grade solution, powered by AirWatch, provides mobile users with a unique, personalized user-centric environment. Featuring secure email, browsing and “follow me” data, My Workspace protects and secures corporate assets without over-reaching into the users’ personal data.

The fully-managed solution also allows business leaders to focus on identifying new business opportunities and IT to reduce cost while delivering more productive solutions—while Capgemini and VMware ensure the system operates intelligently and efficiently to produce several key benefits for your business:

- Global data centers, service and support in all required regions and languages.
- Always-on access to business applications on the devices desired by employees and operating systems required by the business.
- Cloud-enabled platform and broad application ecosystem supports business processes beyond basic email and content propagation.
- Licensing that matches the business need and utilizes a monthly billing pay-as-you-go usage model.

Deliver A Personalized Mobile Experience

Custom-tailored for users and the needs of your business—the enterprise-grade, scalable and modular solution provides faster, more flexible, personalized access to business systems and data through the apps and devices users want—without limits imposed by IT.

- **Managed End-to-End Service Delivery:** No need to worry about hardware/software purchases, deployment, provisioning, configuration, administration and support; Capgemini takes care of it all, delivering end-user services predictably and cost-effectively.
- **Mobility that Grows with the Business:** Supports existing and future mobility initiatives in timeframes matching business needs, organizational readiness and budget. In a word – scalable.
- **Global, Regional and Cultural Presence:** Boots-on-the-ground in every global region with applications and support in the languages of choice.
- **Improved Decision Support:** Drive better IT outcomes and business processes through improved use of data and analysis.

Transform The Business Through Innovation

Leading cloud and mobile technologies—coupled with global services and support—deliver a new breed of user-centric mobility in a way that supports both existing and new business processes and IT infrastructures.

- **Transform Your Business:** Global, enterprise-grade performance with the broadest support for devices, operating systems and applications means any business process can be mobilized.
- **Mobility-as-a-Service:** Use only what the business requires, eliminating waste associated with overcapacity during peak periods such as end-of-quarter or seasonal sales cycles; never pay for idle systems or underutilized processes.
- **Reduced Costs:** Flexible, subscription-based pricing model reduces CapEx at set-up and eliminates unnecessary OpEx after deployment. Standardization brings consistency to the user experience and cost reduction to support services.
- **Quicker Time-to-Value:** The centralization and virtualization of services make it easier to deploy new services, so time-to-value for innovative services can be shortened and development simplified.

Rest Assured Your Data Remains Protected

My Workspace gives every user in every department in every region the freedom to conduct business collaboratively, efficiently and securely—from any device and without having to bypass IT policies and controls.

- **Exceed User Expectations—Securely:** Users drive innovation and look for ways to be more productive and efficient. My Workspace gives them the apps they need and a personalized mobile experience to work within while protecting the information and the systems that make it all possible.
- **Transform and Protect How Users Work:** Secure by design, application containerization ensures corporate data stays secure and separate from the end-user environment while mobile-user information stays protected and the user's unique mobile experience preserved.
- **Complete Secure Productivity Portfolio:** The broadest set of secure applications—including email, “follow me” content (documents, video, chat/social), browsing and remote display—coupled with the largest mobile app ecosystem on the market means users can get their work done without bypassing IT control.
