Capgemini positioned as a Global Leader by Zinnov for its Engineering, Research and Development Services

Paris, December 15, 2021 – [Capgemini](#) announced today that it has been positioned in the 'Leadership zone' by [Zinnov](#), a leading global management and strategy consulting firm, for the seventh year in a row for its overall Engineering, Research and Development (ER&D) prowess and capabilities.

Zinnov evaluated around 50 Global ER&D Service Providers, and has assessed them for their investments, client success and delivery capabilities for engineering services across specific geographies such as USA, Germany, and Japan.

The '[Zinnov Zones for ER&D Services – 2021](#)' ratings provides a comprehensive view of the global Engineering R&D (ER&D) space and the ER&D spending across several horizontal and vertical segments. Zinnov recognized Capgemini in the Leadership zone for its overall ER&D Services as well as horizontal-specific capabilities, including AI Engineering and Digital Engineering Services, along with its vertical capabilities across Aerospace, Automotive, Industrial, Enterprise Software, Semiconductor, Medical Devices, and Telecommunications.

"This recognition by Zinnov reaffirms Capgemini's commitment to deliver intelligent products and services by combining our world-class engineering, R&D, and digital manufacturing expertise for clients across industry verticals and markets. We are pleased to be a valuable partner to our clients in their journey towards Intelligent Industry, and harnessing the power of data to foster innovation, create new customer experiences and deliver new sources of value," said William Rozé, CEO of Capgemini's Engineering and member of the Group Executive Committee.

The report also recognized Capgemini's specialization across Telematics, Telehealth, Medical Devices, Software Cybersecurity, Software Platform Engineering, Software Defined Networking (SDN) and Network Function Virtualization (NFV), OTT, Advanced Driver Assistance Systems (ADAS), Digital Thread, Artificial Intelligence (AI) and Machine Learning (ML) – as a testament to its value proposition across the product engineering value chain and manufacturing domain.

Sidhant Rastogi, Managing Partner, Zinnov, said, *"Capgemini's engineering services division brings together robust domain and technology expertise, bolstered by a mature advisory and consulting arm. The launch of 'Capgemini Engineering' is based on the combined capability of both Capgemini and Altran. The firm's sharp focus on building intelligent industry capabilities has helped it anchor its leadership position in Zinnov Zones 2021 - across both Digital Engineering and IoT services. With a client presence across all high-growth verticals and a strong global talent pool, we believe Capgemini is well-positioned to grow rapidly."*

Zinnov Zones is an annual evaluation published by Zinnov, which rates Global Service Providers based on their competencies, capabilities, and market success. Since 2009, Zinnov Zones, previously known as Global Service Provider Ratings (GSPR), has become one of the most trusted reports globally, for both enterprises

and Service Providers to better understand the vendor ecosystem across multiple domains, such as digital transformation, ER&D services, IoT, RPA, and media and entertainment.
