

Accelerated Solutions Environment

Go Further. Faster. Together.

People matter, results count.

Why are **more than 50%** of Fortune 100 companies using Capgemini's Accelerated Solutions Environment (ASE) capability to solve their most complex business issues?

The world is becoming increasingly complex...

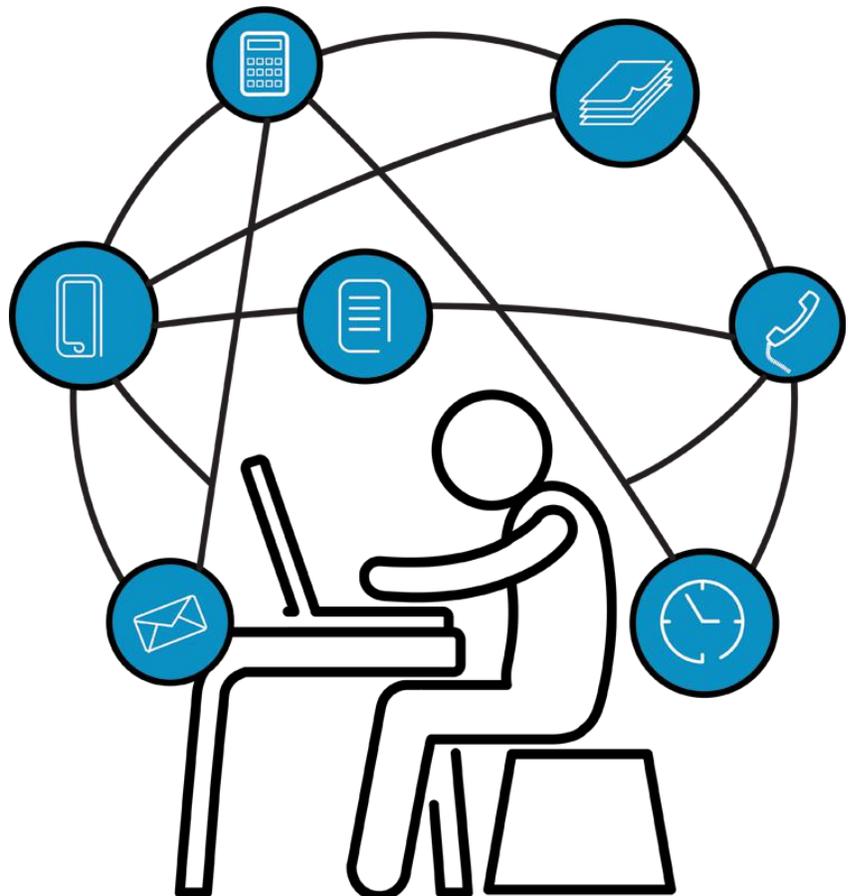

The rate of change inside and outside organizations is accelerating.

Success depends on the speed at which you can adapt and evolve.

Increasingly constrained resources need to deliver more for less by sustaining their current business alongside faster growth and innovation.

The scale and reach of mission critical decisions is increasing exponentially. Decisions need to be made quickly across entire systems; stakeholders need to be engaged across organizations and geographies.

The need to make the most of the capability and capacity of your organization is a key strategic imperative.

Imagine a world where...

- you **design solutions** and **make decisions** using the best possible **knowledge** and **people**
- you have **certainty** in the **decisions** you make and they stick
- you achieve **stakeholder alignment** quickly to **create ownership** that makes **change happen**
- you and your people are not only **productive**, you **perform**
- you deliver months of work in a matter of days, achieving **results you've never achieved before**

Welcome to the Accelerated Solutions Environment

Term: Financial Services

Define it:

- * MONEY MANAGEMENT
- * RECESSION
- * FUTURE DIGITAL MODELING
- * ORG DESIGN
- * APPS.

Why use the ASE?

The ASE enables you to get exceptional results more quickly. We are the flagship capability for creating a profound shift in the performance of your organization.

We have a 20 year track record of success and a capability that is truly embedded in the way we work and deliver programs.

Clients continue to come back because we deliver these three things...

1 2 3

Alignment & Ownership

Rapidly align and mobilize large teams in a matter of days. Empower multiple stakeholders to understand and design the change that they will deliver collectively.

Acceleration, Productivity & Performance

Make business decisions in hours and days, rather than months and years. Develop them through collaboration in a knowledge rich environment. Make sure those solutions and decisions stick.

Reduced Risk

Understand and surface risks early. Use collaboration to generate broad commitment to implementing solutions that overcome organizational, cultural and political barriers.

why | how | what

How does the ASE work?

The ASE delivers results through the unique and powerful combination of 5 key elements.

What is the ASE capability?

1 People

We work with you to bring your “whole system” into the room: decision-makers, champions, and influencers – often 30-100+ people across your organization, as well as suppliers, partners, and customers. Experienced facilitators embed collaboration and design work to profoundly accelerate results, building broad alignment, reducing buy-off time, and creating new communication channels.

2 Environment

Our remarkably flexible environments are tailored to foster creativity and collaboration, enabling the group to overcome organizational, cultural, and political barriers to make decisions that stick.

3 Insights

To reach the strongest decisions we believe you need the best possible knowledge, presented in the most compelling way. We work with you to define that, then use our visual facilitation capabilities to present and communicate it most effectively.

4 Collaborative Technologies

State of the art technologies are embedded within our environment, driving greater productivity and making collaboration seamless – across the room, country, and globe in real-time.

5 Method & Process

Our unique method and process has been developed over 20 years and is built on three key principles:

- People believe in what they design and own what they create
- More people speed us up – bring the “whole system” into the room
- All of us are smarter than any one of us – it is possible to tap into collective intelligence

By blending these elements, we create an experiential journey that drives exponential value for your organization.

A man with short, light-colored hair is smiling broadly. He is wearing a dark suit jacket over a light blue and white striped button-down shirt. He is holding a large, colorful bouquet of pens in his left hand. The pens are in various colors (red, yellow, green, blue, purple) and are arranged in a fan-like shape. He also has a name tag on his lapel. The background is blurred, showing what appears to be a trade show or conference setting with a red and white banner.

“I never imagined
how liberating the
environment and
process would be.”

PRESIDENT | The Coca-Cola Company

“We collectively changed
our culture in 3 days!”

PARTICIPANT | QSR Company

We have the strongest
capability of this type
anywhere in the
market, delivering...

...over
6,000
events

...for
1,000
different clients

...with over
50%
of Fortune 100
