

## Columbia Advanced Technology and Development Center

# Cloud: building agility, innovation, and growth

Cloud-first strategies transform traditional IT into agile platforms for innovation, disruption, and growth. Building a cloud core lays the foundation for digital agility and

gives you a competitive edge. Cloud frees you from legacy IT constraints and helps modernize systems while operating more efficiently. Cloud-native skills are critical for delivering innovative born-in-the-cloud solution engagements. The [digital talent gap](#) is no longer just an HR issue; it is an organization-wide phenomenon that affects all areas of the business.

### Why cloud in Columbia, S.C.?

Companies want to leverage new tools for analysis, insight, and intelligent automation, so their creative energies can turn to imagining and realizing new ways of doing business: new sources of growth, new business channels, new customer insights, and new ways to delight customers.

While cloud-native skills are critical for delivering these new solutions, they can be hard to find and retain. Our talented team of experienced professionals and new graduates help you meet the need for skills in critical in-demand areas such as cloud-native, cloud integration, and cloud adoption, including engineering, DevOps and service delivery management.

Our business and technology expertise allows you to develop and execute a cloud strategy and manage the hybrid world that results, while keeping everything secure.

## Our partners

Cloud partners deliver training and partner-specific solutions in Columbia. Our partners include:

- AWS
- Microsoft
- MuleSoft
- Redhat
- Pivotal

## Leverage cloud talent at Columbia

Columbia is an advanced technology and development center and provides highly-skilled resources with cloud expertise available on-demand, 24/7, with an outcome-based delivery model. The center is a high-touch development team delivering Sprint-as-a-Service for companies choosing off-site support and near time-zone support requirements.

## Test your cloud roadmap

Simplify the planning process. Discover how cloud works best in your organization and engage with a talented team to bring solutions to life. Explore emerging cloud technologies and choose the right transformation path. The center can provide quick proof-of-concepts and demonstrations for modernizing or re-platforming apps to Platform-as-a-Service (PaaS). It shortens timelines and helps lay the groundwork for the capabilities, approach and technology stack to be used.

## Accelerate your cloud journey

The center houses reusable assets from implementations deployed worldwide to help accelerate projects. As part of Capgemini's global network of delivery centers, it has access to best practices and additional accelerators. By sharing expertise across active projects, Capgemini delivers greater value to clients.
