

Transform your future with Capgemini and Oracle

True end-to-end business transformation

Today's rapidly digitizing world has created a demand for a partner that can do it all, from innovation to strategy development to back-end services. As a result, almost every technology services company promises that it can transform your business from end to end. But experience and expertise across every stage of transformation, in a wide array of sectors – that's rare.

Capgemini certifications

- Oracle Platinum Partner
- Oracle Cloud Premier Partner
- Oracle Cloud Excellence Implementer accreditation
- Oracle Certified Managed Services Provider

Some companies specialize in advisory and project services. Others know how to run and manage services, but fall short on the front end. Capgemini delivers across the board, keeping our promises and backing up our claims with proven success stories from business transformations worldwide. Through strategic acquisitions, such as Fahrenheit 212 and Liquid Hub to form Capgemini Invent, we have taken our half-century of technical expertise and expanded it to become a global leader in consulting, managed services, and digital transformation.

One of the keys to our success – and that of our customers – is our 25-year partnership with Oracle, the world's top provider of enterprise software, including advanced solutions for business transformation. Capgemini's team knows Oracle inside and out: not only the basics of implementation but also how to optimize for maximum ROI and to ensure continuous success. With a dedicated team featuring more than 15,000 Oracle-trained resources across 20 countries, we have the experience and expertise to optimize Oracle solutions as part of business transformations that truly extend from one end of your business to the other.

Proven business outcomes

The true test of excellence for Capgemini and Oracle is our clients' success across different industries and a wide range of business and technological challenges. Some examples include:

Building a modern enterprise

A global leader across diversified industries is using Capgemini's **RapidUpgrade2Cloud** toolset to quickly migrate hundreds of entities from on-premises Oracle E-Business Suite to Oracle Cloud. The toolset provided an automated, low-risk migration that accelerated cost savings.

Creating a connected enterprise

One of the world's largest retailers was suffering from low customer retention and needed a subscription revenue stream that would strengthen its relationship with customers. As part of a cloud transformation project, Capgemini implemented Oracle Supply Chain Management Cloud and other Oracle solutions that enhanced customers' digital experiences and took the company from zero to 75,000 subscribers within three months.

Improving customer experience

Capgemini helped a medical technology leader migrate its legacy sales processes to Oracle Sales Cloud and optimize its features to improve agent performance and efficiency. In addition, Capgemini helped plan the worldwide rollout, including country-specific functionality, and consulted with the client on data analytics and integration.

To find out how your organization can get started on the path to Oracle Cloud migration, please contact:

How Capgemini delivers value for you

Capgemini accelerates business transformations by offering a full spectrum of services across the Oracle solutions life cycle – building your business case for transformation, developing your cloud road map, and deploying the right solutions at the right time.

Four pillars are critical to our proven ability to deliver value at every point in your journey:

- 1. A sector-based approach:** Through subject-matter experts and the Capgemini Research Institute, we build industry-specific solutions that lead to better outcomes.
- 2. Capgemini Invent:** Our multidisciplinary team of 6,000 data scientists, creators, developers, and industry consultants identifies what's next – and builds it.
- 3. Specialized centers:** Our global network of specialized centers develops concepts, then applies them to client environments and brings them to market.
- 4. End-to-end capabilities:** We have built the capability to address business problems across all functional areas of our clients' businesses, from insights and data to product engineering, testing, and customer engagement. We layer our industry expertise over each of these areas to maintain focus on our clients' business challenges.

Your partner in transformation

With decades of experience with leading enterprises in nearly every sector, Capgemini is ready to partner in your business transformation using the latest Oracle applications and technology. Our full spectrum of services, a dedicated global team and tailor-made solutions can accelerate your journey to the digital future – providing expertise in transformations that are truly end to end – to ensure that your business stays at the leading edge of efficiency and cost-effectiveness.

Our clients:

- **27 of the world's 30 largest consumer products companies**
- **12 of the top 15 largest automotive suppliers**
- **6 of the top 10 consumer finance companies**
- **300 leading retailers**
