

Automated Control For Reliable Smart Metering Services

Helping you efficiently deliver your smart device programs using our proven system and processes whilst ensuring end user satisfaction.

Capgemini's **Smart Energy Services Platform** (SES Platform) is an off-the-shelf solution that enables different players in the Smart Metering environment to talk to each other. This includes utility ERP and billing systems, Meter Data Management (MDM) systems, material logistics systems, field services and customer call centres.

SES Platform is the only proven end-to-end integrated workflow engine that manages the entire Smart Metering lifecycle, from program planning, meter rollout, and operations through to maintenance.

In real time, SES Platform tracks asset inventory, manages work order execution, controls material and field service logistics, monitors status and performance remotely and delivers meter values.

SES Platform ensures a high level of transparency, accuracy, and meter activations, resulting in substantial cost savings across the entire Smart Metering supply chain, even when it is executed by third-party service providers.

As a multi-utility, multi-client platform, SES Platform is highly configurable and flexible. It takes into account different functional and regulatory requirements that apply to different geographies.

Since 2002, SES Platform has evolved from a Smart Meter rollout planning tool into a fully-fledged Smart Meter management system. Its design has been influenced by the experience of managing the rollout of millions of Smart Meters in Sweden: Europe's most mature Smart Meter territory.

Why SES Platform?

Since our pricing is based on usage and functionality used, SES Platform offers the best value for money. Capgemini also offers turnkey services with SES Platform at the heart of the system.

SES Platform is meter manufacturer agnostic and supports multiple communication protocols including GPRS, PLC and radio.

About Capgemini

With around 125,000 people in 44 countries, Capgemini is one of the world's foremost providers of consulting, technology and outsourcing services. The Group reported 2012 global revenues of EUR 10.3 billion.

Together with its clients, Capgemini creates and delivers business and technology solutions that fit their needs and drive the results they want.

A deeply multicultural organization, Capgemini has developed its own way of working, the Collaborative Business Experience™, and draws on Rightshore® , its worldwide delivery model.

Capgemini's **Global Utilities Sector** serves the top Utilities worldwide and draws on a network of more than 8,900 dedicated sector consultants. As a leader in smart grid and advanced metering infrastructure solutions, Capgemini's **Smart Energy Services** is helping Utility customers throughout the world. Our integrated **Digital Utilities Transformation** framework empowers utilities to drastically improve their customer experience, operating and business models through disruptive technologies.
