

# Adopting a pure-cloud or hybrid ERP model with Capgemini's ERPAdvantage

In today's global economy, businesses rely on enterprise resource planning (ERP) as the mainstay of their operations to ensure standardization, collaboration, and efficiency. ERP systems are expected to reduce costs, provide greater visibility, and improve compliance. Well-functioning ERP systems should increase process automation and decrease time spent reporting and reworking.

In reality, managing traditional, on-premise ERP software can be time-consuming, costly, and inefficient, especially when there are non-standard business processes across geographies, disparate systems that need to be upgraded, and multiple licenses and vendor relationships that need to be maintained. It's even more concerning that at a time when industry disruptors are leveraging the digital and cloud technologies to get ahead, on-premise ERP can inhibit innovation, agility, and ultimately, competitiveness.

## Bringing your ERP to the 21st century

Capgemini understands these challenges and recognizes that you need an ERP solution that allows you to take advantage of the agility and cost efficiencies associated with cloud computing. Capgemini's ERPAdvantage offers a solution that enables enterprises to successfully integrate traditional ERP functions with cloud capabilities or completely move their finance and procurement functions to the cloud.

ERPAdvantage includes:

- **Integration of on-premise and cloud:** Provides the correct combination of on-premise and Software as a Service (SaaS) while leveraging Platform as a Service (PaaS) with Capgemini's COMPLETE (Capgemini **O**rchestration **M**anagement **P**latform **E**nd To **E**nd) to reduce implementation time
- **Pure SaaS options:** Helps you move completely to the cloud for back-office functions in alignment with business needs
- **Application configuration accelerators:** Offers a standard set of reusable assets as part of the proof-of-concept

environment including configurations for a co-existence strategy with Oracle E-Business Suite 12.2.4 and Oracle Cloud

- **Best practice process mapping:** Leverages pre-built standard process designs per industry best practices and prior implementation experience that reduce risk, configuration and customization, and support industry standards
- **Pre-built training materials:** Documents business processes as flexible learning materials that can be delivered in instructor-led sessions or utilized in self-study mode

Because ERPAdvantage includes industrialized methods, assets, and accelerators as well as Capgemini's portfolio of PaaS, SaaS, and Infrastructure as a Service (IaaS) offerings, it allows you to adopt Oracle Cloud very rapidly. It also reduces risk thanks to a pre-packaged scope and a set of templates that include process design and training. Additionally, subscription-based pricing and pre-configured solutions means that you can significantly reduce costs and project timelines. In addition to a hybrid model, ERPAdvantage allows enterprises to shift their financials and procurement functions completely to the cloud.

## Complete back-office transformation with an ERPAdvantage hybrid model

Capgemini's ERPAdvantage delivered as a hybrid model integrates on-premise ERP for central corporate functions with SaaS for divisions, subsidiaries, and shared functions. Beyond reducing IT cost, it enables companies to adopt some of today's cloud-enabled best practices to improve the agility, effectiveness, and value of their finance and procurement functions and drive transformation.

## Modernizing financial processes with ERPAdvantage for Oracle Financials Cloud

Capgemini's ERPAdvantage for financials is a cloud solution that helps finance departments leverage the Oracle Financials Cloud for greater agility and reduced costs. It includes Capgemini tools and accelerators to streamline the implementation of financial business processes on the cloud for efficient, real-time analytics, faster reporting, and increased user adoption of finance tools.

## Streamlining procurement with ERPAdvantage for Oracle Procurement Cloud

Capgemini's ERPAdvantage for procurement is a cloud solution that allows companies to leverage Oracle Procurement Cloud to gain access to real-time buying information, increase visibility, ensure optimal industry levels, better define negotiating

processes, and create complex contracts and approvals. ERPAdvantage accelerates implementation with a pre-configured environment and asset kit based on industry best practices and processes.

## Why Capgemini?

With over 13,500 Oracle expert consultants worldwide and more than 650 trained specialists for Oracle cloud applications, Capgemini is well-positioned to help companies take their traditional ERP to the cloud with Oracle Financials Cloud and Oracle Procurement Cloud. Our consultants have deep industry, cloud, and business process expertise to help you realize the business value of ERP cloud implementations regardless of size, sector, or business requirements.

Capgemini is an Oracle Diamond level partner and founding member of Oracle's Cloud Advisory Committee. Capgemini uses its Oracle Center of Excellence and Oracle Solution Center to create valuable solutions built on Oracle technology, develop repetitive and common functionality to increase time to value, and build Capgemini Intellectual Property. ERPAdvantage leverages the strength of the Capgemini and Oracle partnership into viable and innovative solutions for enterprises.
