

Capgemini and HP Inc.

Retail

Business Challenge: You want to stay competitive and provide an ideal customer experience throughout the consumer lifecycle.

Response to the challenge: Progressive, proven solutions that can improve the in-store customer experience, increase brand loyalty, and sustain a healthier bottom line.

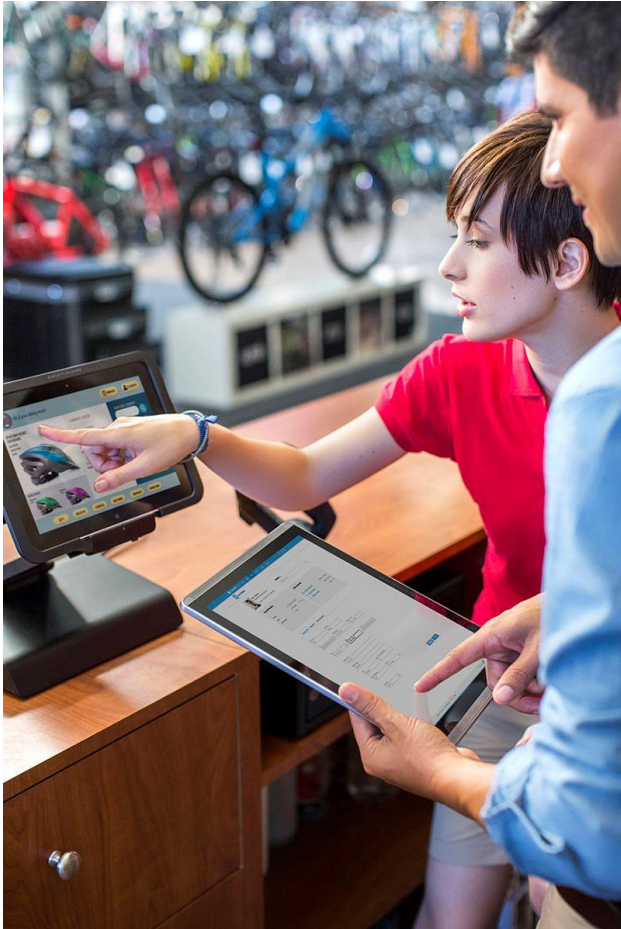

Capgemini and HP Inc.

Improve and personalize the customer's experience to increase brand loyalty

Retail

- Broad range of solutions that empower associates with the right information at the right time creating quicker checkouts and personalized customer experiences
- Progressive solutions that can transition you from traditional solutions to today's Mobile POS, Tabletop POS, etc.
- Successful in-store digital transformation by providing tested, modernized hardware solutions
- Compatible with the major RPOS software (Aptos, Micros, etc.) and relationships with major software providers to design with compatibility in mind
- Capability to design, test, certify and implement proprietary software and leverage an extensive ISV ecosystem
- Ongoing retail analytics for additional insight into consumer base
- World-class supply chain and volume to lower cost and drive new technology
- Open standards with the ability for complex global roll-outs
- Wide selection of traditional depot services; e.g. image loading, asset tagging, installation
- World-class warranty and round the clock support
