Increasing the cognitive efficiency of product usage and serviceability of a complex engineering product is becoming a challenge.

Traditional methods of developing and publishing Technical Content through static set of digital content published as PDF or web content are being challenged by increased product complexity, product variants and service revisions currently provided.

**Capgemini’s DTCM**

Capgemini’s DTCM is an evolution in consuming and managing technical content by bringing an element of interaction to virtualized products. DTCM enables simplification and visualization of work instructions for both product use and product serviceability. DTCM initiates a digital transformation through modernization of legacy technical data to compatible standards and formats, including 3D models integrated with animation.

Capgemini offers both traditional and Digital Services based on the maturity level of the organization’s existing technical content management setup.

**Capgemini’s Value Proposition for DTCM**

We have built expertise, developed core competency and accelerators which help in adding value to your needs of digital technical content of complex products, including documentation, training and service delivery.
