

Revamp your Application Portfolio with Capgemini's Application Modernization Offering for Oracle Engineered Systems

Digital technologies offer unprecedented opportunities for enterprises to increase competitiveness and profitability, and organizations everywhere are eagerly looking to embrace new ways of working and engaging in order to get ahead. However, with these possibilities comes a meteoric rise in data and traffic, and most legacy applications cannot keep up. Not only is old, out-of-date technology lacking in performance, but it doesn't integrate well with new technologies and requires costly maintenance that consumes valuable resources, often crippling innovation. Effectively, IT assets that were originally designed to deliver a competitive edge may actually be your biggest liability in today's rapidly changing IT landscape.

Simplify with Capgemini's Application Modernization solution for Oracle Engineered Systems

Capgemini's application modernization solution offering for Oracle engineered systems allows you to revamp your ecosystem with a simplified application portfolio and smaller infrastructure footprint that reduces costs, improves performance, and enables the adoption of new and emerging technologies. We work with you to define the roadmap to a more streamlined application landscape, and as we migrate your data, upgrade your software, and consolidate your environments, we leverage industrialized templates to save you time and money. We also implement a monitoring and management solution leveraging Oracle Enterprise Manager and provide support and maintenance so you can direct more of your valuable resources towards innovation.

Lay the groundwork for the cloud and other disruptive technologies

A modernized application landscape provides a service-oriented architecture and facilitates the adoption of new and emerging technologies, such as a self-service-based private cloud, to enable you to better respond to increasing customer demands in secure, scalable, and cost-effective environments. It also creates better business-IT alignment and lays the groundwork for organizational efficiencies, such as full-scale outsourcing. Other benefits of application modernization include:

- **Faster speed-to-market**, with reduced transaction bottlenecks and elimination of overnight batch processing
- **Reduced total cost of ownership**, thanks to the reduction in hardware and software that needs to be maintained
- **Improved performance** thanks to Oracle engineered systems

Capgemini's Application Modernization offering at work

Capgemini experienced the benefits of application modernization with Oracle engineered Systems firsthand when we moved our global financial reporting system to Oracle Exadata. This addition led to a fourfold decrease in reporting times and an 100% increase in reporting volumes and performance. As a result, thousands of users from dozens of different countries who were used to local autonomy were able to buy into a global, centrally organized shared services system. We bring this insider expertise and broad experience to every implementation of Oracle Engineered Systems.

Partners in Business Transformation

In addition to our experience, Capgemini has the expertise and capabilities to make every Oracle engineered systems project a success. We operate an Oracle Engineered Systems Center of Excellence that supports our global team of Oracle engineered systems solution architects and over 200 trained delivery resources, helping capture and apply industry best practices and share learning from our numerous engagements.

These capabilities, supported by our global team of over 13,500 consultants and our status as an Oracle Diamond-level partner, ensure that we can help any enterprise, no matter the industry, adopt Oracle engineered systems to realize the value of a simplified IT landscape.

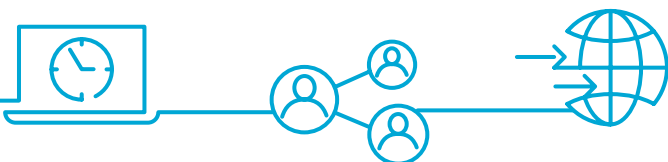

About Capgemini

Now with 180,000 people in over 40 countries, Capgemini is one of the world's foremost providers of consulting, technology and outsourcing services. The Group reported 2014 global revenues of EUR 10.573 billion.

Together with its clients, Capgemini creates and delivers business, technology and digital solutions that fit their needs, enabling them to achieve innovation and competitiveness. A deeply multicultural organization, Capgemini has developed its own way of working, the Collaborative Business Experience™, and draws on Rightshore®, its worldwide delivery model.
