

# Insider Risk Management Course

## Essential Organization Protection

### Insider Risk Management Course

Today's organizations often struggle to manage complex insider risk challenges independently. Although most cyber and risk professionals are well aware of the severe impacts an insider can have on their organization, many often lack the internal resources or expertise to develop a comprehensive insider risk management plan, or effectively respond to alleged or suspected insider activity.

This eight-hour course will focus on how aggregated Key Risk Indicators (KRIs) collected from technical, behavioral, and third-party data sources enable an organization to forecast and, ideally, interrupt the idea-to-action continuum that may lead to detrimental events.

### What is the Insider Risk Management Course?

The Insider Risk Management Course, introduces Insider Risk Program stakeholders, program personnel, and security professionals to the complexities of insider risk. Participants discover how an Insider Risk Program is essential to protecting an organization from intellectual property theft, sabotage, and workplace violence by employees and Trusted Business Partners. Instruction on the appropriate management of privacy and legal issues and their impact on an Insider Risk Program are also covered. This course culminates with the participants examining realistic scenarios to evaluate and triage KRIs leading to the escalation decision-making paradigm.

### Who Should Attend?

This course is ideal for organizational Insider Risk Management stakeholders and program personnel, information and physical security personnel, human resources employees, individuals with enterprise risk management functions, ethics, and compliance investigators, legal counsel, and line managers.

### INSIDER RISK MANAGEMENT COURSE PROGRAM POTENTIAL BENEFITS

- Introduces insider risk program complexities
- Focuses on aggregated KRIs and the management of privacy and legal issues
- Examines realistic scenarios to evaluate and triage KRIs
- Learn how a holistic, Insider Risk Program will:
  - Protect critical assets and prevent loss of intellectual and proprietary property, confidential data, or customer information
  - Maintain customer and shareholder confidence
  - Avoid immediate or future loss of revenue
  - Prevent overall harm to an organization's brand image and reputation
  - Data collection, storage, use, and access requirements
  - Identification of data sensitivity issues to include individual reputation damage concerns

## WHAT ARE GOALS OF THE INSIDER RISK MANAGEMENT COURSE?
