

Pega COVID-19 Employee Safety and Business Continuity Tracker

Help your workforce stay healthy with the Pega low-code emergency-response app

At Capgemini, we know that speed and accuracy are critical elements in times of crisis. As COVID-19 spreads, organizations need a scalable and flexible solution to ensure the health and safety of employees.

Leverage the power of the Pega Platform

Pegasystems, the software company empowering digital transformation at the world's leading enterprises, developed and deployed an emergency-response app built on Pega Platform. As a proud Pega partner, we are excited to offer support for this solution to our valued customers.

The application enables organizations to maintain the wellbeing of their employees and customers while also helping mitigate their business risks. The Pega COVID-19 Employee Safety and Business Continuity Tracker allows clients across any industry to easily customize for different risk scenarios to meet the unique needs and policies of their own businesses.

Make informed decisions to keep employees safe and business moving forward with live dashboards that highlight the scope of COVID-19 exposure in your workforce and the impact it may have on operations. Self-reporting assessments feed into the dashboard to trigger automated actions that guide affected employees, their managers, and human resources with instructions on how to manage their situation.

Pre-built automated workflows drive customizable actions, such as:

- Analysis of employees' risk levels (high, medium, or low) based on screening questions
- Tailored instructions to the affected employee based on their risk level
- Alerts to applicable managers and HR on newly assessed employees
- Checklists for HR managers with actions for affected employees
- Estimation of return-to-work date for employees
- Employee reminders to update COVID-19 health status.

Key features

The COVID-19 Employee Safety and Business Continuity Tracker app is an out-of-the-box accelerator that can be modified based on the unique needs of your business. Available in English, French, German, Italian, and Spanish, organizations can use it to:

- Enable employees to notify their employer of their health status
- Take action as each employee's status changes
- Manage employee availability for on-site or remote work
- Track how many employees have been exposed to COVID-19, tested, or self-quarantined
- Help healthy employees reenter the workforce.

Clients can quickly configure the Pega app and integrate it with existing systems, including HR and scheduling, to perform additional functions such as:

- Identify employees who might have been exposed to an infected worker
- Continuity planning to maintain ongoing work with unaffected staff
- Send alerts to departments which need to take action.
