

# Trusted Data Exchange for Know Your Supplier

Enhanced supplier relationships  
and supply chain optimization through  
improved KYS data collection

**Accelerated**  
*time-to-market*

**Improved** mitigation of  
*supply chain disruption and  
reputational risk*

**Enhanced** supplier collaboration  
*and network maps*

**Increased** integration with  
*third-party data providers*

As organizations increasingly become connected in business ecosystems of partners, secure data sharing around relational and transactional processes is becoming critical for B2B interactions.

Organizations are looking to connect their thousands of suppliers in a secure and traceable way to collect data and documents via Know Your Supplier (KYS) questionnaires. These interactions are critical to enable and assess supplier authentication and suitability, and mitigate the risk of supply chain disruption or reputational damage.

To solve these challenges, organizations are leveraging blockchain technology to facilitate connectivity and trusted data exchange between business ecosystems, enabling a new kind of database that leverages intelligent automation and process optimization to store and trace data in a distributed, verified, and secure way.

## Enable secure and structured data exchange with your business ecosystem

Capgemini's Trusted Data Exchange for Know Your Supplier digitally connects your ecosystem of suppliers and partners to enable structured data exchange in a trusted, private, traceable, and secure way.

Our solution integrates seamlessly to your existing systems to support complex digital KYS workflows that provide enhanced control and optimization of your supply chain through improving your KYS data collection.

By streamlining and automating your processes, our solution enables a tamper-proof audit trail and end-to-end traceability that delivers enhanced visibility over your entire KYS process. In turn, this helps you implement – what we call – a Frictionless Enterprise.

## The Frictionless Enterprise

The Frictionless Enterprise seamlessly connects processes and people, intelligently, as and when needed. It dynamically adapts to your organization's circumstances to address each and every point of friction in your business operations.

At Capgemini, we have applied the Frictionless Enterprise to enhance cohesion across our entire suite of products and services. This enables us to respond rapidly to your changing requirements and deliver your specific business outcomes in a value-focused way.

We implement ways to detect, prevent, and overcome frictions – leveraging our latest thinking, organizational design, and intelligent solutions to achieve our goal of effortless operations.

## Enhanced operational efficiency and supply chain visibility

Capgemini's Trusted Data Exchange for Know Your Supplier improves your operational efficiency by streamlining and automating your processes to provide enhanced visibility over your entire supply chain.

Reputational and operational risks are mitigated through enhanced data quality and improved certificates sourcing, while reporting on the social and environmental impact is facilitated through an end-to-end and tamper-proof audit trail. KYS tasks such as the ability to digitally visualize supplier network maps are improved through the implementation of state-of-the-art interfaces and integration with third-party data providers.

All of this delivers a range of business outcomes, including:

- Accelerated time-to-business
- Improved mitigation of supply chain disruption and reputational risk
- Enhanced supplier collaboration and network maps
- Increased integration with third-party data providers
