

Trusted Data Exchange for Procure-to-Pay

Rapid, real-time reconciliation and dispute management resolution through improved P2P data collection

Accelerated
real-time matching

Enhanced cash visibility

Increased end-to-end traceability

Improved mitigation of regulatory risk

As organizations increasingly become connected in business ecosystems of partners, secure data sharing around relational and transactional processes is becoming critical for B2B interactions.

Organizations are looking to seamlessly connect their thousands of suppliers in a secure and traceable way, in order to reconcile purchase orders, invoices, receipts, and payments, and receive up-to-date and accurate data from supplier IT systems.

To solve these challenges, organizations are leveraging blockchain technology to facilitate connectivity and trusted data exchange between business ecosystems, enabling a new kind of database that leverages intelligent automation and process optimization to store and trace data in a distributed, verified, and secure way.

Enable secure and structured data exchange with your business ecosystem

Capgemini's Trusted Data Exchange for Procure-to-Pay (P2P) digitally connects your ecosystem of clients and partners involved in the P2P process to enable structured data exchange in a trusted, private, traceable, and secure way.

Our solution integrates seamlessly to your existing systems to support complex digital P2P workflows that enhance customer experience and mitigate your regulatory risk through improving your P2P data collection.

By streamlining and automating your processes, our solution enables a tamper-proof audit trail and end-to-end traceability that delivers enhanced visibility over your entire P2P process, from purchase order to payment. In turn, this helps you implement – what we call – a Frictionless Enterprise.

The Frictionless Enterprise

The Frictionless Enterprise seamlessly connects processes and people, intelligently, as and when needed. It dynamically adapts to your organization's circumstances to address each and every point of friction in your business operations.

At Capgemini, we have applied the Frictionless Enterprise to enhance cohesion across our entire suite of products and services. This enables us to respond rapidly to your changing requirements and deliver your specific business outcomes in a value-focused way.

We implement ways to detect, prevent, and overcome frictions – leveraging our latest thinking, organizational design, and intelligent solutions to achieve our goal of effortless operations.

Enhanced operational efficiency and P2P visibility

Capgemini's Trusted Data Exchange for Procure-to-Pay improves your operational efficiency by streamlining and automating your processes to provide enhanced visibility and control over your entire P2P process.

Compliance risk is mitigated through enhanced data quality and enhanced P2P information sourcing, while regulatory reporting is facilitated through an end-to-end and tamper-proof audit trail. P2P tasks such as real-time matching between process orders and invoices are accelerated through improved data collection and integration with third-party data providers.

All of this delivers a range of business outcomes, including:

- Accelerated real-time matching
- Enhanced cash visibility
- Increased end-to-end traceability
- Improved mitigation of regulatory risk.
