Capgemini is selected by Terumo BCT to deliver global innovation and development centers

Capgemini to help Terumo BCT develop the next-generation of connected medical devices

Paris, February 26, 2018 – Capgemini today announced that it has been selected by Terumo BCT, a U.S.-based global leader in blood component, therapeutic apheresis and cellular technologies, to set up two global innovation and development (I&D) centers in India. Working together, Capgemini and Terumo BCT will use the I&D centers to help build next-generation platforms for Terumo BCT’s devices.

Capgemini was selected, due to its knowledge of the medical devices sector, its expertise in innovative technologies for next-generation connected healthcare, including the Internet of Things (IoT), and artificial intelligence (AI), as well as its agility and ability to scale for a faster launch to market. Under the agreement, Capgemini will deliver a multi-disciplinary engagement across research and development, product engineering, and usability engineering.

"As technology helps us unlock the potential of blood and cellular therapies, it makes perfect sense for us to collaborate with Capgemini. Their global expertise and best practices from other industries will help us bring about the next-generation of connected medical devices," said Palani Palaniappan, Executive Vice President, Innovation and Development, Terumo BCT.

With its innovations, U.S.-based Terumo BCT serves blood centers, hospitals, therapeutic apheresis clinics, cell collection and processing organizations, researchers and private medical practices in more than 130 countries.

"Capgemini is a trusted engineering partner for medical device companies, helping to enable the digital transformation of their products to address the changing needs of a connected healthcare ecosystem," said Sanjay Salunkhe, Global Head of Product and Engineering Services, Capgemini. "We are pleased to have been selected by Terumo BCT to help develop innovations that could become industry standards, improve clinical outcomes and lower the costs for their customers."

About Capgemini

A global leader in consulting, technology services and digital transformation, Capgemini is at the forefront of innovation to address the entire breadth of clients’ opportunities in the evolving world of cloud, digital and platforms. Building on its strong 50-year heritage and deep industry-specific expertise, Capgemini enables organizations to realize their business ambitions through an array of services from strategy to operations. Capgemini is driven by the conviction that the business value of technology comes from and through people. It is a multicultural company of 200,000 team members in over 40 countries. The Group reported 2017 global revenues of EUR 12.8 billion.
