Andy³ᴰ

Immersive Remote Assistance Platform
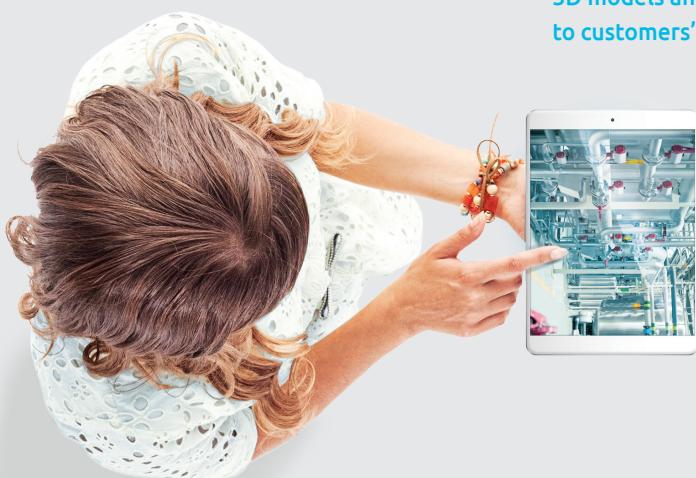

Andy³ᴰ

Bridging the gap between digital and physical worlds for workers in mobility

At a time when collective intelligence will make the difference, **Andy³ᴰ** is specifically designed for human behaviors in mobility. By using multi-media channels and exchanging digital data, in real time and in the field, our remote assistance platform reduces mistakes and improves cycles times.

This solution enhances:

- Collaboration and knowledge sharing, between workers in mobility – in-situ or on customers' sites – and remote center of excellence, such as Engineering, Maintenance and Customer services.

- Digital-physical convergence throughout all development phases: Prototyping, Industrialization, Validation, Launching, Inspection and Maintenance.

- Full handling of operations both in products and infrastructures worlds.

Andy³ᴰ is the only remote assistance platform providing digital continuity of 3D models and being fully customizable to customers' IT environment.

Audio and video live streams, chat and file sharing

Andy³ᴰ

From remote assistance...

- Audio and video live streams, chat and file sharing
- 3/4/5G and Wifi connectivity and low band compatible
- Multi-device and multi-OS availability
- Secured files transfer and user identification
- Ergonomic and intuitive user interface
- Session recording for later playback and capitalization
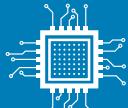

... to remote and immersive intelligence:

- Augmented Reality on the field and Virtual Reality for remote experts
- Deployed with Hololens for hands-free interaction (integrated camera and microphone)
- Collaboration and 3D continuity with models' annotation
- Cloud integration on premise or on dedicated datacenter

Capgemini

Andy³ᴰ

A Capgemini platform to be tailored to your needs and integrated in your IT landscape

- Top performance components and architecture: Microsoft, Unity, WebRTC, Open Cascade, open sources

- No third party software licensing

- Plug and Play deployment

Andy³ᴰ, a platform that comes in handy

About
