Companies need to keep up with the speed of business. In this customer-first era, there is an ever-increasing demand to innovate faster to meet evolving expectations. To deliver innovative offerings at an accelerated pace, companies need connectivity to move faster.

A global leader in consulting, technology services, and digital transformation, Capgemini is at the forefront of innovation to address the entire breadth of clients’ opportunities in the evolving world of cloud, digital, and platforms.
Why upgrade to Mule 4?

Many businesses find it hard to plan and perform MuleSoft upgrades, whether it is a shortage of skills or time. No matter what your needs are, we can help move your business onto the next high-performing generation of MuleSoft.

Leverage our MuleSoft expertise to optimise

Capgemini has developed a Delivery Methodology for Mule 4 Migration based on our experiences and learnings from early engagements with Mule 3 to Mule 4 migrations as well as migrations from other platforms including webMethods, Tibco Oracle Fusion, Biztalk and other legacy integration platforms.

We believe a staged approach is the most effective way to maximise the migration outcome and lower the risk on what is often a complex exercise.

Discover - Compile an inventory of MuleSoft Applications and understand the level of customisation and technical Debt.

Prove - Run a short Migration Pilot to migrate a set of APIs that typify the current APIs on the platform, whether they are Batch, Real-time, or Message Oriented Patterns.
Capgemini offer solutions at any stage of your MuleSoft lifecycle

Migratet - Feed in lessons learnt from Pilot migration and size up the broader set of APIs to be migrated and then execute.

Why Capgemini

With one of the largest teams of cloud-native developers and certified digital and cloud experts, we are consistently recognised by Gartner and Forrester for our capabilities and vision. By applying experience honed across thousands of projects, Capgemini creates intelligent applications and cloud business models, bringing in top- and bottom-line efficiencies for our customers.

- Our Team has a depth of experience across Mule 3 and Mule 4 Development and a track record for accurately sizing migrations. Our relationship with MuleSoft allows us to act as a conduit to MuleSoft Support and the Solution Engineering and Product Teams where Platform Issues are encountered.

- We present excellent value with our Hybrid Delivery Model. We can employ a mix of local and offshore team members to achieve a successful Migration outcome. Migration projects are well geared for a Hybrid Team model.
