

DECENTRALIZED CLINICAL TRIALS ARE HERE

THE POSSIBILITIES ARE EVERYWHERE

The ability to monitor participants of clinical trials at home in real time is opening up a world of potential benefits. Fully remote or hybrid trials are enabled by a combination of digital technologies and at-home services that open the door to a new chapter in clinical trials. Learn how a patient-centered approach can help drive drug development, decrease your time to care and improve your patients' quality of life.

BENEFITS OF DECENTRALIZED CLINICAL TRIALS

Accelerate time to care

- At-home delivery increases participation
- Direct-to-patient approach accelerates recruitment
- Personalized interaction maximizes retention and increases medical adherence
- Virtual study teams facilitates patient journeys

Improve data quality

- Mobile, connected devices enhance the scale, completeness and accuracy of data
- Centralized data collection reduces variability between investigator sites
- Near real-time access enhances safety signal detection
- Greater patient diversity yields better study representativeness

Reduce overall trial cost

- Efficient framework streamlines enrollment, engagement and trial management
- A reduction in physical site visits reduces costs
- Centrally managed workflows, monitoring and communications improve efficiency

CAPGEMINI IS UNIQUELY POSITIONED TO SUPPORT YOUR TRANSITION TO DECENTRALIZED CLINICAL TRIALS

Connected Health Mastery

We have end-to-end experience designing and developing services and digital products for trial monitoring and commercial products

Human Centered Design

We are inspired by patient and HCP experience, and our insights from ethnography, applied data, and behavioral science help us design and run DCTs

Platform Plug & Play Experiences

We are experienced in system integration, including in the clinical trial space. We are well equipped to design, build and operate your target end-to-end platform to manage your decentralized trials

New Channel Change deal Methodology

Our change management methodology supports Clinical Operations transformation to align stakeholders on the changes that DCTs introduces

Data Engineering & Science Expertise

We have extended expertise in setting health data models, data engineering and data science for clinical trial platforms

Life Sciences companies are just beginning to explore this new stage in clinical trials. Team up with an experienced partner and take the lead on DCTs.
