

CLOUD TRANSFORMATION SERVICES

# IT'S TIME TO FOCUS ON THE "HOW."

## IDENTIFY YOUR OPPORTUNITIES, BUILD YOUR STRATEGY, AND MAKE IT HAPPEN.

Cloud transformation has become a board-level priority—because the cloud holds the key to radical improvements in agility, resilience, innovation, and competitiveness. But for most companies, cloud transformation has not yet become a reality.

It is time to turn the concept into results. That requires moving applications, DevOps, operations, and business processes to a cloud-first, digital operating model. And that requires a partner who can guide your journey—**every step of the way.**

Capgemini provides the combination of capabilities and the solid foundation you need to launch a successful cloud transformation initiative.

Our experts can assist you with every phase and every consideration—from defining your objectives to creating a cloud strategy, a business case, a Cloud Center of Excellence, a cloud operating model, and a comprehensive execution plan. So you can maximize the business value of the cloud with minimal cost, disruption, and risk.

Along the way, we help you move beyond one-off, piecemeal projects and **identify new opportunities** you may otherwise have missed. And we help you quantify the results, so you can track and report on the business value over time.

### Who We Are

Capgemini is global consulting firm that gives you access to an international team of thousands of cloud specialists who combine business acumen and technical experience to guide your cloud journey.

### What We Do

We provide next-generation cloud services so clients can build the optimal foundation for business transformation initiatives.

### What We Offer
