

The background of the entire page is a dark, abstract image. It features a perspective view of a long, narrow corridor or tunnel. The walls and floor are composed of a complex, glowing grid of lines in shades of blue and orange, suggesting a digital or data environment. A bright light source at the far end of the corridor creates a strong glow and reflection on the floor.

LORD OF THE CLOUDS

Cloud adoption moves far beyond the middle-earth realm of cloud migration, now also driven by sustainability, distribution, sovereignty, 'FinOps', and multi-cloud forces – all for that precious, better business flow.

MY INDUSTRY, MY CLOUD

Industry-specific clouds – focusing on data and solutions for a particular industry, domain or even region – deliver speed, focus, and compliance, while trimming legacy.

OPS, AI DID IT AGAIN

AI renders IT operations fluid, proactive, and resilient, improving efficiency, sustainability, and reliability while it learns – on its way to a handsfree, ‘NoOps’ autonomy.

SIMPLY THE EDGE

Intelligent devices, at the 'edge' of central IT and close to operations and OT, add a powerful dimension to the existing IT infrastructure.

SILENCE OF THE SERVERS

Building highly automated, self-optimizing IT infrastructure platforms that are so entwined with business operations, they are no longer distinctly noticeable.
