

Asset Discovery and Assessment by *Capgemini*

Gain complete visibility
of IT and digital assets

If you can't see it, you can't control it

Vast technology estates are a vital platform for supporting global operations and fueling innovation. But limited visibility of assets across these complex estates creates headaches for everyone.

IT leaders struggle to maintain control over sprawling ecosystems riddled with underutilized and duplicated assets. Security and compliance leaders are hindered by blind spots that increase risk exposure. And finance leaders see costs rising and ROI dwindling.

Gain comprehensive asset visibility

An intelligent, proactive approach to asset discovery and assessment gives you a complete, accurate view of all assets, enabling you to regain control and make informed decisions to accelerate modernization, reduce costs, and mitigate risk.

45% of executives say shadow IT and unmanaged resources are major causes of tech overspend.¹

But **50%** of organizations don't have accurate visibility of their cloud instances. And just 27% have visibility of licenses deployed in the cloud.²

Asset Discovery and Assessment by Capgemini: How it works

Capgemini delivers comprehensive asset visibility through a structured approach covering a series of key components:

Accelerate time-to-value with a proven implementation roadmap

Our accelerators help you achieve faster implementation, deeper insights, and measurable impact

The Capgemini difference

Capgemini delivers complete asset visibility and deeper, data-driven insights through a combination of deep industry experience and global technology expertise. Our accelerators and automation-first methodology help generate rapid value, and our proven delivery frameworks and governance model ensure a structured, de-risked approach to asset discovery and assessment.

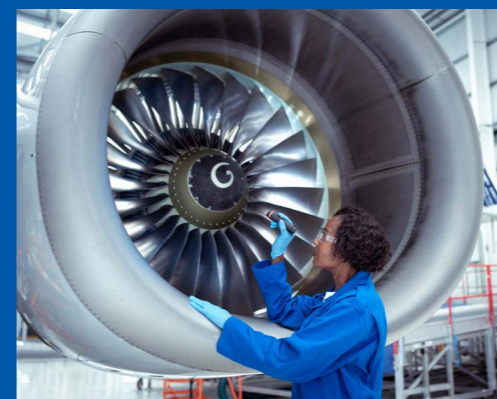

Capgemini services in action

Multinational life sciences company

Centralized service management, increased automation, AIOps capabilities, and standardization across infrastructure and UCC estates.

- €15M operating cost saving
- €4,800 monthly savings

Sustainable aerospace company

Cloud transformation, infrastructure managed services, and redesign and management of global digital workplace.

- Reduced service costs and end-to-end accountability
- Increased productivity and closer collaboration

Leading insurer

Dedicated Rightshore® service model covering data center, end user, service desk, and cross-functional services.

- >35% lower operational costs
- Redirected budget to enterprise transformation program

Begin your journey to comprehensive asset visibility

Gain proactive intelligence from a structured approach to asset discovery and assessment, so you can focus IT spend where it counts, reduce risk exposure, and put your modernization initiatives on the fast track to success.

Take control of all your IT and digital assets

Move from...

Reactive firefighting to **proactive control**

Wasted IT spend to **cost optimization**

Security blind spots to **complete visibility**

Migration risk to **rapid modernization**
