

Bring your intelligent enterprise vision to reality

Capgemini and Google Cloud turn technology potential into business reality, combining transformation experience with secure, world-class AI and data platforms.

Enterprise AI value made real

No matter where you are in the AI adoption journey, Capgemini is ready to help drive scalable innovation with Google Cloud’s native AI technologies across four key transformation areas:

Enterprise AI impact, delivered

Capgemini is already helping customers deploy and scale AI capabilities using Google Cloud technologies.

PUBLIC SECTOR

Additive Catchments

Additive Catchments worked with Capgemini for an AI-lead transformation of their CMaaS (Catchment Monitoring as a Service) platform, a purpose-built monitoring system that helps unlock "cleaner water, healthier ecosystems and faster compliance.

GOVERNMENT

German Government Agency

A German government agency worked with Capgemini to deploy a secure, hybrid cloud environment with sovereign controls to manage and store highly sensitive, controlled, and classified information on servers within German borders.
