

Clear Sight

IT Decision Maker

Navigate the
future with clarity

An aerial photograph of a blue sea with several sailboats. Most sailboats have white sails, but three have red sails. The sailboats are scattered across the frame, with some in the foreground and others further away. The water is a deep blue with visible ripples and small waves.

From fragmented IT data to focused transformation action

Ask for a modern, sustainable IT landscape aligned to business demand.

- Ask for IT spend aligned to the business value it delivers.

- Ask for faster, fact-based decisions that stakeholders can trust.

Make IT transformation decisions with confidence

Rapid AI adoption and continuing economic and geopolitical uncertainty are changing how businesses operate. IT leaders must respond quickly, driving innovation and transformation while continuing to reduce costs and manage risk.

Making the right choices requires a clear understanding of your IT landscape: what assets you have, where they are deployed, how they support the business, their technical health, and what they cost.

Clear Sight IT Decision Maker gives you the insights needed to evaluate your options, align stakeholders, and make confident transformation decisions.

Connecting data. Bringing insights to life.

Connect applications, infrastructure, technologies, business capabilities, tickets, costs, teams, locations...

Use AI-augmented insights, benchmarks, and decision intelligence to confidently chart your path forward.

Clear Sight
IT Decision Maker

Introducing Clear Sight IT Decision Maker

Clear Sight IT Decision Maker (ITDM) is Capgemini's proven approach to enterprise IT transformation. It empowers you to make informed decisions supported by

reliable data and able to stand up to scrutiny.

The approach combines Capgemini's advisory and execution expertise with a structured methodology and an AI-augmented decision intelligence platform.

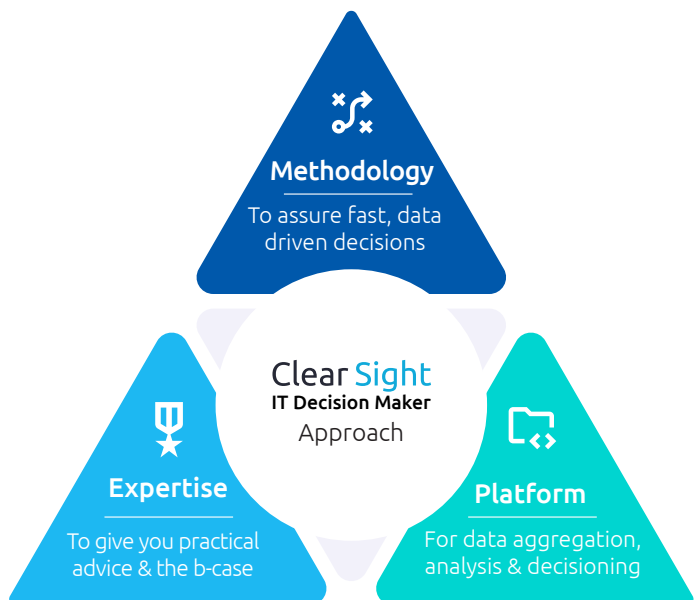

We bring together business, people, technology, cost, and sustainability data from across different silos to create a connected view of your IT ecosystem. Dynamic visualizations, relevant benchmarks, customizable decision algorithms, and AI help identify opportunities, quantify their potential impact, and align stakeholders around a practical roadmap.

The Clear Sight ITDM advantage

Clear Sight ITDM draws on more than 15 years of transformation experience gained from hundreds of application portfolio analyses delivered across industries worldwide. The approach is continuously enhanced to keep pace with evolving client priorities and advances in technology.

Clear Sight ITDM delivers value in five key ways:

- 1 Speed**
Bring your data to life, identify opportunities, and reach decisions faster, with initial outcomes possible in as little as eight weeks.
- 2 Confidence**
Build evidence-based insights and business cases that support objective prioritization and investment choices.
- 3 Foresight**
Understand how decisions affect your business, technology, costs, people, and sustainability goals.
- 4 Alignment**
Use dynamic visualizations and transparent decision logic to engage stakeholders and accelerate approval.
- 5 Pragmatism**
Define a realistic path from today's IT landscape to your long-term strategic ambitions.

1 Week for proof of value

In just one week, gain actionable portfolio insights, prioritized transformation opportunities, and an IT data readiness assessment, with clear estimates of the investment, effort, and next steps needed to accelerate your transformation. Free of charge.

Turn insight into action

Based on your priorities, Clear Sight ITDM helps you understand your options, make informed choices, and translate those choices into measurable outcomes. These include:

Baseline and benchmark

We integrate, enrich, and validate data from across your organization to create a trusted, 360° view of your IT landscape. This gives you a single source of truth for decision-making while enabling comparison against relevant benchmarks.

Optimize the legacy portfolio

We use the TIME model to identify which applications to tolerate, invest in, migrate, or eliminate. This will reduce technical debt, simplify the portfolio, lower costs, and focus investment on the applications that deliver the greatest business value.

Define your cloud and modernization strategy

We assess each application using a structured 6Rs approach to determine the right cloud and modernization path. We then translate the strategy into migration patterns, dependency-based wave plans, and a supporting business case.

Design an agile, cost-efficient operating model

We co-design a future-ready IT operating model that supports greater agility, resilience, and AI readiness. Using best-practice benchmarks, we identify opportunities to improve service delivery, sourcing, and cost efficiency.

Reduce your IT carbon footprint

We establish a baseline for emissions from IT operations and identify application-level actions to reduce environmental impact. By connecting sustainability, modernization, and portfolio decisions, we improve environmental, cost, and technology outcomes together.

From recommendations to results

Across each priority, we provide clear recommendations, a practical implementation roadmap, and a high-level business case. The result is a transformation plan that reflects your objectives, constraints, and ongoing initiatives, enabling you to move forward with clarity.

Helping CIOs make better decisions since 2010

Data: a trusted single source of truth

- Rapid data aggregation, with approved use of AI to accelerate the process
- 360° view across business, technology, costs & people
- Data quality checks and stakeholder validation

Analysis: an AI-augmented decision intelligence platform

- Dynamic visualizations and scenario analysis
- Best-practice benchmarks across 13 industries
- AI Expert engine and customizable decision algorithms

Vision: a smarter path forward

- Prioritized transformation scenarios
- Recommendations and roadmap
- High-level business case to support decisions

Market recognition: Gartner, Forrester, HFS, Everest Group

A few client use cases to inspire you

Banking

IT Cost Takeout

Identified additional technical & operational levers that could reduce the IT TCO. 737 apps & 22660 servers analyzed to deliver a transformation plan for **reduction of 110M€ p.a.**

Automotive

Cloud Modernization

5219 apps and ~15000 servers analyzed (**6R framework**) to build their strategy. Ongoing migration (no big-bang) – over **100 apps migrated**, we assist the client with their strategy

Manufacturing

Apps Decommissioning

1047 apps from 2 merging entities analyzed using TIME -identified 450 eligible candidates.

Decommissioning Factory set up and has helped retire 375 apps in one year

Life Sciences

Digital Transformation

Implement SAP S4/HANA as its digital ERP core solution – 60 apps, 340 SAP components & 554 servers analyzed. **Built roadmap** with 41 apps decomm & savings of **24.8M€**

Distribution

IT Cost Takeout

IT Cost Takeout 2500 apps and 5000 servers analyzed for rationalization & optimization – delivered plans for **30%** portfolio reduction, tech debt remediation for **60%** apps, **\$4.6 M** cost savings p.a.

Retailer

Cloud Migration

762 apps and ~3300 servers analyzed (**6R framework**) to build the cloud migration strategy. This led to the execution of an application migration deal to rehost and **modernize** the portfolio

Insurance

Portfolio Optimization

610 apps spread over 6 regions analyzed to build a **simplification plan** in conjunction with an ongoing global transformation program – 187 apps identified for **decommissioning**

Manufacturing

Carve Out

3921 apps mapped & analyzed to revise MREC decisions. **Value Office** set up to design and manage the post carve-out IT transformation. **90M€ p.a.** IT cost reduced and **423 apps** decommissioned in first year

About Capgemini

Capgemini is the business transformation partner for enterprises in the age of AI. We help organizations imagine and build an intelligent, sustainable future, combining AI, technology and human ingenuity to transform how they operate, innovate and grow. With unique end-to-end capabilities spanning strategy, technology, engineering and intelligent operations, we bring together deep industry expertise and market-leading capabilities in AI, cloud and data to turn ambition into measurable business outcomes at scale. Supported by a robust ecosystem of partners and nearly 60 years of expertise, Capgemini is a responsible and diverse global organization of over 410,000 team members in more than 50 countries. The Group reported 2025 revenues of €22.5 billion.
